This condition does not apply to subcontractors being included in more than one Offer.
--------	--

Goods offered shall be reviewed based on completeness and compliance of the quotation with the minimum specifications described above and any other annexes providing details of UNDP requirements.

The quotation that complies with all of the specifications, requirements and offers the lowest price, as well as all other evaluation criteria indicated, shall be selected. Any offer that does not meet the requirements shall be rejected.

Any discrepancy between the unit price and the total price (obtained by multiplying the unit price and quantity) shall be re-computed by UNDP. The unit price shall prevail and the total price shall be corrected. If the supplier does not accept the final price based on UNDP's re-computation and correction of errors, its quotation will be rejected.

After UNDP has identified the lowest price offer, UNDP reserves the right to award the contract based only on the prices of the goods in the event that the transportation cost (freight and insurance) is found to be higher than UNDP's own estimated cost if sourced from its own freight forwarder and insurance provider.

At any time during the validity of the quotation, no price variation due to escalation, inflation, fluctuation in exchange rates, or any other market factors shall be accepted by UNDP after it has received the quotation. At the time of award of Contract or Purchase Order, UNDP reserves the right to vary (increase or decrease) the quantity of services and/or goods, by up to a maximum twenty five per cent (25%) of the total offer, without any change in the unit price or other terms and conditions.

Any Purchase Order that will be issued as a result of this RFQ shall be subject to the General Terms and Conditions attached hereto. The mere act of submission of a quotation implies that the vendor accepts without question the General Terms and Conditions of UNDP herein attached as Annex 3.

UNDP is not bound to accept any quotation, nor award a contract/Purchase Order, nor be responsible for any costs associated with a Supplier's preparation and submission of a quotation, regardless of the outcome or the manner of conducting the selection process.

Please be advised that UNDP's vendor protest procedure is intended to afford an opportunity to appeal for persons or firms not awarded a purchase order or contract in a competitive procurement process. In the event that you believe you have not been fairly treated, you can find detailed information about vendor protest procedures in the following link: <http://www.undp.org/procurement/protest.shtml> .

UNDP encourages every prospective Vendor to avoid and prevent conflicts of interest, by disclosing to UNDP if you, or any of your affiliates or personnel, were involved in the preparation of the requirements, design, specifications, cost estimates, and other information used in this RFQ.

UNDP implements a zero tolerance on fraud and other proscribed practices, and is committed to identifying and addressing all such acts and practices against UNDP, as well as third parties involved in UNDP activities. UNDP expects its suppliers to adhere to the UN Supplier Code of Conduct found in this link : http://www.un.org/depts/ptd/pdf/conduct_english.pdf

Thank you and we look forward to receiving your quotation.

Sincerely yours,

Procurement Unit

SCOPE OF WORK

for Creation of Audio and Video Conference Communication System in the Ministry of Water Resources of the Republic of Uzbekistan

General information

For the operational management of subordinate structures of the Ministry it is provided under the implementation scheme of this Project to equip with **audio and video conference communication system** the small conference room of the Ministry and Lower Syrdarya BAIS, including the following systems:

1. Display system, in set with:

- Collective display tool.

2. VCC and sound reinforcement system, in set with:

- congress-class system;
- sound reinforcement subsystem;
- audio-conference communication subsystem;
- video-conference communication (VCC) subsystem of high resolution.

ROOM WITH VCC SYSTEM IN THE MINISTRY

1. Collective display tool

Video(display)wall should be used with the following specifications as the main source of video display for all attendees in the room:

- Video panel size is 55" (with diagonal of 55 inches);
- Video(display)wall format is 2x2 (4 video panels);
- Inter-panel seam (gap between edges of images) is not more than 3.6 mm;
- Resolution of each video panel is not less than 1920x1080 pixels;
- Brightness is not less than 350 cd/m²;
- Contrast ratio is not less than 1000:1;
- Frequency is not less than 100 Hz;
- Viewing angle is not less than 170°;
- Total resolution of the video(display)wall (without a separate controller) is 1920x1080;
- Source of image for the video(display)wall is HDMI output of PC (distance from the PC to the video(display)wall is 10 m);
- Display generation controller is built into the video panels;
- Operating mode of the video(display)wall is twenty-four-seven (24/7);
- Set of power and patch cables for assembling the video(display)wall and connecting to the PC – provided in package;
- Wall mounting for the video(display)wall - provided in package;
- Set of necessary HDMI cables.

2. Microphone sound reinforcement system

Sound reinforcement system must provide the use of hardwire communication means in the room. Sound system of the room should include the acoustic systems with cut-in mounting – not less than 6 pieces, as well as amplifiers and controllers of required quantity. Controllers must have a built-in function of acoustic

performance presets. Acoustic systems (speakers) must be at least 100v/20watt, 16ohm/100w each. Amplifiers must have at least 6 separate output channels with minimum capacity of 80 W each at a load of 16 ohm. Acoustic systems must be mounted permanently into the ceiling.

For mixing, dynamic audio processing and switching audio signals it is necessary to use the digital matrix audio system with configurable number of audio inputs and audio outputs. The mixing amplifier must be at least 6-zone 100V switching mixing amplifier of 240W /100 volt.

Programming (software) environment of the system must be able to create configurations enabling mixing of several input audio signals in one mixer with following output to certain audio output signals. In addition, the programming environment must have the standard symbols – dynamic audio sygnal processing devices, in particular limiter/compressor and acoustic feedback suppressor. Because of using the room of the video-conference system, the system must be provided with echo suppression input.

