United Nations Capital Development Fund

TERMS OF REFERENCE

1. Project Title

Development of Online Based Financial-Impact Management System (FIMS).

2. Background

The United Nations Capital Development Fund (UNCDF) is the UN's capital investment agency for the world's 47 least developed countries (LDCs). With its capital mandate and instruments, UNCDF offers "last mile" finance models that unlock public and private resources, especially at the domestic level, to reduce poverty and support local economic development. UNCDF's financing models work through two channels: savings-led financial inclusion that expands the opportunities for individuals, households, and small businesses to participate in the local economy, providing them with the tools they need to climb out of poverty and manage their financial lives; and by showing how localized investments – through fiscal decentralization, innovative municipal finance, and structured project finance – can drive public and private funding that underpins local economic expansion and sustainable development. UNCDF financing models are applied in thematic areas where addressing barriers to finance at the local level can have a transformational effect for poor and excluded people and communities.

UNCDF's Local Development Finance Practice (LDFP) aims to be a centre of excellence and innovative fund for local government finance and local economic development finance in the world's 47 LDCs. As part of UNCDF's development goals, it promotes and supports transformative investment through local governments and domestic banks in LDCs by piloting and scaling up innovative financing mechanisms and policies in the public and private sectors. The vision is a world in which LDCs will have robust policy environment, strong institutional capacity and effective financing vehicles that contribute to diverse, inclusive and resilient local economies and societies by 2030.

LDFP at UNCDF adopts a transformative impact financing approach to promote service delivery, infrastructure investment and local economic development that retains value within the local territory. This builds local fiscal space and local fixed capital formation. Working with local governments, domestic banks and local businesses, LDF designs, pilots and tests out financing mechanisms and business models in both public and private sectors that support locally designed public investments and revenue generating capital investment projects. The investment financing toolboxes include Fiscal Decentralization, Local Development Funds for public capital investment programming, Structured Project Finance, Municipal Finance, SME Finance, and Public-Private Partnerships.

To support the described mandate, the LDFP has developed different tools:

I. Revenue Generating Pipeline - RGP database:

An active pipeline of bankable infrastructure transactions, private investments, public private partnerships (PPPS), and municipal investments, which are financially monitored through a Microsoft excel data base, currently operated and stored on an individual computer.

The RGP database captures each investment –At present, 175 approx.– with a recording of the investment amount, financing gap, amount of seed capital grants or loans needed, and potential of financing which can be mobilized from domestic banks. It also includes payments schedule, disbursement amount per year. The database also labels each investment on a specific scale which can then categorize investments from hard pipeline, soft pipeline, and the specific stage of investment development.

The financial figures or categorization stages change frequently and on daily basis.

Specific current components of RGP database are:

- Index Number
- Investment Name
- Hard/Soft Pipeline

Currently the RGP database incorporates information from 9 countries – Tanzania, Uganda, Bangladesh, Benin, Guinea, Nepal, Cambodia, Lao, Myanmar–. The number of countries and entries will increase as the pipeline expands to other countries. Also, is restricted to specific UNCDF staff – 20 users currently but the number may increase.

II. Other Databases:

- **LDF Global Database- LDF database:**

Database including every investment supported by UNCDF in each country of operation during the period of the Strategic Framework 2014 – 2017. It is managed through a Microsoft Access file, currently stored on an individual computer, further in a corporate system.

- **UNCDF Corporate Enterprise Resources Planning System (ERP) – ATLAS:** the UNCDF Corporate Enterprise Resources Planning System (ERP) - ATLAS provides an integrated suite of information technology applications that support activities such as finance and budget management, human resources management, operations and other corporate core functions. It tool allows the Local Development Finance practice to run specific budget allocations and delivery reports which are at the project level, but not at the investment level.

3. Objective of the project and expected Output

Objective

As the portfolio is expanding, it is becoming important that the quality, accuracy and timely access of the RGP pipeline is further enhanced. In this context, the LDFP aims to develop a simple, yet practical, Online Based Financial-Impact Management System (FIMS).

Expected output

The expected output will be a simple, yet practical, Online Based Financial-Impact Management System (FIMS), which will:

- * Enable LDFP authorized staff to capture, amend, and run financial reports against the RGP of investable projects, including financial figures related to grants, loans and guarantees.
- * Enable LDFP monitor the impact development of the RGP of investable projects.
- * Enable LDFP monitor the financial performance, schedule of payments and repayments of loans, grants etc....
- * Enable LDFP improve the quality and timeliness of the information collected leading to better decision making on the pipeline of investments.
- * Enable and eliminate manual intervention and dependency.
- * Enable LDFP to link specific FIMS pipeline components to the Public Global Database

4. Scope of work.

Software Requirements

* Specific Minimum requirements FIMS

The FIMS should contain specifically, but not limited:

1. Dashboard providing at-a glance views of key indicators from the RGP database presenting as a result a quick overview of its performance.
2. Provide capability to consult information of the whole pipeline such as, but not limited to: index, classification, investment name, country, municipality, sector, main theme, sub-theme, UNCDF programme, UNCDF funding Programme, total project cost, UNCDF grant, loan or guarantee, donor information, capital unlocked and to be unlocked, financial flows, thematic metrics, attachments, pictures, GPS locator etc.
3. Provide capability to upload the documentation for each investment in one Master folder and subsequent subfolders (investment package, data collection, pictures, reports etc..) and store pictures for each investment – photo library.
4. GPS location to live interactive maps. It would be desirable that when zooming the visitor also sees the environment where the investment has been done.
5. Provide capability to consult information from a specific investment such as, but not limited to: index, classification, investment name, country, municipality, sector, main theme, sub theme, UNCDF programme, UNCDF funding Programme, total project cost, UNCDF grant, loan or guarantee, donor information, capital unlocked and to be unlocked, financial flows, thematic metrics, attachments, pictures, GPS locator etc.
6. Automated notifications to the LD investments database administrator each time that any information is added, modified or eliminated.
7. Provide capability to the Senior Investment Manager or to whom he assigns to schedule the LD Investment Committee Meeting and send documents attached to the database through outlook to the members of the committee (each theme will have its own committee members).
8. Provide capability for the Administrator to schedule the corporate Impact Investment Committee for Loans and

United Nations Capital Development Fund

Guarantees once all documentation has been filled (minimum number of standard loan application templates must be filled and attached for the request for the committee to take place).

9. Provide capability for managers to notify each other (manually) of specific project entries or task completion.
10. Provide capability to consult information regarding the investment Impact metrics and performance measurement, such as but not limited to: Impact name, metrics, means of verification, unit of measurement, baseline, target, actual performance, data collection date, performance percentage, data collection person, data provider, attachments, core metrics.
