

## Enhancing Access to Justice through Institutional Reform (A2J) Project

**REFERENCE: A2J/RFP/2018/01: *Development of Nepal Law (Software) for the IOS and Android application plus web based software***

Bidders Queries (Questions)	Answer to bidders queries (Response )
<ol style="list-style-type: none"> <li>1) Primarily, due to several laws persistent in Nepal, does the app/ software need to embed and comply with all of the existent laws or there are only specified categories of laws.</li> <li>2) Does the website/ application require to integrate support center or call center services?</li> <li>3) The 90 days' time period is allocated for the development of the app or the integration of the content as well?</li> <li>4) Consequently, is the role of our company is reliant upon development of the app/website and training? And, the content integration by UNDP?</li> <li>5) Are the soft copy of law's provided to us in both English and Nepali language?</li> </ol>	<ol style="list-style-type: none"> <li>1. Software and app should comply with existent laws as well as new law</li> <li>2. We do not need any integrate support center or call center services.</li> <li>3. The 90 days' time period is allocated for development of app, software as well as to add the content to the software and apps</li> <li>4. Bidder should add and upload the data provided by MOLIPA</li> <li>5. Yes MOLIPA will provide the data in digital format.</li> </ol>
<ol style="list-style-type: none"> <li>1. We received bid document for project "Development of Nepal Law (Software) for the iOS and Android application plus web based software." It contains non-functional requirements as in overview of software, intended users, development platform, significance and many more details. These gives us idea on nature of software. But this software can be developed in elaborate or in minimalistic way. Mercantile can propose to build software in minimalistic way to keep financial cost to the minimum to win the bid, but in the long run we would not feel proud to have developed software that did not look sophisticated. Hence if you can provide some guidelines or <b>Functional Requirement</b> document, we will be in position to propose realistic figures.</li> </ol>	<ol style="list-style-type: none"> <li>1. Bidder should use X-code for IOS development and Android studio for Android App and PHP MYSQL should be used for web software.</li> <li>2. The function of software and app is to retrieve data from database inserted from web based application so users from 7 Province and MoLIPA offices should be able to upload the laws by users which have many category of Laws that data should be shown in mobile apps to users. details are mention in the TOR</li> </ol>
<ol style="list-style-type: none"> <li>1. Would you please clarify the key personnel for IOS Android Web Programmer because we believe that for the Developer of Nepal Law (Software), the key personnel for required expertise should be breakdown into 3 (Three) key expertise i.e, IOS Developer, Android Developer and Web Programmer as per the Terms of Reference (ToR).</li> </ol>	<ol style="list-style-type: none"> <li>1. Bidder can specify their own human resources as required.</li> </ol>
