Preliminary Examination	28.1	UNDP shall examine the Proposals to determine whether they are complete with respect to minimum documentary requirements, whether the documents have been properly signed, and whether the Proposals are generally in order, among other indicators that may be used at this stage. UNDP reserves the right to reject any Proposal at this stage.
29. Evaluation of Eligibility and Qualification	29.1	Eligibility and Qualification of the Bidder will be evaluated against the Minimum Eligibility/Qualification requirements specified in the Section 4 (Evaluation Criteria).
	29.2	In general terms, vendors that meet the following criteria may be considered qualified: a) They are not included in the UN Security Council 1267/1989 Committee's list of terrorists and terrorist financiers, and in UNDP's ineligible vendors' list;

		<ul style="list-style-type: none"> b) They have a good financial standing and have access to adequate financial resources to perform the contract and all existing commercial commitments, c) They have the necessary similar experience, technical expertise, production capacity where applicable, quality certifications, quality assurance procedures and other resources applicable to the provision of the services required; d) They are able to comply fully with UNDP General Terms and Conditions of Contract; e) They do not have a consistent history of court/arbitral award decisions against the Bidder; and f) They have a record of timely and satisfactory performance with their clients.
30. Evaluation of Technical and Financial Proposals	<p>30.1 The evaluation team shall review and evaluate the Technical Proposals on the basis of their responsiveness to the Terms of Reference and other RFP documents, applying the evaluation criteria, sub-criteria, and point system specified in the Section 4 (Evaluation Criteria). A Proposal shall be rendered non-responsive at the technical evaluation stage if it fails to achieve the minimum technical score indicated in the BDS. When necessary and if stated in the BDS, UNDP may invite technically responsive bidders for a presentation related to their technical proposals. The conditions for the presentation shall be provided in the bid document where required.</p> <p>30.2 In the second stage, only the Financial Proposals of those Bidders who achieve the minimum technical score will be opened for evaluation. The Financial Proposals corresponding to Technical Proposals that were rendered non-responsive shall remain unopened, and, in the case of manual submission, be returned to the Bidder unopened. For emailed Proposals and e-tendering submissions, UNDP will not request for the password of the Financial Proposals of bidders whose Technical Proposal were found not responsive.</p> <p>30.3 The evaluation method that applies for this RFP shall be as indicated in the BDS, which may be either of two (2) possible methods, as follows: (a) the lowest priced method which selects the lowest evaluated financial proposal of the technically responsive Bidders; or (b) the combined scoring method which will be based on a combination of the technical and financial score.</p> <p>30.4 When the BDS specifies a combined scoring method, the formula for the rating of the Proposals will be as follows:</p> <div style="border: 1px solid black; padding: 10px; margin-top: 10px;"> <p><u>Rating the Technical Proposal (TP):</u></p> <p>TP Rating = (Total Score Obtained by the Offer / Max. Obtainable Score for TP) x 100</p> <p><u>Rating the Financial Proposal (FP):</u></p> <p>FP Rating = (Lowest Priced Offer / Price of the Offer Being Reviewed) x 100</p> <p><u>Total Combined Score:</u></p> <p>Combined Score = (TP Rating) x (Weight of TP, e.g. 60%) + (FP Rating) x (Weight of FP, e.g., 40%)</p> </div>	
31. Due Diligence	31.1 UNDP reserves the right to undertake a due diligence exercise, also called post qualification, aimed at determining to its satisfaction, the validity of the information provided by the Bidder. Such exercise shall be fully documented and may include, but need not be limited to, all or any combination of the following:	

