If the supplier does not accept the final price based on UNDP's re-computation and correction of errors, its quotation will be rejected.

After UNDP has identified the lowest price offer, UNDP reserves the right to award the contract based only on the prices of the goods in the event that the transportation cost (freight and insurance) is found to be higher than UNDP's own estimated cost if sourced from its own freight forwarder and insurance provider.

At any time during the validity of the quotation, no price variation due to escalation, inflation,

fluctuation in exchange rates, or any other market factors shall be accepted by UNDP after it has received the quotation. UNDP is not bound to accept any quotation, nor award a contract/Purchase Order, nor be responsible for any costs associated with a Supplier's preparation and submission of a quotation, regardless of the outcome or the manner of conducting the selection process.

Please be advised that UNDP's vendor protest procedure is intended to afford an opportunity to appeal for persons or firms not awarded a purchase order or contract in a competitive procurement process. In the event that you believe you have not been fairly treated, you can find detailed information about vendor protest procedures in the following link: <http://www.undp.org/procurement/protest.shtml>.

UNDP encourages every prospective Vendor to avoid and prevent conflicts of interest, by disclosing to UNDP if you, or any of your affiliates or personnel, were involved in the preparation of the requirements, design, specifications, cost estimates, and other information used in this RFQ.

UNDP implements a zero tolerance on fraud and other proscribed practices, and is committed to identifying and addressing all such acts and practices against UNDP, as well as third parties involved in UNDP activities. UNDP expects its suppliers to adhere to the UN Supplier Code of Conduct found in this link: [http://www.un.org/depts/ptd/pdf/conduct\\_english.pdf](http://www.un.org/depts/ptd/pdf/conduct_english.pdf)

Thank you and we look forward to receiving your quotation.

Sincerely yours,

## **TECHNICAL REQUIREMENTS FOR LIGHT MOORING BUOYS**

### **General**

The buoys have to be compatible for protected areas as well as for open conditions moderately exposed to high seas. They should offer stability and resistance with comparatively reduced dimensions, and can be anchored in open sea for applications requiring a focal plane of up to 3 meter from the sea-level. The buoys will be for depths of between 10 and 20 meters (with the option to extend the depth up to 50 meters with the suitable mooring). They should be UV rays and chemical polluting agent resistant with a greatly reduced maintenance requirement

### **Manufacturing Materials**

The light buoys will be formed by a floating body composed of 4 polyethylene rotomoulded shells floats filled with rigid polyurethane foam, to guarantee unsinkability in case of damages, impacts or collision. They, almost in plastic materials, permit a very limited maintenance. The central structure must be polyethylene tube that connects every part of the buoy: floats, counterbalance and the superior part.

The length of the central structure can be varied, so the focal plane and the stability can change slightly. The color of the buoy should not be obtained by painting but it should be embedded in the plastic, so that no painting is necessary for almost the whole buoy life.

### **Electrical Equipment**

The buoys will have a CSP (Compact Solar Power) system and will be equipped with LED powered by incorporated photoelectric cells of a nominal 3 to 6 nautical mile range. The lantern focal plane on the line of floatation usually varies between 2 to 4 meters.

Utilization of solar panels and LEDs will ensure extended operating electrical system.

Visibility during day time will be ensured through a metal day-mark of large dimensions positioned on top of the tower, with provisions by special construction arrangements for passive radaring.

For further distances (between 7 and 10 nautical miles) the LED lantern powered by solar panels will be used with an autonomous electric storage battery.

### **Lifting**

The buoys will have a CSP (Compact Solar Power) system and will be equipped with LED powered by incorporated photoelectric cells of a nominal 3 to 6 nautical mile range. The lantern focal plane on the line of floatation usually varies between 2 to 4 meters. Utilization of solar panels and LEDs will ensure extended operating electrical system. Visibility during day time will be ensured through a metal day-mark of large dimensions positioned on top of the tower, with provisions by special construction arrangements for passive radaring. For further distances (between 7 and 10 nautical miles) the LED lantern powered by solar panels will be used with an autonomous electric storage battery.

### **Additional fittings**

The buoys should be fitted with electronic GPS tracking systems so as to keep an eye on position and correct functioning of power supply and signaling performance.

#### Details of the mooring system for buoys to include and consider:

The mooring system for buoys should consider the depth and type of sea bed as well as the different marine meteorological conditions it has to face.

#### Maintenance Provisions

The buoys must be designed to require very little maintenance. It is recommended the buoy be inspected annually. Inspection may need to increase depending on the local conditions and the position of the buoy.

**Pendant Mooring** with a hook on one hawse on the bottom of the tail or on the ballast skirt is preferably used in shallow water, water inside the harbor or unexposed to rough sea conditions.

**Bobstay Mooring** has been purposely projected for deep water in open sea. Attaching is done to the body of a tail buoy fitted with two lateral hawses for the hooking of the chain which, being very close to the line of floatation, reduces the oscillation of the buoy due to the undulating movement and gives more stability against the sea currents.

#### Instructions

##### Check Components

- Unpack all Mooring and check all components are complete and correct.

##### Prepare & Attach Chain

- Fit and secure 1 x Ø16mm Shackle and 1 x Ø16mm Swivel Eye to the base of the bridle.
- Note: All Shackles must be positively locked. For example use 3mm Stainless Steel wire to lock the pin eye, or use a shackle pin with nut and split pin.
- Fit and secure a length of chain to the Swivel Eye using 1 x Ø16mm Shackle.
- Note: Please use the guides below to determine the correct chain size and length.

##### Attach Mooring Block

- Fit and secure the Chain to the Mooring Block.
- The Buoy is now ready for deployment.

**Mooring – Biannual Maintenance**

- Inspect the ground chain and sinker.

**Lantern – Maintenance****PROVISION OF FLOATING MOORING DOCKS**

The facility is intended to be deployed at the MPA Karaburun – Sazani to enable better conservation approaches and meantime to allow for intact marine ecosystems.

They answer the need of any marine operator, private developers (marina and residential marina), local tourism development objectives (Public marina, floating bridge, public jetty), navy, customs and coast guard (dock for patrol crafts and landing crafts < 300 ton), professionals (pontoons for ferry, fishing trawlers, aquaculture), sport and leisure associations (rowing pontoon, swimming platform etc); other additional applications might include other water sports kite, protected aquatic species breeding pools, etc.

**The main technical characteristic**

- Free of internal tensions, with uniform thickness, stability and aesthetic appearance unmatched.
- High Density Polyethylene (HDPE), resistant to weathering and UV rays;
- Wide range of color choices (RAL);
- Resistance to wave: Solid but flexible modular system, tested for offshore installations and on bodies of water protected;
- Maintenance: Low, almost nothing;
- Quick and easy Mounting, with lightweight and easy to handle components
- Warranty: 2 years on all components against defects in factory plastic;
- Recyclability: 100%;

**Additional features:**

- Resistant to salt and sea water, acids and sunlight.
- High strength and elasticity to the impact caused by boats. No corner or sharp edge;
