Subject: Amendment Nr.2 to 2016-21-RFP- Provision of Key Plaza Lobby Physical Security Upgrades

Dear Sir/Madam,

Please be informed that, further to inquiries from prospective Offerors, we are sending both the clarification request received and the respective UNDP response to all prospective Offerors and posting on relevant procurement websites.

No:	Question	Answers
1	We would like to know the brand of current card entry system due to integration purposes, if card entry system is required for counter area entrance.	The bulletproof doors don't need be connected to the card entry system.
2	We propose to change existing counter with a new one as armoring process will be much easier and better by this way. Is this acceptable for you or do you strictly want to keep the existing counter by armoring it with any other method?	Please quote both option; so we can decide based on the design/price.
3	As per Amendment-1, number of doors are stated as 1 (one) while we discussed it as 2 (two) during our site visit. If only one door is required, could you please tell us which side of counter is going to have an entrance? (Long side or short side)	Short side.
4	We have doubts about fire rating of counter system. As long as the counter consists of wood, there will be no way to provide a truly fire protection for the whole system. Can you please clarify this issue?	The specification/requirement relates for the metal bulletproof door (therefore designed and built for protection in an event of fire, burglary and/or ballistic attack).

Yours Sincerely,
