Questions and Answers

Date: 5 February 2020

Questions	Answers
How many from Each type of antenna are you expecting to procure.	We need vendors to provide different antenna types with quantities & prices as per ITB document (special Notes) This will provide options and best pricing during evaluation
When you talk about NVIS antenna you have indicated three wire antenna - Are you looking at a specific antenna or can we propose our own NVIS antenna - Please check the data sheets attached.	We encourage vendors to provide their best proposed antenna types, referencing to the frequency allocation band and proven installation record specified in the ITB.
If you are considering communication between various points in Micronesia we could provide a solution after coverage analysis with our software is this something that you would be keen to carry out.	Not at this stage
Can we Quote only for HF antenna requirement	As per BDS 2 of Section 3. Bid Data Sheet, Bidders are allowed to submit their bids for each Lot or for all Lots as per given ITB.
We observed this tender only very recently and would like you to provide few days extension in order to provide a bid which provide all the relevant parts such as the Earthing/grounding conductors as we usually do not provide such third party items.	Considering limited time for implementation and importance of the activity, it was agreed to extend bids submission deadline until 23.59 New York time on 9 February 2020. Separate notice will be issued on shortly.
