10.2 UNDP shall endeavor to provide such responses to clarifications in an expeditious manner, but any delay in such response shall not cause an obligation on the part of UNDP to extend the submission date of the Proposals, unless UNDP deems that such an extension is justified and necessary.

### **11. Amendment of Proposals**

11.1 At any time prior to the deadline of Proposal submission, UNDP may for any reason, such as in response to a clarification requested by a Proposer, modify the RFP in the form of a Supplemental Information to the RFP. All prospective Proposers will be notified in writing of all changes/amendments and additional instructions through Supplemental Information to the RFP and through the method specified in the **Data Sheet** (DS No. 18).

11.2 In order to afford prospective Proposers reasonable time to consider the amendments in preparing their Proposals, UNDP may, at its discretion, extend the deadline for submission of Proposals, if the nature of the amendment to the RFP justifies such an extension.

## **C. PREPARATION OF PROPOSALS**

### **12. Cost**

The Proposer shall bear any and all costs related to the preparation and/or submission of the Proposal, regardless of whether its Proposal was selected or not. UNDP shall in no case be responsible or liable for those costs, regardless of the conduct or outcome of the procurement process.

### **13. Language**

The Proposal, as well as any and all related correspondence exchanged by the Proposer and UNDP, shall be written in the language (s) specified in the **Data Sheet** (DS No 4). Any printed literature furnished by the Proposer written in a language other than the language indicated in the **Data Sheet**, must be accompanied by a translation in the preferred language indicated in the **Data Sheet**. For purposes of interpretation of the Proposal, and in the event of discrepancy or inconsistency in meaning, the version translated into the preferred language shall govern. Upon conclusion of a contract, the language of the contract shall govern the relationship between the contractor and UNDP.

### **14. Proposal Submission Form**

The Proposer shall submit the Proposal Submission Form using the form provided in Section 4 of this RFP.

### **15. Technical Proposal Format and Content**

Unless otherwise stated in the **Data Sheet** (DS no. 28), the Proposer shall structure the Technical Proposal as follows:

15.1 Expertise of Firm/Organization – this section should provide details regarding management structure of the organization, organizational capability/resources, and experience of organization/firm, the list of projects/contracts (both completed and on-going, both domestic and international) which are related or similar in nature to the requirements of the RFP, and proof of financial stability and adequacy of resources to complete the services required by the RFP (see RFP clause 18 and DS No. 26 for further details). The same shall apply to any other entity participating in the RFP as a Joint Venture or Consortium.

15.2 Proposed Methodology, Approach and Implementation Plan – this section should demonstrate the Proposer's response to the Terms of Reference by identifying the specific components proposed, how the requirements shall be addressed, as specified, point by point; providing a detailed description of the essential performance characteristics proposed; identifying the works/portions of the work that will be subcontracted; and demonstrating how the proposed methodology meets or exceeds the specifications, while ensuring appropriateness of the approach to the local conditions and the rest of the project operating environment. This methodology must be laid out in an implementation timetable that is within the duration of the contract as specified in the **Data Sheet** (DS nos. 29 and 30).

Proposers must be fully aware that the products or services that UNDP requires may be transferred, immediately or eventually, by UNDP to the Government partners, or to an entity nominated by the latter, in accordance with UNDP's policies and procedures. All proposers are therefore required to submit the following in their proposals:

- a) A statement of whether any import or export licences are required in respect of the goods to be purchased or services to be rendered, including any restrictions in the country of origin, use or dual use nature of the goods or services, including any disposition to end users; and
- b) Confirmation that the Proposer has obtained license of this nature in the past, and have an expectation of obtaining all the necessary licenses, should their Proposal be rendered the most responsive.

15.3 Management Structure and Key Personnel – This section should include the comprehensive curriculum vitae (CVs) of key personnel that will be assigned to support the implementation of the proposed methodology, clearly defining the roles and responsibilities vis-à-vis the proposed methodology. CVs should establish competence and demonstrate qualifications in areas relevant to the TOR.

In complying with this section, the Proposer assures and confirms to UNDP that the personnel being nominated are available for the Contract on the dates proposed. If any of the key personnel later becomes unavailable, except for unavoidable reasons such as death or medical incapacity, among other possibilities, UNDP reserves the right to consider the proposal non-responsive. Any deliberate substitution arising from unavoidable reasons, including delay in the implementation of the project of programme through no fault of the Proposer shall be made only with UNDP's acceptance of the justification for substitution, and UNDP's approval of the qualification of the replacement who shall be either of equal or superior credentials as the one being replaced.

15.4 Where the **Data Sheet** requires the submission of the Proposal Security, the Proposal Security shall be included along with the Technical Proposal. The Proposal Security may be forfeited by UNDP, and reject the Proposal, in the event of any or any combination of the following conditions:

- a) If the Proposer withdraws its offer during the period of the Proposal Validity specified in the **Data Sheet** (DS no. 11), or;
- b) If the Proposal Security amount is found to be less than what is required by UNDP as indicated in the **Data Sheet** (DS no. 9), or;
- c) In the case the successful Proposer fails:
  - i. to sign the Contract after UNDP has awarded it;
  - ii. to comply with UNDP's variation of requirement, as per RFP clause 35; or
  - iii. to furnish Performance Security, insurances, or other documents that UNDP may require as a condition to rendering the effectiveness of the contract that may be awarded to the Proposer.

## 16. Financial Proposals

The Financial Proposal shall be prepared using the attached standard form (Section 7). It shall list all major cost components associated with the services, and the detailed breakdown of such costs. All outputs and activities described in the Technical Proposal must be priced separately on a one-to-one correspondence. Any output and activities described in the Technical Proposal but not priced in the Financial Proposal, shall be assumed to be included in the prices of other activities or items, as well as in the final total price.

