Q13: GDS – During the pre-tender meeting you advised that the GDS access is primarily used to check the competitiveness of flights. Is the requirement ‘Native GDS’ access or will standard 3rd party access be sufficient?

A13: The GDS is also used in some cases by UN agencies to establish the lump sum to provide the staff member for some entitlements (ex. Home leave). Since UN agencies are not issuing tickets standard third party is sufficient.

Q14: The RFP advises that each agency will pay for their GDS access, however the pricing schedule doesn’t include a ‘cost’ for us to input. Please can you confirm how we should ‘price’ for the set-up of this option?

A14: Thank you for your observation. Please include annual fee proposal separately in your financial proposals.
