Section 5a: Schedule of Requirements and Technical Specifications/Bill of Quantities

Project background:

Power Division, Ministry of Power Energy and Mineral Resources, GoB is implementing GEF-Funded Project "Development of Sustainable Renewable Energy Power Generation (SREPGen)". The objective of the Project is to reduce the annual growth rate of GHG emissions from the fossil fuel-based power generation by exploiting Bangladesh's renewable energy resources for electricity generation. The basic approach of the Project is to promote renewable energy in Bangladesh through the recently established Sustainable and Renewable Energy Development Authority (SREDA).

With this goal, as mentioned before, SREPGen is supporting SREDA in conducting solar resource assessment through installing 10 Nos. solar irradiance monitoring stations across Bangladesh. A high quality solar irradiance study is being conducted which will inform the spatial and temporal pattern of solar irradiance in Bangladesh. For accessing the data, necessary access to monitor the solar irradiance data shall be provided to SREDA and SREPGen through web server. A mobile apps would be developed as well for accessing the solar irradiance data from the stations. In the process, SREDA officials will be trained also to handle the equipment to be installed under this assignment and other technical aspects.

The proposed project will be part of the project mentioned with additional high-quality equipment (addition to 10 stations) for this purpose which includes two Sun tracker Systems along with 4 Pyranometers, 2 Pyrhemometers, two weather sensors, one server, related software and necessary training
