REQUEST FOR PROPOSAL (RFP)

<table>
<thead>
<tr>
<th>NAME &amp; ADDRESS OF FIRM</th>
<th>DATE: February 24, 2020</th>
</tr>
</thead>
</table>

Dear Sir / Madam:

The United Nations Development Programme (UNDP) hereby invites you to submit a Proposal to the Request for Proposal RFP/UNDP/ENV-SPOI/89554/003/2020 – Development of Peat Ecosystem Protection and Management Plan Documents for Pelalawan District – UNDP Indonesia - Indonesia

Detailed Terms of Reference as well as other requirements are listed in the RFP available on UNDP ATLAS e-Tendering system" (https://etendering.partneragencies.org) Event ID: 0000005466

Your offer, comprising of a Technical and Financial Proposal, should be submitted in accordance with RFP requirements, through UNDP ATLAS e-Tendering system and by the deadline indicated in https://etendering.partneragencies.org.

NOTE! The Financial Proposal and the Technical Proposal files MUST BE COMPLETELY SEPARATE and uploaded separately in the system and clearly named as either “TECHNICAL PROPOSAL” or “FINANCIAL PROPOSAL”, as appropriate. Each document shall include the Proposer’s name and address. The file with the “FINANCIAL PROPOSAL” must be encrypted with a password so that it cannot be opened nor viewed until the Proposal has been found to pass the technical evaluation stage. Once a Proposal has been found to be responsive by passing the technical evaluation stage, UNDP shall request the Proposer to submit the password to open the Financial Proposal.

The Proposer shall assume the responsibility for not encrypting the financial proposal. NOTE: DO NOT ENTER PROPOSAL PRICE IN THE SYSTEM, INSTEAD ENTER ONE.
In the course of preparing and submitting your Proposal, it shall remain your responsibility to ensure that it is submitted into the system by the deadline. The system will automatically block and not accept any bid after the deadline. In case of any discrepancies deadline indicated in the system shall prevail.

Kindly ensure that supporting documents required are signed and stamped and in the .pdf format, and free from any virus or corrupted files and FINANCIAL PROPOSAL IS PASSWORD PROTECTED. NOTE! The File name should contain only Latin characters (No Cyrillic or other alphabets).

You are kindly requested to indicate whether your company intends to submit a Proposal by clicking on "Accept Invitation" button no later than 26th February 2020. If that is not the case, UNDP would appreciate your indicating the reason, for our records.

If you have not registered in the system before, you can register now by logging in using:

username: event.guest  
password: why2change

The step by step instructions for registration of bidders and quotation submission through the UNDP ATLAS e-Tendering system is available in the "Instructions Manual for the Bidders", attached. Should you require any training on the UNDP ATLAS e-Tendering system or face with any difficulties when registering your company or submitting your quotation, please send an email to bela.kelvian@undp.org cc: yusef.miliiah@undp.org

Please note that ATLAS has following minimum requirements for password:

1. Minimum length of 8 characters
2. At least one capital letter.
3. At least one number.

New bidder registering for first time, system will not accept any password that does not meet the above requirements and thus registration cannot be completed.

For already existing bidders whose current password does not meet the criteria, when signing in, system will prompt you to change the password, and it will not accept a new password that does not meet requirement.

The user guide and videos are made available to bidder in the UNDP public website in this link: http://www.undp.org/content/undp/en/home/operations/procurement/business/procurement-notices/resources/

Bidder can also access below instruction from youtube with link below: https://www.youtube.com/watch?v=Try1FX6reu8&feature=youtu.be

The bidders are advised to use Internet Explorer (Version 10 or above) to avoid any compatibility issues with the e-tendering system.

No hard copy or email submissions will be accepted by UNDP.
UNDP looks forward to receiving your Proposal and thanks you in advance for your interest in UNDP procurement opportunities.

Sincerely yours,

[Signature]

### Description of Requirements

<table>
<thead>
<tr>
<th>Context of the Requirement</th>
<th>To facilitate and assist the Pelalawan district government to develop their Peat Ecosystem Protection and Management Plan Documents as mandated by National Regulation.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Implementing Partner of UNDP</td>
<td>Ministry of Environment and Forestry; Ministry of Ministry of Agrarian and Spatial Plan/ National Land Agency; Minister for Public Works and Human Settlements; Ministry of Home Affairs</td>
</tr>
</tbody>
</table>
| Brief Description of the Required Services | to provide a logical framework and management plan for peat land in Pelalawan District as:  
1. governance corrective action on peat management in Pelalawan District that accommodates various interests and considers environmental, economic, and social aspects;  
2. efforts to improve the damage prevention and preservation of the peat ecosystems functions through providing recommendation for good/ best management practices activities on peat ecosystems (landscapes).  
3. As a reference for the systematic and integrated implementation of protection and management of peat ecosystems in Pelalawan Districts |
| List and Description of Expected Outputs to be Delivered | The Service Provider will be expected to produce the below deliverables.  
1. Develop preliminary report on actual condition of peatland area in Pelalawan Districts and its implication for environment, social and economy (Deliverable 1).  
2. A final report on formulation of a peat ecosystem protection and management plan (Deliverable 2).  
3. A final draft regulation (District Regulation/ Regent Regulation) on peat ecosystem protection and management plan in Pelalawan (Deliverable 3). |
| Person to Supervise the Work/Performance of the Service Provider | 1. National Project Manager SPOI  
2. Implementation Advisor SPOI  
3. Environment and Policy Officer |
| Frequency of Reporting | Please refer to the TOR – Annex 2 |
| Progress Reporting Requirements | Please refer to the TOR – Annex 2 |
| Location of work | □ Exact Address/es  
☒ At Contractor’s Location, if required, for technical works specifically indicated in the proposal |

---

1 A detailed TOR may be attached if the information listed in this Annex is not sufficient to fully describe the nature of the work and other details of the requirements.

