

UNDP CYP RFQ 084 2019

RFQ Subject: Conservation/Stabilisation of wall paintings at Saint Varnavas church

Clarifications no 1 dated 3 September 2019

	QUESTIONS	ANSWERS
1	In order for our team to calculate the precise costs regarding the deliverables outlined in Outputs 1 and 1A architectural drawings and site schematics are required. We would like to know whether such drawings are already available, their format (hand-drawn or electronically drafted) and if we can obtain them before submitting the RFQ.	Architectural drawings of the church are not available. The conservators are expected to document in very simple in scale drawing/s the area of the frescoes indicating just the shape and dimensions of the surface of the frescoe/s and their distance from main architectural elements in their approximate area (for example from ceiling, floor, wall, column etc.). As it is mentioned in the ToR, it is expected that the drawings will be submitted in AutoCAD drawing file format.