## **17. Currencies**

All prices shall be quoted in the currency indicated in the **Data Sheet** (DS no. 15). However, where Proposals are quoted in different currencies, for the purposes of comparison of all Proposals:

- a) UNDP will convert the currency quoted in the Proposal into the UNDP preferred currency, in accordance with the prevailing UN operational rate of exchange on the last day of submission of Proposals; and
- b) In the event that the proposal found to be the most responsive to the RFP requirement is quoted in another currency different from the preferred currency as per **Data Sheet** (DS no. 15), then UNDP shall reserve the right to award the contract in the currency of UNDP's preference, using the conversion method specified above.

Proposals submitted by two (2) or more Proposers shall all be rejected if they are found to have any of the following:

- a) they have at least one controlling partner, director or shareholder in common; or
- b) any one of them receive or have received any direct or indirect subsidy from the other/s; or
- c) they have the same legal representative for purposes of this RFP; or
- d) they have a relationship with each other, directly or through common third parties, that puts them in a position to have access to information about, or influence on the Proposal of, another Proposer regarding this RFP process;
- e) they are subcontractors to each other's Proposal, or a subcontractor to one Proposal also submits another Proposal under its name as lead Proposer; or
- f) an expert proposed to be in the team of one Proposer participates in more than one Proposal received for this RFP process. This condition does not apply to subcontractors being included in more than one Proposal.

## **18. Documents Establishing the Eligibility and Qualifications of the Proposer**

The Proposer shall furnish documentary evidence of its status as an eligible and qualified vendor, using the forms provided under Section 5, Proposer Information Forms. In order to award a contract to a Proposer, its qualifications must be documented to UNDP's satisfaction. These include, but are not limited to, the following:

- a) That, in the case of a Proposer offering to supply goods under the Contract which the Proposer did not manufacture or otherwise produce, the Proposer has been duly authorized by the goods' manufacturer or producer to supply the goods in the country of final destination;
- b) That the Proposer has the financial, technical, and production capability necessary to perform the Contract; and
- c) That, to the best of the Proposer's knowledge, it is not included in the UN 1267/1989 List or the UN Ineligibility List, nor in any and all of UNDP's list of suspended and removed vendors.

## **19. Joint Venture, Consortium or Association**

If the Proposer is a group of legal entities that will form or have formed a joint venture, consortium or association at the time of the submission of the Proposal, they shall confirm in their Proposal that: (i) they have designated one party to act as a lead entity, duly vested with authority to legally bind the members of the joint venture jointly and severally, and this shall be duly evidenced by a duly notarized Agreement among the legal entities, which shall be submitted along with the Proposal; and (ii) if they are awarded the contract, the contract shall be entered into, by and between UNDP and the designated lead entity, who shall be acting for and on behalf of all the member entities comprising the joint venture.

After the Proposal has been submitted to UNDP, the lead entity identified to represent the joint venture shall not be altered without the prior written consent of UNDP. Furthermore, neither the lead entity nor the member entities of the joint venture can:

- a) Submit another proposal, either in its own capacity; nor
- b) As a lead entity or a member entity for another joint venture submitting another Proposal.

The description of the organization of the joint venture/consortium/association must clearly define the expected role of each of the entity in the joint venture in delivering the requirements of the RFP, both in the Proposal and the Joint Venture Agreement. All entities that comprise the joint venture shall be subject to the eligibility and qualification assessment by UNDP.

Where a joint venture is presenting its track record and experience in a similar undertaking as those required in the RFP, it should present such information in the following manner:

- a) Those that were undertaken together by the joint venture; and
- b) Those that were undertaken by the individual entities of the joint venture expected to be involved in the performance of the services defined in the RFP.

Previous contracts completed by individual experts working privately but who are permanently or were temporarily associated with any of the member firms cannot be claimed as the experience of the joint venture or those of its members, but should only be claimed by the individual experts themselves in their presentation of their individual credentials.

If a joint venture's Proposal is determined by UNDP as the most responsive Proposal that offers the best value for money, UNDP shall award the contract to the joint venture, in the name of its designated lead entity. The lead entity shall sign the contract for and on behalf of all other member entities.

## **20. Alternative Proposals**

Unless otherwise specified in the **Data Sheet** (DS nos. 5 and 6), alternative proposals shall not be considered. Where the conditions for its acceptance are met, or justifications are clearly established, UNDP reserves the right to award a contract based on an alternative proposal.

## **21. Validity Period**

Proposals shall remain valid for the period specified in the **Data Sheet** (DS no. 8), commencing on the submission deadline date also indicated in the **Data Sheet** (DS no. 21). A Proposal valid for a shorter period shall be immediately rejected by UNDP and rendered non-responsive.

In exceptional circumstances, prior to the expiration of the proposal validity period, UNDP may request Proposers to extend the period of validity of their Proposals. The request and the responses shall be made in writing, and shall be considered integral to the Proposal.

## **22. Proposer's Conference**

When appropriate, a proposer's conference will be conducted at the date, time and location specified in the **Data Sheet** (DS no. 7). All Proposers are encouraged to attend. Non-attendance, however, shall not result in disqualification of an interested Proposer. Minutes of the proposer's conference will be either posted on the UNDP website, or disseminated to the individual firms who have registered or expressed interest with the contract, whether or not they attended the conference. No verbal statement made during the conference shall modify the terms and conditions of the RFP unless such statement is specifically written in the Minutes of the Conference, or issued/posted as an amendment in the form of a Supplemental Information to the RFP.