		<ul style="list-style-type: none"> a) Verification of accuracy, correctness and authenticity of information provided by the Bidder; b) Validation of extent of compliance to the RFP requirements and evaluation criteria based on what has so far been found by the evaluation team; c) Inquiry and reference checking with Government entities with jurisdiction on the Bidder, or with previous clients, or any other entity that may have done business with the Bidder; d) Inquiry and reference checking with previous clients on the performance on on-going or contracts completed, including physical inspections of previous works, as necessary; e) Physical inspection of the Bidder's offices, branches or other places where business transpires, with or without notice to the Bidder; f) Other means that UNDP may deem appropriate, at any stage within the selection process, prior to awarding the contract.
32. Clarification of Proposals	<p>32.1 To assist in the examination, evaluation and comparison of Proposals, UNDP may, at its discretion, ask any Bidder for a clarification of its Proposal.</p> <p>32.2 UNDP's request for clarification and the response shall be in writing and no change in the prices or substance of the Proposal shall be sought, offered, or permitted, except to provide clarification, and confirm the correction of any arithmetic errors discovered by UNDP in the evaluation of the Proposals, in accordance with RFP.</p> <p>32.3 Any unsolicited clarification submitted by a Bidder in respect to its Proposal, which is not a response to a request by UNDP, shall not be considered during the review and evaluation of the Proposals.</p>	
33. Responsiveness of Proposal	<p>33.1 UNDP's determination of a Proposal's responsiveness will be based on the contents of the Proposal itself. A substantially responsive Proposal is one that conforms to all the terms, conditions, TOR and other requirements of the RFP without material deviation, reservation, or omission.</p> <p>33.2 If a Proposal is not substantially responsive, it shall be rejected by UNDP and may not subsequently be made responsive by the Bidder by correction of the material deviation, reservation, or omission.</p>	
34. Nonconformities, Repairable Errors and Omissions	<p>34.1 Provided that a Proposal is substantially responsive, UNDP may waive any non-conformities or omissions in the Proposal that, in the opinion of UNDP, do not constitute a material deviation.</p> <p>34.2 UNDP may request the Bidder to submit the necessary information or documentation, within a reasonable period of time, to rectify nonmaterial nonconformities or omissions in the Proposal related to documentation requirements. Such omission shall not be related to any aspect of the price of the Proposal. Failure of the Bidder to comply with the request may result in the rejection of its Proposal.</p> <p>34.3 For Financial Proposal that has been opened, UNDP shall check and correct arithmetical errors as follows:</p> <ul style="list-style-type: none"> a) if there is a discrepancy between the unit price and the line item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line item total shall be corrected, unless in the opinion of UNDP there is an obvious misplacement of the decimal point in the unit price; in which case the line item total as quoted shall govern and the unit price shall be corrected; b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related 	

		to an arithmetic error, in which case the amount in figures shall prevail.
	34.4	If the Bidder does not accept the correction of errors made by UNDP, its Proposal shall be rejected.
E. AWARD OF CONTRACT		
35.Right to Accept, Reject, Any or All Proposals	35.1	UNDP reserves the right to accept or reject any Proposal, to render any or all of the Proposals as non-responsive, and to reject all Proposals at any time prior to award of contract, without incurring any liability, or obligation to inform the affected Bidder(s) of the grounds for UNDP's action. Feasibility study of reprocessing mercury-containing tailing

I. Background Information

Worldwide ASGM is the largest global source of anthropogenic mercury releases into the environment (35%). Mercury can travel long distances, contributing to global mercury pollution and contaminating the world's ecosystems and fisheries. Exposure to mercury may cause serious health problems, and it is a particular threat to the development of the child in utero and early in life. Phasing-out mercury from the ASGM sector is therefore of the utmost importance, however ASGM is a very important source of jobs and livelihoods. ASGM accounts for about 17-20% of the world's annual gold production with 15 million people directly participating in ASGM activities and another 100 million depending on ASGM for their livelihoods.

The objective of the project is to reduce/eliminate mercury releases from the Indonesian Artisanal and Small-scale Gold Mining (ASGM) sector by (i) Strengthening institutions and the policy/regulatory framework for mercury-free ASGM; (ii) Increasing the access of mining communities to finance to enable the procurement of mercury-free processing technologies; (iii) Increasing the capacity of mining communities for mercury-free ASGM through the provision of technical assistance, technology transfer and support for formalization; and, (iv) raising awareness and disseminating best practices and lessons-learned on mercury phase-out in the ASGM sector.

