

This Type I Life Vest enhances your chances of survival in rough waters where rescue may be slow to arrive. This life jacket, which is approved for commercial use, is specially designed to turn most unconscious wearers "face up" in the water, helping to ensure you will be able to breathe even if you lose consciousness. The hi-vis, bright orange fabric and SOLAS-grade reflective material make it easy to see, making it more likely rescuers will spot you sooner. Adjustable straps allow you to customize the fit, and an attachment loop for holding a safety light is built right in. This comfortable, lightweight life Type I Life Vest provides a minimum of 32 lbs. of buoyancy and is sized to fit adolescents and adults 90 lbs. and up. One size fits most. **USCG-approved/Type I.**
