Public Perception Survey on Rule of Law and Security

A. Background Information and Project Description

In recognition of recent political and security developments in Libya and related opportunities to enhance stability in Tripoli and avert the further erosion of institutional capacities, and against the backdrop of the UN Secretary-General's decision to move ahead with relocating the United Nations into Libya, the Government of National Accord (GNA) has requested assistance from UNSMIL and UNDP to efforts of the Ministry of Interior, Libyan police and criminal justice institutions to advance security and the rule of law in Libya's capital. Based on detailed assessments of the current context and capabilities, and in consultation with Libyan stakeholders, priority areas have been identified for programmatic engagement as follows:

- Structure, roles and resourcing of local police and criminal justice institutions clarified and prioritized according to identified needs in Tripoli.
- Effectiveness of law enforcement and prison service delivery in Tripoli improved through provision of training and technical and material assistance.
- Ministry of Interior enabled to better assess and provide feasible demobilization options for members of armed formations.
- Ministry of Interior provided with capacity development and organizational assistance.

In line with UN commitment to integrated assistance, and with support from the Global Focal Point arrangement for Police, Justice and Corrections, UNDP and UNSMIL are rolling out a 'Policing & Security Joint Programme' (UNJP), which will maximize the capabilities of the UN system in support of the GNA's agenda in these critical areas. This joint programme is fully aligned with UNSMIL's Security Council mandate and the UN Strategic Framework, and leverages UNDP's capacities and expertise as a programmatic entity and development partner of the Libyan government.

B. Specific Objectives

The public perception survey of the justice, corrections and policing along with the capacity assessment, will establish a baseline to measure public perceptions on rule of law institutions and to help enable the monitoring and evaluation of the impact of the Joint Policing and Security (Rule of Law and Security) Programme.

Overall, the public perception survey aims to:

1. Conduct 500 surveys in Tripoli (250 male, 250 female), 400 surveys in Benghazi (200 male, 200 female) and 400 surveys in Sabha (200 male, 200 female); (Discuss with the project sample size recommendations). Disaggregated data will be collected based on men/women, youth (under 35) and adults (over 35) Surveys **MUST** be face to face.
2. Obtain statistically reliable data on the perceptions, knowledge and levels of awareness of the presence and quality of national services under Rule of Law.
3. The survey will measure public perceptions of the key aspects of Trust: Integrity (perception that state justice, corrections and policing institutions are fair and just);
4. Dependability (perception that State rule of law institutions will do what they say);
5. Confidence perception (State rule of law institutions can do what they say)
6. Mutuality of Control (the power or influence the public feels it has when interacting with: state justice, corrections and policing institutions)
7. Satisfaction (the extent to which the State justice, corrections and policing institutions are perceived as delivering on positive expectations)
8. Commitment (the extent to which the State justice, corrections and policing institutions are perceived as investing energy in maintaining and promoting their relationship with the public) In addition to sector-focused questions concerning the public opinion of the justice, corrections and policing sectors. The contracting firm will be expected to identify opportunities and channels for communication, engagement, and partnership.

The offeror should include in its methodological proposal how representatives of the sample will be ensured. The offeror should also generate statistically relevant data on a wide-range of questions related to the service provided by Libyan rule of law institutions.

C. Scope of service

The contracted firm will conduct a public perception survey of the policing, justice and corrections with special focus on provision of services within these sectors. The survey analysis will measure the public perception on the rule of law institutions service delivery. This survey should allow the Joint Policing and Security programme to determine the baselines for the indicators related with measuring public perception on provisions of justice service. The survey should also shed light in determining how the public perceives its own engagement in overall reform process of the criminal justice system

The offeror will be responsible for the survey design and implementation of technical instruments, data collection methods, data analysis and reporting. The selected company should provide all these materials to the UNDP during the different stages of the survey. This shall include:

- Setting up and managing the study;
- Pre-test of survey instruments; and
- Recruitment and training of field research staff before data collection starts.

The offeror will also be responsible for:

- Quality assurance in data collection;
- Analysis and reporting; as is clearly reflected in the proposed methodology.
- The offeror will report to UNDP-UNSMIL at key stages of the assignment. These include a preliminary assessment report; presentation of a detailed methodology to include finalized research method, specific objectives, limitations, etc. after consultations with stakeholders should be clearly outlined; presentation of draft questionnaire for UNDP approval before fieldwork begins; status updates during data collection; draft report on findings and presentation of final report to all stakeholders.
- Submission of regular progress updates to show progress to date and highlight any challenges or delays with solutions for continuation.

D. Approach and Methodology

Methodology will take into consideration how to best effectively optimize resources for best geographical and demographic coverage.

The offeror will select and propose method that will be most suitable to the task, while ensuring the largest geographical and demographic coverage, within the estimated timeline. The offeror will ensure that the method selected involves a participatory process that generates and collates information in an inclusive and gender sensitive manner.

This includes working in a consultative and collaborative manner with rule of law counterparts, as well as with development partners and members of civil society during the implementation of the survey
