Following the technical evaluation, in the second stage, the price proposal of all qualified firms, which have attained minimum 70% score in the technical evaluation, will be compared. The contract will be awarded to the firm offering the “best value for money” based on the cumulative method.

In this methodology, Technical Criteria weight is 70 and Financial Criteria weight is 30. Accordingly, the maximum number of points assigned to the financial proposal is allocated to the lowest price proposal. All other price proposals receive points in inverse proportion. A formula is as follows:

$$p = y (\mu/z)$$

Where:

p = points for the financial proposal being evaluated

y = maximum number of points for the financial proposal

μ = price of the lowest priced proposal

z = price of the proposal being evaluated.