# **D. SUBMISSION AND OPENING OF PROPOSALS**

## **23. Submission**

23.1 The Financial Proposal and the Technical Proposal Envelopes MUST BE COMPLETELY SEPARATE and each of them must be submitted sealed individually and clearly marked on the outside as either "TECHNICAL PROPOSAL" or "FINANCIAL PROPOSAL", as appropriate. 23.2 Proposers must submit their Proposals in the manner specified in the **Data Sheet** (DS nos. 22 and 23). When the Proposals are expected to be in transit for more than 24 hours, the Proposer must ensure that sufficient lead time has been provided in order to comply with UNDP's deadline for submission. UNDP shall indicate for its record that the official date and time of receiving the Proposal is the actual date and time when the said Proposal has physically arrived at the UNDP premises indicated in the **Data Sheet** (DS no. 20).

23.3 Proposers submitting Proposals by mail or by hand shall enclose the original and each copy of the

Proposal, in separate sealed envelopes, duly marking each of the envelopes as "Original Proposal" and "Copy of Proposal" as appropriate. The 2 envelopes shall then be sealed in an outer envelope. The number of copies required shall be as specified in the **Data Sheet** (DS No. 19). In the event of any discrepancy between the contents of the "Original Proposal" and the "Copy of Proposal", the contents of the original shall govern. The original version of the Proposal shall be signed or initialed by the Proposer or person(s) duly authorized to commit the Proposer on every page. The authorization shall be communicated through a document evidencing such authorization issued by the highest official of the firm, or a Power of Attorney, accompanying the Proposal.

23.4 Proposers must be aware that the mere act of submission of a Proposal, in and of itself, implies that the Proposer accepts the General Contract Terms and Conditions of UNDP as attached hereto as Section 11.

#### **24. Deadline for Submission of Proposals and Late Proposals**

Proposals must be received by UNDP at the address and no later than the date and time specified in the **Data Sheet** (DS nos. 20 and 21).

UNDP shall not consider any Proposal that arrives after the deadline for submission of Proposals. Any Proposal received by UNDP after the deadline for submission of Proposals shall be declared late, rejected, and returned unopened to the Proposer.

#### **25. Withdrawal, Substitution, and Modification of Proposals**

25.1 Proposers are expected to have sole responsibility for taking steps to carefully examine in detail the full consistency of its Proposals to the requirements of the RFP, keeping in mind that material deficiencies in providing information requested by UNDP, or lack clarity in the description of services to be provided, may result in the rejection of the Proposal. The Proposer shall assume the responsibility regarding erroneous interpretations or conclusions made by the Proposer in the course of understanding the RFP out of the set of information furnished by UNDP.

25.2 A Proposer may withdraw, substitute or modify its Proposal after it has been submitted by sending a written notice in accordance with Clause 23.1, duly signed by an authorized representative, and shall include a copy of the authorization (or a Power of Attorney). The corresponding substitution or modification of the Proposal must accompany the respective written notice. All notices must be received by UNDP prior to the deadline for submission and submitted in accordance with RFP Clause 23.1 (except that withdrawal notices do not require copies). The respective envelopes shall be clearly marked "WITHDRAWAL," "SUBSTITUTION," or "MODIFICATION".

25.3 Proposals requested to be withdrawn shall be returned unopened to the Proposers.

25.4 No Proposal may be withdrawn, substituted, or modified in the interval between the deadline for submission of Proposals and the expiration of the period of proposal validity specified by the Proposer on the Proposal Submission Form or any extension thereof.

#### **26. Proposal Opening**

UNDP will open the Proposals in the presence of an ad-hoc committee formed by UNDP of at least two (2) members. If electronic submission is permitted, any specific electronic proposal opening procedures shall be as specified in the **Data Sheet** (DS no. 23).

The Proposers' names, modifications, withdrawals, the condition of the envelope labels/seals, the number of folders/files and all other such other details as UNDP may consider appropriate, will be announced at the opening. No Proposal shall be rejected at the opening stage, except for late submission, for which the Proposal shall be returned unopened to the Proposer.

#### **27. Confidentiality**

Information relating to the examination, evaluation, and comparison of Proposals, and the recommendation of contract award, shall not be disclosed to Proposers or any other persons not officially concerned with such process, even after publication of the contract award.

Any effort by a Proposer to influence UNDP in the examination, evaluation and comparison of the Proposals or contract award decisions may, at UNDP's decision, result in the rejection of its Proposal.

In the event that a Proposer is unsuccessful, the Proposer may seek a meeting with UNDP for a debriefing. The purpose of the debriefing is discussing the strengths and weaknesses of the Proposer's submission, in order to assist the Proposer in improving the proposals presented to UNDP. The content of other proposals and how they compare to the Proposer's submission shall not be discussed.

## **E. EVALUATION OF PROPOSALS**

### **28. Preliminary Examination of Proposals**

UNDP shall examine the Proposals to determine whether they are complete with respect to minimum documentary requirements, whether the documents have been properly signed, whether or not the Proposer is in the UN Security Council 1267/1989 Committee's list of terrorists and terrorist financiers, and in UNDP's list of suspended and removed vendors, and whether the Proposals are generally in order, among other indicators that may be used at this stage. UNDP may reject any Proposal at this stage.

### **29. Evaluation of Proposals**

29.1 UNDP shall examine the Proposal to confirm that all terms and conditions under the UNDP General Terms and Conditions and Special Conditions have been accepted by the Proposer without any deviation or reservation.

