Description of Requirements

Context of the Requirement	Generation and use of data is one of Sri Lanka's greatest challenges in implementing and achieving the Sustainable Development Goals (SDGs) by 2030. Similarly, efficient coordination and timely knowledge sharing is also a major challenge. This proposed pilot is to test new ideas in terms of data sourcing, tracking, funding as well as galvanizing knowledge networks and tapping into the wisdom of communities to achieve the 2030 agenda. The proposed SDG Integrated Solutions Platform will provide a 'one stop shop' for data, stories and ideas to advance sustainable development in the country. Since one of the main objectives of this pilot project is to track and visualize public and private sector investment towards the SDGs in Sri Lanka, the proposed online data visualization widget will be an important element of the Integrated Solutions Platform.

The **SDG Integrated Solutions Platform** pilot project is a joint initiative by UNDP, ILO, UNOPS and the Resident Coordinator's Office (RCO) on behalf of the UN Country Team (UNCT) in Sri Lanka.

Generation and use of data is one of Sri Lanka's greatest challenges in implementing and achieving the Sustainable Development Goals (SDGs) by 2030. Similarly, efficient coordination and timely knowledge sharing is also a major challenge. This proposed pilot is to test new ideas in terms of data sourcing, tracking, funding as well as galvanizing knowledge networks and tapping into the wisdom of communities to achieve the 2030 agenda. The proposed SDG Integrated Solutions Platform will provide a 'one stop shop' for data, stories and ideas to advance sustainable development in the country. Since one of the main objectives of this pilot project is to track and visualize public and private sector investment towards the SDGs in Sri Lanka, the proposed **online data visualization widget** will be an important element of the Integrated Solutions Platform.

The data that will feed into the widget will be captured through a mapping exercise on existing and/or budgeted public and private sector investments towards the selected SDGs. This will provide an overview of the SDG financing ecosystem in Sri Lanka, and, in doing so, identify where funding gaps exist. Given the time duration of nine months for this project, the widget will be piloted in a selected province/district.
