

Buildings' Roofs Details:

Bloc A: almost clear, suitable for roof-mounted ballast structures.

Bloc B: small part is clear. B'' is clear.

Bloc C: 40% is clear as chillers will be added in the near future. If needed, a pergola of approximate height 3- 3.5 m can be added to match the height of the existing level of the small bloc existing on the roof.

Bloc D: existing chillers. If needed, a pergola should be added. D'' is a 3-meter lower level than bloc D, with obstacles, thus, needing a pergola structure.

Bloc E: part shaded, part with obstacles, mostly wouldn't be of use.

Bloc F: 3-meters low level, mostly shaded.

Bloc G: also known as maintenance building, mostly clear.

Bloc H: fully filled with Solar Water Heaters and other obstacles.

Bloc I: mostly shaded

Bloc J: mostly clear
