II. BACKGROUND / PROJECT DESCRIPTION

Viet Nam is among the countries most vulnerable to climate change. The Government of Viet Nam has made significant efforts in responding to climate change, including adoption of the National Climate Change Strategy and action plan, the Green Growth Strategy and implementation plan, legal frameworks and policies on disaster risk reduction. The country made the first unconditional commitment to reducing greenhouse missions, setting a target of 8 percent by 2030, or 25 percent with international support, compared to business-as-usual, in its Nationally Determined Contribution submitted to the UNFCCC.

UNDP is collaborating with the Ministry of Agriculture and Rural Development (MARD), Ministry of Construction (MOC), Ministry of Planning and Investment (MPI, as the National Designated Authority), and seven participating provinces of Thanh Hóa, Thừa Thiên Huế, Quảng Ngãi, Quảng Bình, Quảng Nam, Cà Mau và Nam Định, to implement a project “Improving the resilience of vulnerable coastal communities to climate change related impacts in Viet Nam” from 2017-2022, financed by the Green Climate Fund (GCF).

The proposed GCF project seeks to scale up interventions that are already tested to increase the resilience of vulnerable coastal communities. Building on ongoing social protection programmes related to housing for the poor and marginalized, the project will incorporate storm and flood resilient design features in new houses benefiting 20,000 poor and highly disaster-exposed people. As part of an integrated response to managing flood risks, 4,000 hectares of mangroves will be rehabilitated and/or planted to function not only as storm surge buffers, but also to provide ecosystem resources that can support coastal livelihoods. Moreover, to support and sustain both the impact of this project as well as future requisite government policy adjustments that strengthen the resilience of coastal and other

communities, resources will be used to systematize climate and economic risk assessments for private and public sector application in all 28 coastal provinces of Viet Nam.

The objective of the project is to improve the resilience of vulnerable coastal communities to climate change related impacts in Viet Nam. Specifically, the project has three outcomes:

- 1) Storm and flood resilient design features added to 4,000 new houses on safe sites, benefiting 20,000 poor and highly disaster exposed people in 100 communes;
- 2) Regeneration of 4,000 hectares of coastal mangrove storm surge buffer zones;
- 3) Increased access to enhanced climate and loss and damage data for private and public sector application in all 28 coastal provinces of Viet Nam;

UNDP is currently supporting MARD to roll out the tailor-made community based training programme in the communes where GCF project will support households to build resilient houses and regenerate mangrove forest. During Nov 2017-May 2018, UNDP and VNDMA, with support from CARE Viet Nam, have completed a customised CBDRM training materials² and conduct trainings in 16 communes in Quang Ngai. A full set of GCF's CBDRM training material have been piloted in Quang Ngai Province and are ready for replication in other project areas.

UNDP and MARD would like to invite an firm/organization with strong experience in CBDRM/A, integrating climate change/gender and risk information in the commune level planning, to work with the two provinces of Thanh Hoa and Quang Nam, to roll out this training programme in our 23 targeted communes. Results in 2018 will inform further strengthening of implementing CBDRM/A systems in 2019-2022.

III. OBJECTIVE AND SCOPE OF THE WORK

This TOR is being undertaken to support the implementation of the "Improving the resilience of vulnerable coastal communities to climate change related impacts in Viet Nam" Project funded by the Green Climate Fund (GCF). The selected firm/organization is required to work closely with MARD (VNDMA), MOC and selected provinces to strengthen commune level Technical Advisory Groups (as per Decision 1002) and to implement the integrated training courses covering CBDRM/CBDRA, safe housing and mangrove regeneration & management, building on the existing MARD's approved CBDRM/CBDRA guidelines and on MOC guidance on safe housing that meets the GCF project criteria (Decision 51/BXD) in 23 communes in Thanh Hoa and Quang Nam

Objective:

Provide full support to VNDMA and Provinces to carry out CBDRM training in 23 communes in Thanh Hoa and Quang Nam in 2018.

Specific objectives:

1. Support 23 communes to successfully strengthen the functions of the community technical advisory groups under Decision 1002
2. Organise trainings on CBDRA/M trainings for all 23 technical advisory group members and key commune facilitators using the GCF project customised training packages (At least 1 training in Thanh Hoa and 4 trainings in Quang Nam before June 2018)
3. Ensure all 23 commune's technical working members and facilitators received fundamental knowledge on climate change, resilient housing and mangrove regeneration and maintenance.
4. Provide final review and quality control on the reports of CBDRA/M in the communes

Mainstreaming gender and accountability: Specific attention should also be given to how mass/civil society organisations, and particularly the Viet Nam Women's Union can play a central role in enhancing community ownership, accountability and dialogue throughout the project, and this should be reflected in the commune level training sessions.

General organisation/facilitation support: It is expected that the each of the training courses will be 8 days in total duration and will draw on the cost norms, agendas and modalities already agreed and applied at commune level by MARD and/or 1002 project implementation.

Additional data on social economic exposures, e.g. poverty map, infrastructure maps, should be included in the pack if available.
 - Collect historical damage reports from disasters (minimum 10 years) in the provinces and present all the data disaggregated by year, geographically affected locations (district/commune), events per each province.
 - Updating and improve a ½ day risk data module to complement the existing CBDRA process and to highlight specific areas of high risk, and climate change risk in the Province

This should include ensuring analysis supports effective planning and execution of GCF project activities in housing and mangrove regeneration/rehabilitation as required.
- Results of the training should include increased local level knowledge and consensus regarding key climate risk factors in the commune, agreed CBDRA maps and CBDRM/CCA plans for use in the commune (including in SEDP planning) and action plans of how stakeholders can better apply risk information in implementation of the GCF project activities.
- Work with Provinces to ensure integration of DRR/CCA into the SEDP process drawing on results of commune level processes.
