TERMS OF REFERENCE (TOR)

for conducting capacity building on GFC project development, evaluation and climate financing in Uzbekistan

1. General Background:

Central Asia as a whole is recognized as one of the world's most vulnerable regions to the impacts of long-term climate change and current climate variability. The financial needs for Uzbekistan to be able to effectively mitigate and adapt to climate change are still substantial. Further, in spite of the ongoing experience in developing and managing projects, there are still institutional capacity gaps to ensure that the Government of Uzbekistan can systematically access, sequence, manage, and monitor climate finance. With these challenges, there is an opportunity to shift the country's focus from technical and procedural support to the development of an in-depth strategy and architecture on climate change finance as well as establishing a robust framework for climate finance. The Green Climate Fund (GCF) Readiness Programme aims to address these capacity gaps.

The objective of the GCF Readiness Programme is to support the Government of Uzbekistan in strengthening their national capacities to effectively and efficiently plan for, access, manage, deploy and monitor climate financing in particular through the GCF. These activities will be planned and implemented in line with national policies and priorities. The Programme targets two important aspects of the GCF approach, access to funds and private sector engagement, both of which require significant preparatory work before GCF financing will be possible at scale. The GCF Readiness Programme focuses on a range of preparatory activities to: a) build and strengthen the institutional capacity of national entities in Uzbekistan, with a focus on enabling direct access; and to b) help Uzbekistan to prepare climate change mitigation and adaptation investment strategies, programmes and projects, including through the active involvement of the private and financial sectors.

Readiness for climate finance is an emerging field of study and there is a dearth of knowledge in this area. Recently, some tools and methods for assessing readiness for climate finance are being developed. Due to inadequate data and knowledge, it has been difficult to plan and manage climate finance options at multiple levels.

2. General goal:

The goal of the present Terms of Reference is to contribute to building the capacities of the national stakeholder groups (ie, government agencies, line ministries, private sector, NGOs, research centers, etc.) for project development for climate financing, in line with GCF investment criteria, including through raising awareness and strengthening understanding about the GCF and its processes, and priorities.
