Provision of Support Services:

- Office space: Yes No
Equipment (laptop etc.): Yes No

Secretarial Services

Yes No

If yes has been checked, indicate here who will be responsible for providing the support services:
Deasy Ernawati.

I. BACKGROUND

"UNDP is the UN's global development network, an organization advocating for change and connecting countries to knowledge, experience and resources to help people build a better life. We are on the ground in about 170 countries and territories, including Indonesia, working to eradicate poverty while protecting the planet. UNDP supports implementation of the Sustainable Development Goals (SDGs). In Indonesia, UNDP works with the Government to integrate SDGs into national plan and policies."

In response to the recent Central Sulawesi and NTB earthquakes and tsunami, UNDP has initiated the Sulawesi / Lombok Programme for Earthquake and Tsunami Infrastructure Reconstruction Assistance ('PETRA' in short) to support the Government of Indonesia's Rehabilitation and Reconstruction programmes in the two Provinces.

The ultimate goal of PETRA is to contribute to the rehabilitation and reconstruction of key infrastructure to support the resilient recovery of disaster-affected communities in both provinces. It addresses the need to accelerate the restoration of critical public services (such as health and education), improve economic livelihood opportunities for affected communities, while, at the same time, enhancing resilience to future shocks in both provinces. It will be guided and informed by the post-disaster needs assessments and will be fully aligned with relevant national and sub-national recovery plans.

PETRA will deliver two outputs, namely: (a) *Rehabilitation and reconstruction of partially and fully damaged infrastructure for critical public services;* and (b) *Rehabilitation of affected communities' economic infrastructure to promote more resilient and sustainable livelihoods.*

II. SCOPE OF WORK, ACTIVITIES AND DELIVERABLE

The Information Management Support Specialist will be responsible for developing and maintaining the Management Information System of the PETRA Project, and will be responsible for data collection, record, and analysis in relevance to the project activities. Report directly to Project Manager, the Consultant will work in close collaboration with the Communication, Reporting, Monitoring, and Evaluation Officer (CRMEO) of PETRA Project and in coordination with local Government officials, private sector, non-government and civil society organizations

Scope of Work and Activities

- Contribute to PETRA Project through M&E Framework, support framework design and conduct of baseline surveys, including sampling methodology, data collection instruments, analysis, and report development.
- Support establishment and maintenance of PETRA Project Monitoring and Evaluation (M&E) systems to track participation, activities, outputs, and assess outcomes.
- Provide technical support to partners in developing logical framework and M&E plans following the standards set in the project design guidance, ensuring that indicators are aligned with the program results framework and contributes to the life-stage core outcomes.
- Participate in the conduct of PETRA Project site survey, key informant interviews or focus

group discussions and data collection as maybe assigned per PETRA Project indicator.

- Support the development of Management and Information System, harnessing new information technology resources for compilation, analysis, storage, and retrieval of data and knowledge for program development; provide technical assistance on data quality, integrity, protection and confidentiality.
- Identify program best practices and support development and production, sharing and learning among PETRA Project, stakeholders and partners.
- Ensure that program related data at PETRA Project is organized, secure, accessible, and ready for use.