29.2 The evaluation team shall review and evaluate the Technical Proposals on the basis of their responsiveness to the Terms of Reference and other documentation provided, applying the evaluation criteria, sub-criteria, and point system specified in the **Data Sheet** (DS no. 32). Each responsive Proposal will be given a technical score. A Proposal shall be rendered non-responsive at this stage if it does not substantially respond to the RFP particularly the demands of the Terms of Reference, which also means that it fails to achieve the minimum technical score indicated in the **Data Sheet** (DS no. 25). Absolutely no changes may be made by UNDP in the criteria, sub-criteria and point system indicated in the **Data Sheet** (DS no. 32) after all Proposals have been received.

29.3 In the second stage, only the Financial Proposals of those Proposers who achieve the minimum technical score will be opened for evaluation for comparison and review. The Financial Proposal Envelopes corresponding to Proposals that did not meet the minimum passing technical score shall be returned to the Proposer unopened. The overall evaluation score will be based either on a combination of the technical score and the financial offer, or the lowest evaluated financial proposal of the technically qualified Proposers. The evaluation method that applies for this RFP shall be as indicated in the **Data Sheet** (DS No. 25).

When the Data Sheet specifies a combined scoring method, the formula for the rating of the Proposals will be as follows:

Rating the Technical Proposal (TP):

$$\text{TP Rating} = (\text{Total Score Obtained by the Offer} / \text{Max. Obtainable Score for TP}) \times 100$$

Rating the Financial Proposal (FP):

$$\text{FP Rating} = (\text{Lowest Priced Offer} / \text{Price of the Offer Being Reviewed}) \times 100$$

Total Combined Score:

$$\begin{aligned} & (\text{TP Rating}) \times (\text{Weight of TP, e.g. 60\%}) \\ & + (\text{FP Rating}) \times (\text{Weight of FP, e.g., 40\%}) \end{aligned}$$

**Total Combined and Final Rating of the Proposal**

29.4 UNDP reserves the right to undertake a post-qualification exercise aimed at determining, to its satisfaction the validity of the information provided by the Proposer. Such post-qualification shall be fully documented and, among those that may be listed in the **Data Sheet** (DS No.33), may include, but need not be limited to, all or any combination of the following:

- a) Verification of accuracy, correctness and authenticity of information provided by the Proposer on the legal, technical and financial documents submitted;
- b) Validation of extent of compliance to the RFP requirements and evaluation criteria based on what has so far been found by the evaluation team;
- c) Inquiry and reference checking with Government entities with jurisdiction on the Proposer, or any other entity that may have done business with the Proposer;
- d) Inquiry and reference checking with other previous clients on the quality of performance on ongoing or previous contracts completed;
- e) Physical inspection of the Proposer's offices, branches or other places where business transpires, with or without notice to the Proposer;
- f) Quality assessment of ongoing and completed outputs, works and activities similar to the requirements of UNDP, where available; and
- g) Other means that UNDP may deem appropriate, at any stage within the selection process, prior to awarding the contract.

### **30. Clarification of Proposals**

To assist in the examination, evaluation and comparison of Proposals, UNDP may, at its discretion, ask any Proposer for a clarification of its Proposal.

UNDP's request for clarification and the response shall be in writing. Notwithstanding the written communication, no change in the prices or substance of the Proposal shall be sought, offered, or permitted, except to provide clarification, and confirm the correction of any arithmetic errors discovered by UNDP in the evaluation of the Proposals, in accordance with RFP Clause 32.

Any unsolicited clarification submitted by a Proposer in respect to its Proposal, which is not a response to a request by UNDP, shall not be considered during the review and evaluation of the Proposals.

### **31. Responsiveness of Proposal**

UNDP's determination of a Proposal's responsiveness will be based on the contents of the Proposal itself.

A substantially responsive Proposal is one that conforms to all the terms, conditions, TOR and other requirements of the RFP without material deviation, reservation, or omission.

If a Proposal is not substantially responsive, it shall be rejected by UNDP and may not subsequently be made responsive by the Proposer by correction of the material deviation, reservation, or omission.

### **32. Nonconformities, Reparable Errors and Omissions**

Provided that a Proposal is substantially responsive, UNDP may waive any non-conformities or omissions in the Proposal that, in the opinion of UNDP, do not constitute a material deviation.

Provided that a Proposal is substantially responsive, UNDP may request the Proposer to submit the necessary information or documentation, within a reasonable period of time, to rectify nonmaterial nonconformities or omissions in the Proposal related to documentation requirements. Such omission shall not be related to any aspect of the price of the Proposal. Failure of the Proposer to comply with the request may result in the rejection of its Proposal.

Provided that the Proposal is substantially responsive, UNDP shall correct arithmetical errors as follows:

- a) if there is a discrepancy between the unit price and the line item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line item total shall be corrected, unless in the opinion of UNDP there is an obvious misplacement of the decimal point in the unit price, in which case the line item total as quoted shall govern and the unit price shall be corrected;
- b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and
- c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail subject to the above.

If the Proposer does not accept the correction of errors made by UNDP, its Proposal shall be rejected.

## **F. AWARD OF CONTRACT**

### **33. Right to Accept, Reject, or Render Non-Responsive Any or All Proposals**

UNDP reserves the right to accept or reject any Proposal, to render any or all of the Proposals as non-responsive, and to reject all Proposals at any time prior to award of contract, without incurring any liability, or obligation to inform the affected Proposer(s) of the grounds for UNDP's action. Furthermore, UNDP shall not be obliged to award the contract to the lowest price offer.

UNDP shall also verify, and immediately reject their respective Proposal, if the Proposers are found to appear in the UN's Consolidated List of Individuals and Entities with Association to Terrorist Organizations, in the List of Vendors Suspended or Removed from the UN Secretariat Procurement Division Vendor Roster, the UN Ineligibility List, and other such lists that as may be established or recognized by UNDP policy on Vendor Sanctions.

