RFP - Mid-Term Evaluation of Making Access Possible (MAP)

Questions and Answers

Question: *As per ToR, the net income over the past 2 years should be equal or higher than the price proposal submitted and the current ratio should be at least 1.0 or higher.*

For net income over the past 2 years do you mean the cumulative (year 2016 + year 2017), the average or for each single year the ratio should be valid?

Answer: By the phrase “net income over the past 2 years should be equal or higher than the price proposal submitted and the current ratio should be at least 1.0 or higher”, we mean that these conditions should be met EACH year, and not the cumulative 2 years period. That is, the income in 2016 should be higher or equal than the price proposal. In 2017, the income should also be higher or equal than the price proposal. The same principle applies for the current ratio. The current ratio for each of the year 2016 and 2017 should be at least 1.0 or higher.
