

## **Amendment No.1**

### **Request for Proposal (RFP) for the Provision of Price Analysis Services Ref. UNDP-SYR-RFP-059-16 / Re-Advertise**

This Amendment has been raised to answer clarifications raised by suppliers:

**Q1) This is a re-advertisement of the notice previously published on August 7. It appears to us the RFP content and requirements are unchanged. Can UNDP confirm that this is the case?**

A1) Confirmed

**Q2) Reference item 5 of the ToR within the RFP document. Can UNDP confirm will the 'list of spare parts and OEM offer' be sufficiently detailed and specific (i.e. with part numbers, equipment serial numbers, etc) to allow the contractor to check prices with alternative vendors in Japan and (possibly) elsewhere?**

A2) Confirmed

**Q3) A two week period is allowed for the assignment. Given (a) how slow it can sometimes be to get firm prices from vendors and (b) noting that no indication is given of the number of spare parts to be price checked and (c) their type (i.e. generic spares or specialist items), how can we commit ourselves to the two week schedule allowance? Can UNDP provide some clarity on this?**

A3) Attached the list of required spare parts. UNDP will share the OEM (MHPS) prices with full details with the successful bidder.