(See [http://www.undp.org/content/undp/en/home/operations/procurement/procurement\\_protest/](http://www.undp.org/content/undp/en/home/operations/procurement/procurement_protest/) for details).

### **34. Award Criteria**

Prior to expiration of the period of proposal validity, UNDP shall award the contract to the qualified Proposer with the highest total score based on the evaluation method indicated in the **Data Sheet** (DS nos. 25 and 32).

### **35. Right to Vary Requirements at the Time of Award**

At the time of award of Contract, UNDP reserves the right to vary the quantity of services and/or goods, by up to a maximum twenty five per cent (25%) of the total offer, without any change in the unit price or other terms and conditions.

### **36. Contract Signature**

Within fifteen (15) days from the date of receipt of the Contract, the successful Proposer shall sign and date the Contract and return it to UNDP.

Failure of the successful Proposer to comply with the requirement of RFP Clause 35 and this provision shall constitute sufficient grounds for the annulment of the award, and forfeiture of the Proposal Security if any, and on which event, UNDP may award the Contract to the Proposer with the second highest rated Proposal, or call for new Proposals.

### **37. Performance Security**

A performance security, if required, shall be provided in the amount and form provided in Section 9 and by the deadline indicated in the **Data Sheet** (DS no. 14), as applicable. Where a Performance Security will be required, the submission of the said document, and the confirmation of its acceptance by UNDP, shall be a condition for the effectiveness of the Contract that will be signed by and between the successful Proposer and UNDP.

### **38. Bank Guarantee for Advanced Payment**

Except when the interests of UNDP so require, it is the UNDP's preference to make no advanced payment(s) on contracts (i.e., payments without having received any outputs). In the event that the Proposer requires an advanced payment upon contract signature, and if such request is duly accepted by UNDP, and the said advanced payment exceeds 20% of the total proposal price, or exceed the amount of USD 30,000, UNDP shall require the Proposer to submit a Bank Guarantee in the same amount as the advanced payment. A bank guarantee for advanced payment shall be furnished in the form provided in Section 10.

### **39. Vendor Protest**

UNDP's vendor protest procedure provides an opportunity for appeal to those persons or firms not awarded a purchase order or contract through a competitive procurement process. In the event that a

Proposer believes that it was not treated fairly, the following link provides further details regarding UNDP vendor protest procedures: <http://www.undp.org/procurement/protest.shtml>.

## Section 3: Terms of Reference (TOR)

### Development of the New Functionalities for the State Register of Voters

#### A. PROJECT TITLE

“Improving the Quality of Moldovan Democracy through Parliamentary and Electoral Support”  
(Democracy Programme/Electoral Component)

#### B. PROJECT DESCRIPTION

UNDP Moldova Democracy Programme/Elections (further referred as Programme) is a multiyear institutional development project that aims to support the institutional consolidation of the Central Electoral Commission (CEC) as well as the modernization of the Moldovan electoral process towards:

1. Improving the capacity of CEC to meet European gender and human rights standards and of the approved Strategic Development Plan of the CEC;
2. Improving the institutional environment for electoral management bodies that can deliver inclusive and modern electoral processes;
3. Improving the electoral and public registration process of the Republic of Moldova citizens with the right to vote.

#### C. BACKGROUND INFORMATION

In line with the legislation in force, one of the basic duties of CEC is to establish and maintain the State Register of Voters (SRV). This Register is necessary for all the electoral processes in the Republic of Moldova and serves as a key tool to provide a correct answer for the questions related to the identity and the right to vote of the voters in a certain constituency.

*The Law No. 101 dated 15.05.2008* stipulates the scope of this Register. The *Electoral Code of the Republic of Moldova* also mentions the need to develop and implement SRV, specifying explicitly the information content of SRV.

In compliance with the current legislation on registers, SRV was developed as a separate entity, which should share its resources with other information systems. Currently CEC has a first version of SRV, which was developed with the financial support provided by UNDP Moldova during 2014, allowing the settlement of a number of current problems.

CEC has all the necessary soft sources for further development of SRV for implementing its operation objectives, such as:

- automated update of SRV content based on the information received from the external sources of information (State Register of Population, Local Public Authorities, Central Public Authorities, citizens);
- increasing the accuracy and reliability of the data received from external sources and automated integration of such data on the State Register of Voters;
- implementing automated procedures for primary validation and verification of the information taken over from external data sources before the update procedure of SRV;
- decreasing the necessary time and the laboriousness of the process to enhance and update the data related to voters in the Republic of Moldova;
- ensuring traceability of voters by keeping the history of changes made to data on identity, residence and ID documents held by the voters;
- implementing the official classifiers of the Republic of Moldova (Classifier of Administrative-Territorial Units of Moldova (CATUM), State Register of Addresses) for providing interoperability of CEC's IT subsystems with the external IT systems in the Republic of Moldova;
- eliminating multiple voting by future integration of the subsystems for monitoring the voting process or by excluding the use in voting the cancelled, false or expired ID documents;
- ensuring premises for implementing in long term perspective the electronic voting based on the digital identity of the RM citizens (digital certificate or mobile signature).

In this regard, six groups of development and assistance activities are envisaged, as follows:

**Activity 1. To improve the processing data from the State Register of Population (SRP).** This activity implies the optimization and improvement procedures of the data imported from SRP to SRV.

**Activity 2. To develop a mechanism for taking over the data from external sources.** This activity implies the development of a universal mechanism for taking over and processing data from external sources for updating the data collection of SRV.

**Activity 3. To develop Voter's profile.** This activity implies the development of such mechanism, which will allow the access to the voter's data that should substantially improve the web interface.

