Resilient nations.

**Q&A (Clarification)**  
**RFQ/UNDP/PETRA/010/2020**

**Assignment Name:**

Primary Data Collection for Geological Sub-Surface Condition and the Soil/Rock Engineering Properties in Palu

**Closing Date:**

5 February 2020 at 17:00 (Western Indonesian Time, GMT+7)

**TO ALL INTERESTED BIDDERS**

<b>Q&amp;A - Clarifications to Questions</b>		
1	Q	On the Table 2: Offer to Comply with Other Conditions and Related Requirements No. 4 page 12, Working Period is given only for 30 days after commencement days. Is this working period sufficient, considering locations are scattered around Palu and Donggala?
	A	30 (thirty) days is counted only for field work in Palu, excluding initial mobilization time of equipment and personnel. Hence, UNDP considered the working period is sufficient.
2	Q	The Contract General Terms and Condition for this project, as based on the UNDP RFQ documents, is using for de minimis contracts. Does this mean the maximum quotation value that we could submit to UNDP is \$ 50,000?
	A	The purpose of attaching the Contract General Terms and Condition is only to inform in advance the general terms and condition that will be applied for this project. No, it does not mean as limitation or maximum amount that any bidders could quote.
