

Questions and Answers

RFQ 036/16 Supply of Farm Houses

Q1: Are there any further pictures or information that you can provide to give us a better indication of what to look for?

A1: We are unable to provide a sample picture, as it can be affiliated to a specific manufacturer. In general – it shall be a mobile shelter(s) for farmers/shepherds to be relocated to remote pastureland in highland area during the summer grazing period and relocated back to the rural settlement for winter period. It has to have somehow separated bedroom area, kitchen corner and shower room. It also has to be equipped with some fitment and accessories. All the technical details/requirements are in the Technical Specification. Some producers have it ready for shipment while some others assemble it upon request. Normally the shelters for shepherds are either stationary or mobile. Our choice is to have mobile shelters.
