Request for Proposal (RFP)

Development of GIS Data Portal for Ministry of Environment

The Clarification Note to Bidder's queries No.1

Process Number No: 9889

Reference to the above RFP, UNDP has received the below queries from bidder and we would like to share the clarification as below:

No.	Questions	Answers
1	As it is required to provide a cloud based solution, has a cloud provider been selected? If so, is it possible to get that information? If not, is it possible for the bidder to suggest and include cloud platform components in their architecture, such as Amazon Elastic Load Balancer or hosted database?	A cloud provider has not been identified. Bidder could suggest a provider based on cost, maintainability and ease of migration.
2	Is a GPL3 license acceptable for the open source portal?	Any open source license is acceptable to create a well-functioning product.
3	Is there a requirement for multi-language support in the portal?	Yes. Bi-lingual support is required since locals (Khmer) and internationals (English) will use the service.
4	Do you have any existing contracting resources working on similar projects?	This is essentially a new setup
5	Can you let me know whether this bid is just for the local consultancy services or international as well.	The bid is opened for Local and International bidders.
