

## **Pre-Bid Meeting Minutes**

### **INVITATION TO BID**

**ITB/01-10/2016**

#### **Supply of submersible water pumps**

**Date: 21 octobe 2016**

A skype pre-bid meeting was held on 21<sup>st</sup> October 2016 at 12:00 hrs. A detailed explanation was given on the ITB process, required documents to be submitted by the company to provide him with clear understanding of the process and documents to submit. Following participant attended the meeting:

<b>Participants Name</b>	<b>Organiztaion</b>
Mr John Phlan	Green Park Engineering Ltd/UK

<b>1. Question:</b>	Delivery term in the ITP is DAP. Can't we deliver at Benghazi sea port due to difficulties to deliver in Benghazi town? Don't you think this should be the best and cheaper option for you? Because additional cost will be involved for the ground transportation?
<b>Response:</b>	As per ITB requirements, pumps need to be delivered to the final destination by the company.  Accordingly, Benghazi port is not an option.
<b>2. Question:</b>	We guess the existing pump are old ones and old models since they exist for a long time. Can we propose new models? We will send a detailed question about this by email after discussion with our technician. And all other technical questions will be sent to you by Monday or Tuesday next week.
<b>Response:</b>	Offered pumps need to be as per technical specification requested. If the pumps, you are planning to offer, comply to ITB technical specs, they will be technically compliant and further evaluated.