**Activity 4. To implement the CEC interoperability framework.** This activity will imply adaptation of the common metadata set to SRV (in regards to the State Automated Information System – Elections (SAISE) administration module) and also implementation of the interoperability mechanisms delivered by SAISE (authentication, authorization, notification and logging).

**Activity 5. To develop services for SRV interaction with third IT applications.** This activity implies the development of some web services meant for SRV interaction with external IT systems (both, from within and outside CEC). SRV will supply a sufficient set of necessary services for integration with the potentially developed information systems of CEC.

**Activity 6. To provide adaptive maintenance services for the State Register of Voters (warranty period).** It implies the totality of activities to maintain and adjust SRV during the warranty period after the end of development works.

## **D. SCOPE OF SERVICES, EXPECTED OUTPUTS AND TARGET COMPLETION**

### **D.1. Roles and responsibilities**

Contractor's responsibilities are:

- to develop the additional functionalities of SRV specified in the specified activities;
- to adjust the totality of technical and users' documentation related to SRV in line with the changes made in the specified activities;
- to perform the activity tests and the eventual corrections related to the changes made to SRV in specified activities;
- to train CEC to use the newly implemented functionalities according to the specified activities;
- to ensure warranty and adaptive maintenance for SRV during the warranty period.
- CEC and UNDP responsibilities are:
  - Provide/support infrastructure;
  - Provide requirements, user stories and access to analysts for implementation questions; Providing support for the team on specific questions regarding system functionality;
  - Provide System Architecture / Guidelines or preferences in implementation patterns;
  - Review of contractor proposed solutions/estimates for further acceptance or correction;
  - Project management and coordination (participate in the communication, project decisions and review / approve project key documents on time).

### **D.2. Platform for developing an operation of SRV**

To perform SRV development activities, SRV source code will be taken as basis and the development and operation software platform will be used, including:

- Windows Server 2012;
- MS SQL Server 2012;
- SSRS;
- IIS 7.0;
- ASP .NET;
- TFS 2012.

### **D.3. Peculiarities for carrying out SRV improvement activities:**

#### **Activity 1: To improve the processing data from the State Register of Population**

Reviewing the experience accumulated during the operation of the current version of the State Register of Voters and the interaction with the web-service provided by the S.E. "SIRC Regstru", it may be concluded that for ensuring the subsequent success of SRV operation, it is important to carry out some additional developments.

FR 01.01. The developer, jointly with CEC and UNDP consultants, will participate in activities for requesting changes in SRP data collection service to improve import processes and ensure the accuracy of imported data.

FR 01.02. The developer will carry out all the activities to adjust SRP data import module to the new service provided by the State Enterprise "SIRC Regstru".

FR 01.03. Investigation and improvement of the logic of conflict occurrence on importing the data from SRP to SRV. The aim is to decrease the number of conflicts which appear after the processing (importing) the data from SRP.

FR 01.04. During the process of improvement of the Importer module by State Enterprise "SIRC Regstru" solve of the potential software problems (at the database level, application server etc.) which could affect the performance of SRV interaction with SRP.

FR 01.05. Removal of the automatic interrogation methods from SRV interface, in case of opening the electoral list module of SRV, or when defining the filtering parameters. The interrogation should not occur automatically on opening the interface or on completion of the filtering parameters of the electoral list. It should be opened only after some certain presets i.e.: click on some button or predefined key (Enter).

FR 01.06. The system will notify the registrar on conflict resolution through the centralized notification system (managed through SAISE administration module).

FR 01.07. Improvement of "Declaration of staying" (Declarații de ședere) functionality of the SRV. At the moment this functionality is not able to auto-eradicate the past declarations (according to the legal framework). The system should provide the possibility to automatize the eradication of those, by the administrator of the SRV.

FR 01.08. Elaboration of the functionality that allow the creation of the Certificates with the right to vote. This functionality should have same technical functions as the Declaration of staying functionality (creation by the SRV users, count, search, cancel etc.).

### **Activity 2: To develop a mechanism for taking over data from external sources**

This activity implies the implementation of a universal mechanism meant for processing the data taken from external sources, so as to update the data collection managed by SRV. Currently, the following external data sources were identified:

- *Ministry of Justice.* External source ensuring the possibility to receive data on persons who are temporarily deprived of the right to vote, including those who vote on the territory of the penitentiary institutions. Also, all relevant data affecting the right to be elected will be collected.

- *Ministry of Internal affairs.* External source ensuring the possibility to receive the data about the persons enrolled in carabineer troops, detainees and those voting outside their place of residence. Also, all relevant data affecting the right to be elected will be collected.

- *Ministry of Defence.* External source ensuring the possibility to receive the data about the people enrolled in the army (those who vote within the military units).

- *Ministry of Foreign Affairs.* External source ensuring the possibility to receive the data about the voters of the RM who is registered at the Diplomatic Missions or at the Consular Offices of RM established with permanent or temporary residence abroad..

- *Ministry of Labour, Social Protection and Family.* External source ensuring the possibility to receive data about the persons with disabilities.

- *Ministry of Health.* External source ensuring the possibility to receive the data about the persons in hospitals or in the spa institutions.

Currently, the functionality of SRV interaction with the State Register of Population is being implemented and it is fulfilled through automated interaction with the State Register of Population via its exposed service.

For the other 6 categories of external IT systems, it is not insisted on developing an Importer

application according to the model of interaction with the State Register of Population. But rather the implementation of a universal mechanism for taking over and subsequently processing the data (the appearance of additional data sources is not excluded).

Hence, it is necessary to reengineer the mechanism of updating SRV database by implementing a buffer zone storing all the candidate-transactions to update SRV database based on designing of the data structures which will store all of the transaction data types, meant to update SRV.

The strategy for inserting the transactions to update SRV database in the buffer zone depends on CEC preferences (Importer program or external file). Nevertheless, SRV shall contain a mechanism to insert the transactions of updating SRV database via a standardized external file.

It should be mentioned that SRV will provide 2 regimes for processing the transactions for SRV updating: automated (launched through Jobs, or upon request, processing without any restriction the entire set of candidate-transactions) and assisted (where Registrar's decision will be asked for each updating transaction).

To implement the mechanism for updating SRV database content with data from external sources, the following functional requirements shall be taken into account:

FR 02.01. SRV will contain a buffer zone meant to store the totality of transactions to update SRV database.

FR 02.02. SRV will supply a mechanism for inserting the data in the buffer zone via a standardized XLS or CSV file.

FR 02.03. The data structures of the buffer zone will allow inserting any transaction supplied by any external data source, defining:

- insertion of a new voter;
- changes in voter's identity;
- changes in voter's ID documents;
- changes in appointing a voter to a specific polling station or geographic location of relevant polling stations;
- changes on persons with disabilities;
- changes in the right to elect (death, deprivation of the right to vote, etc.).

FR 02.04. SRV will provide a WEB service to insert in the buffer zone the transactions for updating the DB (subject to be used subsequently by Importer programs for automated update of data) and will demonstrate its functionality in case of the Importer from the State Register of Population.

FR 02.05. SRV will normalize the entries' identifiers when inserting in the buffer zone based on the correspondence tables with the identifiers of SRV mandates.

FR 02.06. SRV will allow the configuration of external data sources from which the updates will be received and the rules for processing them (the identifier of the external data source related to the transaction of database update will be configured, as well as the mechanism of transactions' processing: automated or assisted).

FR 02.07. SRV will provide the functionality to process the technological DB with all the requests for updating DB under production, regardless of the mechanism used for their processing: automated or assisted.

FR 02.08. SRV will perform a primary admissibility check of the update requests contained in the buffer zone and will provide a mechanism for viewing and subsequently processing the inadmissible transactions (e.g.: with wrong format or incompatible metadata).

FR 02.09. SRV will apply all the updates from the technological DB for the requests considered to be fully safe, changing automatically the status of entries after processing (for transactions where the provider was defined with the automated mechanism of updates' processing).

FR 02.10. SRV will provide an interface for analyzing the automatically operated updates.

FR 02.11. SRV will insert a status for the transaction when operating the automated updates (to exclude repeated procession).

FR 02.12. SRV will provide an interface to process the entries of the technological DB in status of assisted updating (processing of each update transaction of SRV stored in the buffer zone, authorized by the Registrar, via some user interface).

FR 02.13. The set of updating transactions in assisted status will be submitted to the Registrars depending on their rights and roles.

FR 02.14. SRV will provide suggestion for starting the action of processing the entry in the

technological DB (in conjunction with the data source configuration).

FR 02.15. The registrar will be able to act with 3 categories of strategies for assisted processing of entries in the technological DB: update approval, update refusal, update ignoring.

FR 02.16. SRV will change the status of approved or refused update transactions for excluding their procession at the next launch of the assisted update procedure.

FR 02.17. When conflicts appear when processing DB update transactions in automated or assisted status, they should be settled via the mechanism of conflict settlement currently implemented in SRV.

FR 02.18. The set of update transactions which end in conflicts will be presented to the registrars to be settled depending on their rights and roles.

FR 02.19. SRV will log all the transactions for updating the DB under production.

### **Activity 3: To develop Voter's profile**

Although SRV has some functionalities of viewing voter details, SRV does not provide an overview of the voter for a quick access to or update of relevant information. To this effect, the registrar should access various functionalities from the menu.

To enable this, an option (voter profile) should be implemented, which would summarize all the information about the voters (ID, data on voting prohibitions, data on voter's addresses, data on polling stations where the voter was assigned, data on statements of residence, data about voting certificates, data regarding disabilities) and would allow quick access to such data.

To this effect, the following functional requirements should be implemented:

FR 03.1. SRV will provide a functionality for viewing the voter profile with the following data:

- identification data (IDNP, last name, first name, father's name, date of birth, sex, address, status, age, disabilities, etc.);
- data about all voting prohibitions and elections when such prohibitions were imposed;
- data about all addresses owned and period of validity;
- data about all statements of residence submitted by the voter;
- data about all voting certificates requested by the voter;
- data about polling stations where the voter was assigned and date of assignment.

FR 03.2. For all types of data submitted, SRV will provide hypertext references to access their details (where possible) so that they can be viewed or changed.

FR 03.3. The voter profile will allow to access the voter list, filtered by voter metadata (e.g. while accessing voter street information, the list of all voters on that street from the respective locality will be displayed, while accessing information about the building – all voters in that building will be displayed etc.).

FR 03.4. The functionality of viewing the voter profile will be available from any list of voters.

FR 03.5. SRV will provide a functionality for defining the right of access to the voter profile based on the user role.

FR 03.6. SRV will provide a functionality for exporting the voter profile to a file (a report for viewing or printing).

FR 03.7. SRV will log all the voter profile viewing and printing events.

### **Activity 4: To implement the CEC interoperability framework**

This activity will enable the development of SRV as an application with SOA architecture that will reuse services exposed by other CEC applications and will provide, in its turn, functionalities and data for other CEC applications.

It also involves a series of development activities required to adapt SRV to new visions for improving SAISE. To this effect, the following functional requirements will be implemented:

FR 04.01. Developer will perform all activities for the implementation of unified metadata managed through SAISE administration interface. SRV will retrieve these metadata and will take account of any changes thereto.

