Implementing Partner of UNDP	Strengthening Women's Ability for Productive New Opportunities (SWAPNO)
Brief Description of the Required Services	<p>A baseline survey is to be undertaken in three districts within the parameters of expected results of the project: outcomes 1 to 5 as listed above pertaining to a household baseline survey. The survey will establish benchmarks of the prevailing situation of the project before the introduction of project interventions to serve as the basis for impact assessment of the project's interventions. The baseline household survey on SWAPNO women beneficiary will adopt Randomized Control Trial (RCT) design so that the impact of the interventions can be determined with proper counterfactual at the end of the project cycle. SWAPNO wants to apply state-of-the-art digital data collection technology for faster, relevant and valid data collection for household baseline survey. SWAPNO suggests, an android plus web-based application will be developed for the survey towards timely and accurate data collection by the contracted firm for the survey.</p> <p>The study team is expected to perform the following activities:</p> <ol style="list-style-type: none"> 1. Participate in planning meetings with relevant project staff of SWAPNO and review relevant project documents. 2. Submit a detailed work plan to SWAPNO along with timeframe and responsible persons for this assignment. 3. Finalize study methodology including data collection methods, sampling strategy with appropriate framework (i.e., RCT, but not limited to). 4. Finalize data collection tools (questionnaire, checklist, guidelines) for the study in consultation with SWAPNO team. The study team will be responsible for pre-test and finalization of tools and techniques for the survey. The data collection tools will be in Bengali and English language. 5. Organize 5 training sessions for the 20 enumerators followed by field practice. The training will include methodology, tools and technique of the survey, to ensure that enumerators have in-depth understanding of the study.

6. Ensure data collection from the respondents as per sample design, using prescribed tools and techniques.
7. Prepare and finalize data analysis and tabulation plan and generate output tables accordingly.
8. Provide soft copy of data (MS-Excel, MS-Access & SPSS), both clean and unclean and also output tables with 'do file' (syntax files).
9. Submit draft report of the study to SWAPNO team prior to submission of final report. SWAPNO will review the draft report and provide necessary feedback. The study team will submit the final report addressing the feedback received from SWAPNO.

However, the detailed scope of work is illustrated later in the output tables (section E) with an estimated duration of each task.

Study Population:

- The 3rd cycle of SWAPNO is going to be implemented in 99 Union Parishads; 45 Union Parishads of Jamalpur district, 37 Union Parishads of Lalmonirhat and 17 Union Parishads of Gaibandha district.
- Total beneficiary number in the three districts is 3564, with 36 women per Union.
- The baseline is the basis for the end line survey, whereby the impact will be measured using difference in different method, hence the baseline should be a Randomized Control Survey (RCT).
- The sampling frame as suggested to be statistically representative should be 404 respondents who are in the treatment group and 404 respondents for the control group.
- Study team should propose sampling method ensuring sample is representative of beneficiary population and geographic coverage.

Hiring a firm for conducting baseline survey of SWAPNO 3rd cycle

A. Project Title:

Strengthening Women's Ability for Productive New Opportunities (SWAPNO)

B. Description of the Assignment

Strengthening Women's Ability for Productive New Opportunities (SWAPNO) project is being implemented by LGD in 99 Union Parishad of Jamalpur, Lalmonirhat and Gaibandha districts and earlier in 124 Union Parishads of Kurigram and Satkhira. 4,464 women beneficiaries were enrolled in the program in 16 August 2015 and they completed project tenure on 15 February 2017. 2nd batch of 4464 women beneficiaries were enrolled in SWAPNO under 2nd cycle in November 2017 and completed their tenure in May 2019. 3rd batch of 3564 women beneficiaries will be enrolled from September 2019. SWAPNO intend to conduct household survey on socio-economic status with provision of Randomized Control Trial (RCT) to establish baseline for these beneficiary women of that 3rd cycle.

C. Project Description:

SWAPNO is a public-works and social transfer-based poverty graduation project that targets ultra-poor rural women who are widowed, divorced, abandoned or left with a disabled husband. The project does not only aim at lifting poor women out of poverty during the project period; it also helps them sustain with a higher income level after the end of project support. To achieve this goal, the focus is on future employability. The idea is that the set of skills learnt from training will help women invest their savings for productive purposes, which would yield a stream of income in years to come. In addition to self-employment, SWAPNO also helps place women in jobs in local Small and Medium Enterprises (SMEs) and private sector companies in the formal and informal sectors.

While SWAPNO has demonstrated success, lessons show that women risk falling back into poverty as they are malnutrition, vulnerable to climate and disaster risks, and can risk facing gender-based violence by participating in a project that can be perceived to be challenging social norms. At the same time, the project has successfully piloted public-private partnerships that improve the women's skills and help place them in formal sector jobs; it also ran successful microplots that used mobile money for promoting financial inclusion and improving efficiency in the government-to-person (G2P) platform. The findings on mobile money will inform national policy on scaling up digital payments through G2P across Bangladesh.

By integrating these lessons, SWAPNO's strategy to support women's access to decent employment, ensure discrimination-free environment in public work places, develop adaptive livelihoods and access to financial services for sustainable graduation from extreme poverty, and develop local government capacity to implement pro-poor projects. SWAPNO will achieve the following results:

- **Outcome 1: Increased income and assets by expanding options**
- **Outcome 2: Enhanced human capabilities for exercising choices**
- **Outcome 3: Strengthened resilience to shocks including disasters and climate change**
- **Outcome 4: Enhanced financial inclusion for equitable opportunities**
- **Outcome 5: Improved policies and mechanisms for sustaining SWAPNO's benefits**

The survey will establish benchmarks of the prevailing situation of the project before the introduction of project interventions to serve as the basis for impact assessment of the project's interventions. The baseline household survey on SWAPNO women beneficiary will adopt Randomized Control Trial (RCT) design so that the impact of the interventions can be determined with proper counterfactual at the end of the project cycle. SWAPNO wants to apply state-of-the-art digital data collection technology for faster, relevant and valid data collection for household baseline survey. SWAPNO suggests, an android plus web-based application will be developed for the survey towards timely and accurate data collection by the contracted firm for the survey.

The study team is expected to perform the following activities:
