

Scope of Work

DEVELOPMENT OF AL SHABBI CORNICHE BENGHAZI- LIBYA

Introduction/Background

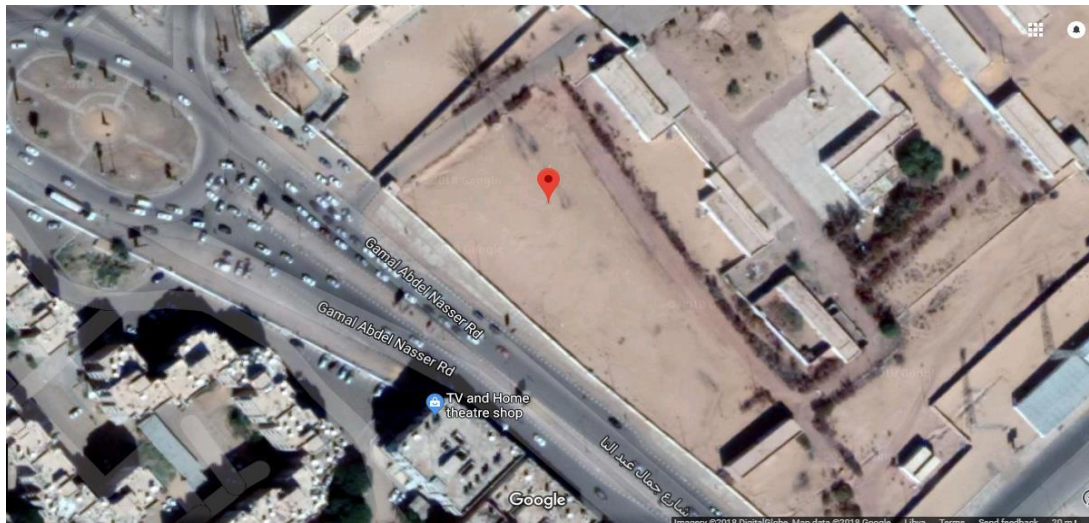

UNDP's project 'Strengthening Local capacities for Resilience and Recovery' is a three-year initiative aiming at supporting local authorities in Libya to respond to the many conflict and human mobility induced challenges - by strengthening the local resilience and recovery mechanisms - that impact negatively people access to essential services, sources of jobs and livelihoods, the social cohesion and security of communities.

The project is built around 3 outputs, including the first Output: Better provision of basic services at local level and increase access for most vulnerable groups from host communities. The project supports selected rehabilitation/reconstruction needs on critical health, education and public facilities (i.e. hospitals, primary medical clinics and schools, as well as public facilities for the benefit of the general public including streets, roads, sidewalks, street and road lighting systems, parks and recreational facilities and other public buildings, among others) in the six targeted municipalities, including provision of equipment for essential service delivery.

The current priority included in consultations run in partnership with local peace partnerships with the support of Peaceful Change Initiative and endorsed by all participants. The priority was further included in the project regular progress reports and endorsed by the Board. It is required work to develop a public park (ALRRIFQ), in the proposed location by the municipality of Sebha-Libya. The park will serve as an opened public green space that provide visitors and Sebha residents an access to a green space for recreation and comfort, being the first facility of the type in Sebha, which is the so-called capital city of the southern region.

Project Location: -

The Green park (ALRRIFQ) will be developed on land lot located in the city center of Sebha of an area about 9,680 square meters.

Development and Landscaping Works include:

- Site preparation;
- Construction of underground water reservoir;

- Construction of water fountain;
- Plantation and Turf grass establishment;
- Irrigation system;
- Connection water from main water source to fill the water tank;
- Electrical works.
- Supply and installation of children playground equipment.

The work shall be completed in accordance with drawings, specifications and relevant applicable Standards.
