Subject: RE: Question - Development of a Performance Management System for Street Cleaning and Waste Management Services in 23 Municipalities of Georgia

Dear Nino,

Thank you for your question.

There will be no need for technical support in implementing the e-tool, however the company should be ready to provide any clarifications needed for the implementation of the e-tool, should MSDA request it.

As for the RFP, the returnable bidding forms are already uploaded in the e-tendering system in the word format.

Please be informed that, as per RFP, direct communication with prospective Proposers by e-mail is published as supplemental information.

Respectfully,
Tinatin

Subject: Question - Development of a Performance Management System for Street Cleaning and Waste Management Services in 23 Municipalities of Georgia

Dear Tinatin,

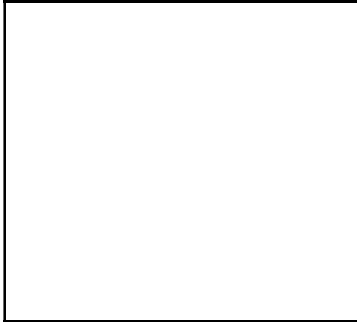

In the framework of the project “Development of a Performance Management System for Street Cleaning and Waste Management Services in 23 Municipalities of Georgia”, according to the ToR, consulting company is required to develop analytical module and e-tool will be elaborated by MSDA. We are interested if there is a need of implementation support from our side or will it fully be the responsibility of MSDA?

I would have one additional request to you – could you please send me an editable version of the proposal?

Thank you in advance,

Nino
