Description of Requirements

Provision of Consulting Services: Review of Financial Management Capacity, Setting up of Accounting System and Training of Staff

<p>Context of the Requirement</p>	<p>Background</p> <p>The Environmental Protection Agency (EPA) is the principal authority in Liberia responsible for the management of the environment; coordinate, monitor, supervise and consult with relevant stakeholders on all activities in the protection of the environment and sustainable use of natural resources. To enhance EPA efforts in achieving her core mandates, she is currently the link between the Government of Liberia and global environmental funding institutions; serving as National Designated Authority (NDA), of the Green Climate Fund (GCF), and Focal Point for the Global Environment Facility (GEF).</p> <p>The EPA with support and collaborations from the United Nations Development Program (UNDP) have leveraged and accessed global environmental funding to address climate degradation issues in Liberia. Evidence of these are the Coastal Defense intervention that rescued Atlantic Street in Buchanan City, Grand Bassa County and the on-going Coastal Defense erection in New Kru Town, Montserrado County. Other projects been financed and implemented by global environmental funding are the National Adaptation Plans (NAPs) and the Cross-Cutting Capacity Development (CCCD).</p> <p>For EPA to continuously leverage and access these international climate funds it has to be compliance with their requirements. These include, to develop best practice systems, indicators, documentation and policies; comply with international voluntary standards and frameworks; environmental and social due diligence; monitor and evaluate projects and programs; discern appropriate levels of transparency and disclosure; and regular sustainable reports with transparent accounting for financial as well as environmental, social and governance performance. Further, the EPA needs to put in place and continually improve systems for managing the impacts associated with environmental and social contexts, by setting objectives and seeking continuous improvements</p>
--	---

	<p>through monitoring performance and reviewing progress and regularly audited by third party financial institutions.</p> <p>The EPA is desirous of establishing an efficient Project Management Unit (PMU) that can plan and execute programs and projects with tangible results, ensuring timely deliveries and reports that will meet credibility and quality assurance of best practices. The PMU of the EPA will also be positioned to identify and navigate the risks and opportunities that project management faces and adopt cost-effective approaches. We also want to ensure that the PMU can monitor and evaluate projects/programs, perform baseline analyses to understand which impacts direct result of the projects/programs are.</p> <p>Considering the above mentioned and to enable the Environmental Protection Agency adequately access and implement multilateral climate financed projects, there is a need to enhance the capacity of certain department staffs. These departments are key to managing and reporting especially on donor funded projects.</p> <p>Because of this capacity gap, the EPA has not been able to fully manage any climate financed project in Liberia. This gap, the EPA working along with the UNDP decides to address. This gap when address will enhance EPA in the execution of her national mandates and accessing of international climate funding to mitigate Liberia's environmental degradation impacts.</p> <p>The EPA in collaboration with the United Nations Development Programs (UNDP) and the National Adaptation Plans (NAPs) Project team is therefore seeking to contract a national consulting firm that will set up an accounting system and conduct hands-on training of selected staff of the EPA.
