

July 31, 2019

In the context of providing clarifications for the process RFQ/UNDP/HAI/19.58, please find below the answers to the various questions from potentials bidders:

- 1- Regarding the geolocation of the sites designated to shelter the 12 sirens, in the file called **Siren Location** there are two (2) documents provided one is called "**Tableau de localisation des sirènes**" and the other "**Emplacement des Sirènes**". While comparing the two we realized that the last five (5) locations (**Chambellan, Corail, Les Irois, Moron, Pestel**) have different positioning, would you please let us know which one of the two should we take into consideration?

Response: Indeed, in the first part of the document "**Tableau de localisation des sirènes**" GPS coordinates are given in degree minute second, while in the second part of the document "**Emplacement des sirènes**" the GPS coordinates for some locations (like **Moron, Chambellan, Corail, Les Irois, Pestel**) are in decimal degree. There is no error in the positions, but to avoid any confusion please consider the GPS coordinates of the "**Tableau de localisation des sirènes**" which are all in degree minute seconds.

Procurement Unit hopes to receive your bid (technical and financial offer) on Wednesday, August 7, 2019 by 16:30 (Haiti time).
