Public Sector Capacity Building Workshop on Foresight and Innovation

Assignment	: Conduct a Comprehensive Programme on Foresight and Innovation for Public Sector Capacity Building
Reports to	: UNDP Innovation Focal Point/Partnerships Analyst
Language required	: English

1. PROJECT DESCRIPTION

UNDP Sri Lanka began its innovation work in 2014, which resulted in the first National Summit on Foresight and Innovation for Sustainable Human Development held in 2016. The primary outcome of the Summit was to strengthen the foresight and innovation eco-system through the establishment of a Social Innovation Lab in the country. Following a scoping mission conducted by Pulse Lab Jakarta to gauge the readiness of the institutions and organizations for a Lab of this kind, and extensive deliberations with multiple partners and stakeholders on possible ways forward, Citra Social Innovation Lab was established as a joint cost-shared initiative between the Ministry of Science, Technology, and Research and UNDP.

Citra use foresight and innovation tools to prototype and test development solutions to ensure they are agile and holistic before nation-wide implementation. The Lab facilitates creating an environment that is conducive to looking at problems from different perspectives and delivers holistic and sustainable development solutions.

One main pillar of work for Citra is identifying, highlighting and further empowering public sector officials who are performing in innovative and new ways within their existing systems. Before its formal establishment, Citra worked with the Sri Lanka Institute of Development Administration (SLIDA) at the Ministry of Public Administration, Management and Law and Order to conduct a capability building programme in June 2017 for a cohort of induction trainees and a group of Class I officials which was received well by all officials involved.

As a scaling up of this initiative, a partnership has been established with the Ministry to co-develop a comprehensive programme on Foresight and Innovation for the Public Sector of Sri Lanka. The proposed Programme will be tailor-made to suit the requirements of the public sector to strengthen and transform them to become champions in the sustainable development process of the country.

2. SCOPE AND OBJECTIVE

The service provider is to develop and conduct a pre-agreed, customized programme over a residential 5-day training that is specifically targeting the needs of the public sector of the country. The components may include global leadership, problem solving methodologies, innovation in development, integrated solutions, understanding user journey, and design-thinking strategies, and other such tools to strengthen the capabilities of these officials.

After the completion of the programme, the officials will be convened for a 2-day recap session after 3 months to share their experiences in using these techniques and tools in their everyday processes. This will guarantee the participants utilizing the skills they gain through the initial programme, and in so doing contribute towards the larger objective of this programme itself. The service provider is expected to share technical expertise and mentor these officials during these 3 months.

The overall objective of this programme is to build an exclusive cohort of public service officials who will be exposed to new methods of development planning, calculated risk-taking, foresight, and integrated development services, thereby cultivating efficient public service delivery to meet the ambitious development visions of Sri Lanka.

During 2019, two workshops (with the three months of mentoring and the recap session at the end) will be conducted for two cohorts. The two workshops will take place in two weeks in the month of July; the first workshop from July 08th to the 12th, and the second workshop from July 22nd to the 26th. The Service Provider will need to be available to conduct both of these workshops during these times.
