

## Amendment No.4

### **Request for Quotation (RFQ) for the Provision of provision of Metalwork and carpentry workshops Tool kits support projects in Tartus, Baniyas and Al-Qadmus Ref. UNDP-SYR-RFQ-037-17**

This Amendment has been raised to answer clarifications raised by suppliers:

1. Lot 1, item 5; Portable welding machine. The spec. states that 300 Amp is required, but this the capacity that you would expect for a fixed heavy duty welder. A portable welding machine would be more in the region of 150-200 Amps. Please advise whether an offer for this capacity welder would be accepted.  
**Please note that the requested machine is only 40 Amps, the partner who provided us with the specifications made a mistake by writing 300 Amps.**
2. Lot 2, item 8; Drill bit set, Do you want a set of wood drill bits such as the illustration below?  
**Please see as its mention in the RFQ “Iron drill bits sets Sizes 1mm to 10mm steel“, as for the shape, it’s just spiral model.**
3. To enable us to accurately calculate the cost of freight, could you please advise the actual addresses of the delivery points?
  - **Tartous: the industrial zone, 3 KM to the south of Tartous city.**
  - **As for Baniyas and Al Kadmous, since its small towns, the address is just to Baniyas & Kadmous towns, and we will manage with our partners on the ground to deliver the kits to the workshops.**
