1. BACKGROUND

Countries in Asia and the Pacific are making diverse efforts to implement the SDGs. Initial country level efforts, supported by UNDP and other development partners, have focused on putting in place the building blocks necessary to support SDG achievements. This includes developing institutional arrangements to promote coordination and policy coherence across sectors and government levels, aligning national and sub-national development plans and budgets with the 2030 Agenda and to assess the availability of data and capacities of data ecosystems to monitor progress. Next steps will involve the identification of interlinkages between goals and targets and 'accelerator interventions', interventions that can trigger progress across a range of goals and targets. As articulated in its new Strategic Plan 2018-2021, UNDP will further reinforce this work through the establishment of Country Support Platforms for the SDGs.

Beyond the information included in the Voluntary National Review to the UN High Level Political Forum, there is no standardized or systematic documentation of country efforts in this regard. UNDP, in collaboration with partners, aims to fill this void in line with the organization's priorities. Through the creation of SDG Implementation Snapshots, or succinct summaries of the key steps and issues that countries face in implementing the SDGs, UNDP and partners aim to provide a basis for learning and targeted action to achieve the SDGs. A primary goal of the exercise is to inform the programming efforts of development partners seeking to support countries to make progress on the SDGs. The exercise can also help support countries to communicate their SDG implementation

efforts, and support knowledge, learning and exchange of experience across countries as implementation proceeds.

UNDP BRH will recruit a consultant to support research and information gathering on country efforts on SDG implementation in selected countries in Asia and the Pacific. This will complement the ongoing project with Asian Development Bank and focus on preparing the Snapshot basis in additional countries, using a light version of the methodology developed.