The project will support 6 ASGM communities (Yogyakarta, Nusa Tenggara Barat, Gorontalo, Sulawesi Utara, Maluku Utara and Riau) in Indonesia to reduce mercury use by at least 5 metric tonnes/year starting in year three (3) of the project, which over the life-span of the project will result in a mercury release reduction of at least 15 tonnes.

Mercury containing legacy tailings present a long term environmental and human health risk from mercury releases, acid generation and potential storage failures. Yet such tailings can also be a resource as they can contain considerable concentrations of gold. The project will therefore undertake a feasibility study to assess the potential for the removal of mercury from tailings which lead to a reduction in environmental risks from unsound tailings disposal (by trucking away tailings and ultimately extracting remaining gold concentrations).

II. Objectives of the Program

1. To conduct baseline amalgamation tailing characteristics
2. To develop technique for amalgamation tailing reprocessing plant
3. To provide Detailed Engineering Design (DED) of most appropriate technique
4. To identify a permitting requirement for long term installation of the 1 pilot plant

III. Expected Outputs

1. A review of existing technique options for reprocessing mercury-containing amalgamation tailings
2. Collect baseline data on the properties of ASGM's amalgamation tailings at Sekotong; and define the most suitable amalgamation tailings reprocessing technique based on tailings properties and the engineering requirements of the various tailings reprocessing technique.
3. An approved technique of reprocessing mercury-containing amalgamation tailings
4. A review impact of mercury in the tailings on gold recovery
5. A report on the economic feasibility of tailings reprocessing
6. A Detailed Engineering Designs (DED) of approved technique

IV. Scope of Work

The scope of works are as follow:

Scope of Work 1: Desk review and technique development

- a. Review and summarize existing national and international technique options for reprocessing mercury-containing amalgamation tailing which is "the tailing from amalgamation gold process".
- b. Review available data on the chemical and physical properties of ASGM tailings at project location including inventory data on amount of mercury used or released and gold produced
- c. Review the requirement for formalization process of reprocessing mercury-containing tailing technique
- d. Review the existing analytical and equipment resources globally (minimum 3 resources) and available service providers in project location.

Scope of Work 2. Amalgamation Tailing Sample collection and analysis

- a. Conduct amalgamation tailing assessment and laboratory analysis in Accredited Laboratory to meet information needs that cannot be obtained from existing sources including amount of gold produced and amount of mercury used/released) survey using International Standard (i.e. USEPA Methods and Tools). The amalgamation tailing assay is including:
 1. Chemical analysis for Hg by using Cold Vapor Atomic Absorption Spectroscopy (CVAAS) method and 11 heavy metals parameters (Au, Ag, Cu, Cd, Zn, Pb, As, Ni, Cr, S) which are analyzed with Atomic Absorption Spectroscopy (AAS) or ICP-MS Instrument.

2. Analysis of particle size distribution of the amalgamation tailing and distribution of gold through the particle size fraction
- b. Align the chemical and physical properties of the amalgamation tailings to the most appropriate re-processing technique
- c. Conduct a productive cost and revenue including cut-off grade for economic feasibility and strategies of reprocessing based on potential gold revenue and the cost of gold recovery
- d. Quantify the likely impact of mercury in tailings on gold recovery, and assess the technical feasibility of mercury recovery as part of the tailings re-process
- e. Identify the barriers and challenges that could determine the sustainability the project

Scope of work 3: Design the re-processing equipment

Develop the most appropriate re-processing technique with capacity minimum of 1 ton per day including an appropriate waste management plan (tailing and waste water that comply with environmental regulation)

Scope of Work 4: Final report on re-processing technique in English and Indonesia and the DED

- a. Prepare Detailed Engineering Design for one reprocessing mercury-containing amalgamation tailing with capacity minimum of 1 ton per day
- b. Final report on reprocessing mercury-containing amalgamation tailing in English and Indonesia
- c. A file storage (i.e. USB or CD) containing soft copy of editable version of final report, all presentation, photos, all data result
