**INSTRUCTIONS FOR PROPOSERS**

**I. BACKGROUND**

This Call for Proposals (CFP) is specific for **UNDP Lebanon - Peace Building Project**.

Since 2008, UNDP has been working closely with local authorities and local actors (municipal council members, *mukhtars*, etc.) all over Lebanon to empower their role in conflict management and peace building.

In 2013, the impact of Syrian refugees’ influx expanded to most Lebanese communities. Signs of different types of conflict between Lebanese and Syrians became clear in many host communities, with intensities varying based on the respective regions’ social and economic context. The municipalities suffered from overload and faced many challenges when it came to manage the situation at the local level. UNDP and through its Lebanon Host Community Support Programme started addressing challenges caused by the impact of the Syrian crisis on Lebanese host communities through working on three sectors: basic services, livelihood and social stability. Under the last sector and through the Peace Building in Lebanon Project, an initiative for improving social stability in Lebanese host communities impacted by the Syrian crisis was launched and Mechanisms for Social Stability (MSS) were established in more than 100 villages all over Lebanon. This activity aims at supporting and strengthening local mechanisms for solving disputes related to the influx of displaced Syrians at the local level as well as enhancing local capacities for dialogue and meeting spaces. It aims at building the skills of local actors and local authorities in mediating and thus increasing likelihood and reducing tensions among Lebanese local groups and between Lebanese and Syrian groups. From this perspective; the Mechanisms aim at preventing or reducing tensions and different types of conflict between different elements of the local communities. In different locations and situations, they take different forms and adjust to the local needs and specifications.

The MSS process entails three phases:

- 1- Conflict analysis phase which is implemented through a series of advisory retreats and meetings with the municipalities and the community to study the root causes of the conflict, its actors and dynamics;
- 2- Mechanism development phase is conducted through training and discussion sessions, where a strategy reflecting the characteristics and elements of the local community is developed;
- 3- Mechanism implementation phase activating the role of the established mechanism (committees or groups) according to the priorities of each village.