FR 04.02. SRV will provide SAISE administration interface with a validation service for metadata suppression procedure (implementing a mechanism that will not allow the suppression or reorganization of metadata, if it affects the operation of SRV).

FR 04.03. Developer will develop a patch for the current SRV database to implement the unified set of metadata managed through SAISE administration interface.

FR 04.04. SRV will implement and use the unified authentication mechanism managed through SAISE administration interface (access credentials can be managed only through SAISE administration interface).

FR 04.05. SRV will implement and use the unified authorization mechanism managed through SAISE administration interface (access roles and rights can be managed only through SAISE administration interface).

FR 04.06. SRV will implement and use the unified notification mechanism managed through SAISE administration interface (notification service will be used by all CEC applications and relevant users will receive notifications through a single interface, regardless of the application that generated the notification).

FR 04.07. SRV will implement and use the unified logging mechanism managed through SAISE administration interface (logging service will be used by all CEC applications and all logs will be viewed and managed through a single interface).

#### **Activity 5: To develop services for SRV interaction with other IT systems**

The State Register of Voters will serve as an information source for digitizing most of the electoral process. Hence, it is necessary for SRV to interact with other IT systems.

As the direct access of third IT applications (including from CEC) to SRV database is not welcome, it is timely to develop a WEB service to meet the following functional requirements:

FR 05.1. To access the WEB service provided by SRV, the third IT systems will log on via a digital certificate or user+password+IP address.

FR 05.2. The WEB service provided by SRV will allow formulation of search interrogations according to the following parameters:

- voter's IDNP code;
- locality identifier;
- street identifier;
- address identifier;
- polling station identifier;
- combined identifiers (e.g.: locality code + alive voter identifier).

FR 05.3 As a result of the parameters delivered to WEB service, it will return the voter's details meeting the parameters (total voters' registration data) or the YES/NO answer (e.g.: the voter with the specific IDNP may vote under a certain polling station, the voter with the specific IDNP is alive, etc.).

FR 05.4 The services provided by SRV will allow supplying a group of entries per one single interrogation (e.g.: Voter list with relevant identifying data).

FR 05.5 During the adaptive maintenance period, CEC will provide the total parameters based on which SRV will be interrogated via the WEB service exposed by SRV.

FR 05.6 SRV will expose the WEB service meant for processing the Voter list with conflict status to the Civil Status Office.

FR 05.7 SRV will expose the WEB service meant for updating the metadata system to the third authorized IT applications (taking over the updated SRV classifiers and nomenclatures).

#### **Activity 6: To provide adaptive maintenance services for the State Register of Voters (warranty period)**

Taking into account the exploitation experience of SRV during the elections on 30.11.2014, 14.06.2015 and 28.06.2015, it may be concluded that during its operation, after entering the changes, some errors may occur, which would need adjustments during the warranty period for the respective product.

As a consequence, it is necessary to provide some adaptive maintenance services for the State Register of Voters, which will cover the following activities:

SMA001. To correct all the errors and problems identified during the operation of the State Register of Voters (including the ones generated by the current version of SRV).

SMA002. To conduct periodically the performance analysis of SRV database interrogation for optimizing purposes (ensuring an acceptable response speed of SRV by optimizing the interrogations, the undecided, and adjustment of the interface).

SMA003. To assist the Central Election Commission in operating the State Register of Voters and solving some eventual problems.

SMA004. Assurance of the 30 man/days to perform adjustments and changes in the functional modules of SRV, upon the documented request of the Central Election Commission.

SMA005. To identify and recommend some additional activities to develop SRV so as to increase its performance.

#### **E. MANAGEMENT ARRANGEMENT**

The contractor will work under the guidance of Directorate of Information Technology and Management of Electoral Lists, Central Electoral Commission of the RM and in close cooperation with UNDP Democracy Programme/Electoral Component for both substantive and administrative aspects of the assignment and under the direct supervision of the Electoral Specialist and Democracy Programme/Elections Senior Project Officer.

All discussions with the beneficiaries of the project will be conducted in Romanian. All the relevant documentation, information solution interface and training and technical support will be conducted in Romanian. All staff involved in the project that will interact directly with the beneficiary must perfectly speak Romanian.

#### **F. KEY DELIVERABLES OF THE WORK**

The final product is composed of software artefacts, system documentation, and knowledge transfer to the holder and the system administrator.

The system's artefacts include:

- Complete source code of the modules and components necessary for the compilation of the delivered software product;
- Final product packaged for easy installation in the proposed technological environment;

- After putting the system into production the following is necessary:
- Post implementation technical support for a period of 9 months, including corrective, adaptive and preventive maintenance in accordance with the ISO / IEC 14764.

#### **G. ACTIVITY TIMEFRAME**

Taking into account the existing technological restrictions, the activities 1-5 may be implemented gradually over the following calendar period:

- Activity 1. 2 months (October - November 2015)
- Activity 2. 1 month (November 2015)
- Activity 3. 2 months (December 2015 – January 2016)

---

The Proposer is required to prepare the Financial Proposal in an envelope separate from the rest of the RFP as indicated in the Instruction to Proposers.

The Financial Proposal must provide a detailed cost breakdown. Provide separate figures for each functional grouping or category.

Any estimates for cost-reimbursable items, such as travel and out-of-pocket expenses, should be listed separately.

In case of an equipment component to the service provider, the Price Schedule should include figures for both purchase and lease/rent options. UNDP reserves the option to either lease/rent or purchase outright the equipment through the Contractor.

The format shown on the following pages is suggested for use as a guide in preparing the Financial Proposal. The format includes specific expenditures, which may or may not be required or applicable but are indicated to serve as examples.

### A. Cost Breakdown per Deliverables\*