The used digital matrix audio system must have a function of remote control both by means of using the special software and by means of an external control device via the standard RS-232/422/485 or Telnet interface.

All equipment must have the necessary set of All equipment must have the necessary set of switching interfaces, cables, connectors. Sound amplification system must provide for connection and transmission of sound from external data carriers (personal computer, voice recorder, portable players, etc.).

3. Conference system

It is necessary to provide the individual microphones for participants sitting at the top table. Digital conference system should be used for sound reinforcement of participants' speeches and regulating presentations. The number of personal consoles must be 13 sets.

The direct purpose of the conference system is to be:

- sound reinforcement of speaker's voice;
- sound transmission to full-in system.

Conference system shall be composed of at least 13 consoles of delegates + 1 console of a chairman. Central unit of the conference system shall be placed in server cabinet together with other equipment and must have at least 4 separate lines for connection of system consoles and function of remote control. Central unit of the conference system must provide a functionality of transmitting at least 32 channels of sound (quality of the sound should be lower than 24 bits @ 32kHz), and number of simultaneously switched on microphones shall be at least 8.

Controlling the conference system should be possible on operator's workplace. All All switching of the conference system must be done with FTP twisted pair cable (shielded).

4. Video Conference System

Video codec with built-in PTZ camera should be used as conference system equipment.

Technical specifications of the built-in PTZ camera:

- Wide angle lens
- Not less than 9x Zoom
- Not less than Full HD 1080p video
- +/- 23° tilt
- +/- 90° panorama
- Not less than 70° field of vision
- Presets to quickly move positions

Technical specifications of the codec:

- Built-in MCU, supporting conferences modes for up to 3 participants and with local SIP mixing,
- Built-in Bluetooth to connect Bluetooth speakers/microphones , keyboards, data exchange, etc.,
- Supporting 2 screens with 2 HDMI outputs,
- HDMI output to connect computer for displaying presentations,
- Function of video-conference recording.

5. Other equipment

For installation of the equipment the telecommunications cabinet is required. Floor standing telecommunications cabinet is designed for the installation of networking, telecommunications, and auxiliary mounting equipment of 19", and with 24 units. Supporting structure is to be with sheet steel of 1.5 mm. the cabinet shall be covered (roof, back wall, side walls, door) with sheet steel of 1 mm. The cabinet is designed for the indoor operation at the temperature of an ambient air from +5°C to +40°C and at relative humidity of ambient air as 80% at 25°C. Level of protection should be IP20.

VCC SYSTEM ROOM IN LOWER SYRDARYA BAIS

1. Collective display tool

Display with at least 65 inches diagonal (mounted on ceiling) should be used as the main source of video display for all attendees in the room.

Technical specifications of LCD panels:

- Not less than Full HD
- Screen size is at least 65 inches
- Resolution is 1920x1080
- Brightness is not less than 600 cd/m²
- Contrast ratio is not less than 5000:1
- Response time (gray-gray) is maximum 10 ms.
- Viewing angle (horizontal and vertical) is not less than 170°.
- Mini D-Sub outputs' types are 15 pin In/Out, HDMI, DVI-D, BNC (R, G, B, H, V) In/out
- Wall mounting for the video(display)wall is provided in package.
- Set of necessary HDMI cables.

2. Video Conference System

Video codec with built-in PTZ camera should be used as conference system equipment.

Technical specifications of the built-in PTZ camera:

Wide angle lens

- Wide angle lens
- Not less than 9x Zoom
- Not less than Full HD 1080p video
- +/- 23° tilt
- +/- 90° panorama
- Not less than 70° field of vision
- Presets to quickly move positions

Technical specifications of the codec:

- Built-in MCU, supporting conferences modes for up to 3 participants and with local SIP mixing,
- Built-in Bluetooth to connect Bluetooth speakers/microphones, keyboards, data exchange, etc.,
- Supporting 2 screens with 2 HDMI outputs,
- HDMI output to connect computer for displaying presentations,
- Function of video-conference recording

3. Audio conference system

It is necessary to provide a collective wired audio capture and playback device with 3 cardioid microphones, with a sound capture distance of at least 3.5 m.

The immediate functions of the conference system in conjunction with the VCC system should include:

- Capturing speaker's voice;
- Streaming the sound to VCC system through Bluetooth connection;
- Voice reproduction of remote speaker.

The functions of the audio conference system as an independent facility include:

- Supporting SIP telephony (up to 6 SIP accounts)
- Support for 7-party conference.

Additional functions of the audio conference system:

- Full HD sound
- Possibility to download an application from Google Play Store (Skype and other messengers)
- Possibility of device extension through cascade connection of a second device
- Gigabit Ethernet with PoE

Warranty obligations

When technical defects are detected, the Supplier shall provide a qualified specialist to the company in order to proceed with the diagnosis and correction of technical defects as soon as possible, but in any case not later than two (2) working days at the place of mounting the equipment. Further, the Supplier will take all necessary measures to eliminate the technical defect and must ensure the elimination of these technical defects within five (5) days at the place of mounting the equipment.

All costs for sending and receiving equipment to the service center shall be borne by the Contractor.

The warranty period is **24 months**.

Submitted proposal should include: the name of the authorized service centers and their addresses, as well as the scheme of warranty service (mandatory requirement).

Special conditions

Contractor takes assumes the following obligations:
