

Bidders Clarifications 02

RFQ-186-2020

Emergency Conservation Works at the church of Agios Charalambos

Bidders Questions and Answers

No	Question	Answer
1	Annex 1.4 General Requirement of Works, Clause 11 Camera Surveillance, asks the Contractor to install CCTV cameras and associated system to monitor the site during the works day and night. However, there is no corresponding item in the BoQ. Is CCTV surveillance required? If so, as the Engineer will approve the locations of the cameras could you please specify how many CCTV cameras will be required?	<p>Please refer to BoQ Revision 3 uploaded in website.</p> <p>Site Delimiting Barriers and Surveillance Cameras have been defined individually in the Preliminaries Section of the BoQ Rev. 3 and uploaded on website.</p> <p>As per Annex 1.4, CCTV cameras must be installed in all possible locations that will cover all the site. The exact number will be decided during mobilization.</p>
2	At the end of the BoQ issued on 24 th September 2020, in the summary section, the Section 1.5 is crossed out whilst there is an item "1.5.1 Removal of Plaster up to 2m (Optional item-Supervision of Conservator is required) 300 m2" which is to be priced. However, item 1.6.1 hence item 1.6 is crossed out. There seems to be a clerical error. We think item 1.6 in the summary section should have been crossed out instead of item 1.5. Could you please clarify?	<p>Please refer to BoQ Revision 3 uploaded in website.</p>