FORM FOR SUBMITTING SERVICE PROVIDER’S PROPOSAL

(This Form must be submitted only using the Service Provider’s Official Letterhead/Stationery)

[Insert: Location].
[Insert: Date]

To: [Insert: Name and Address of UNDP focal point]

Dear Sir/Madam:

We, the undersigned, hereby offer to render the following services to UNDP in conformity with the requirements defined in the RFP dated [specify date], and all of its attachments, as well as the provisions of the UNDP General Contract Terms and Conditions:

A. Qualifications of the Service Provider

The Service Provider must describe and explain how and why they are the best entity that can deliver the requirements of UNDP by indicating the following:

a) Profile – describing the nature of business, field of expertise, licenses, certifications, accreditations;
b) Business Licenses – Registration Papers, Tax Payment Certification, etc.
c) Latest Audited Financial Statement or income statement and balance sheet to indicate its financial stability, liquidity, credit standing, and market reputation, etc.;
d) Track Record – list of clients for similar services as those required by UNDP, indicating description of contract scope, contract duration, contract value, contact references;
e) Certificates and Accreditation – including Quality Certificates, Patent Registrations, Environmental Sustainability Certificates, etc. if any
f) Written Self-Declaration that the company is not in the UN Security Council 1267/1989 List, UN Procurement Division List or Other UN Ineligibility List.

B. Proposed Methodology for the Completion of Services

The Service Provider must describe how it will address/deliver the demands of the RFP; providing a detailed description of the essential performance characteristics, reporting conditions and quality assurance mechanisms that will be put in place, while demonstrating that the proposed methodology will be appropriate to the local conditions and context of the work.

---

1 This serves as a guide to the Service Provider in preparing the Proposal.
2 Official Letterhead/Stationery must indicate contact details – addresses, email, phone and fax numbers – for verification purposes.
C. Qualifications of Key Personnel

If required by the RFP, the Service Provider must provide:

a) Names and qualifications of the key personnel that will perform the services indicating who is Team Leader, who are supporting, etc.

b) CVs demonstrating qualifications must be submitted if required by the RFP; and

c) Written confirmation from each personnel that they are available for the entire duration of the contract.

D. Cost Breakdown per Deliverable*  

<table>

</table>
B. Background Information

Oil palm plantations were introduced in Southeast Asia at the beginning of the 20th century, mainly in Malaysia and Indonesia, where their extent has increased with the decline of the rubber market. Currently, Crude palm oil (CPO) production plays important roles in both the local-global environment and socio economy in Indonesia. Between 2000 and 2014, exports and consumption of CPO in Indonesia have increased from 5 to 22 Mt and from approximately 3 to 11 Mt respectively. Currently, palm oil represents 17% of total agricultural revenues, making it the most important agricultural product of Indonesia. In 2016 palm oil represented 2.36% of Indonesia’s GDP (The World Bank 2016; Indonesia Investments 2017). The production of CPO has resulted in economic improvement within rural areas through providing jobs for local people. CPO generated used to produce food, soap, cosmetics, and biofuel (about one third of the global biodiesel production).

This shows that the benefits and apparently positive economic impact of this commodity are huge. Today, Indonesia is the largest grower of oil palm in the world, and its production is expected to continue to increase in the near future. The country achieved this through rapid agricultural expansion over the last 15 years, 70% of which occurred at the expense of primary and secondary forests. This phenomenon of sudden land conversion for oil palm threatens Indonesia’s vast but dwindling rainforests in the world, particularly in Sumatera, Kalimantan and Papua. The key development challenge here is: how to expand production of key agricultural commodities—which are in high demand due to expanding populations, rising incomes and low substitutability—without further imposing the kinds of external costs such as environmental degradation, forest and biodiversity loss, and increased greenhouse gas emissions. Success in meeting this challenge will require change that transforms commodity production (as well as demand and finance) from its current form, which is often unsustainable, to a more inclusive form that ensures greater social, economic and environmental sustainability.

It can’t be denied that there is significant loss of ecosystem services in landscapes modified by oil palm plantations compared with previous land uses, such as primary forests and peatlands. For instance, the peatland has carbon-rich ecosystem and has important socio-economic values and provides valuable ecological services, including controlling and mitigating global climate change. In the last decade, the European Union and the USA have enacted renewable energy policies that have promoted the use of biofuels for reducing anthropogenic CO2 emissions to combat climate change. This show that palm oil is a highly controversial topic in the Western World and mostly linked to deforestation and CO2 Emissions that the EU tries to address.

To address the concern of the international community, the Government of Indonesia (GoI) has taken steps towards building a greener economy that promotes growth, equity, improved livelihood and environmental integrity including in the palm oil sector. Aiming to support the government’s actions, UNDP has been working together with the Indonesian Ministry of Agriculture to achieve the country’s goals of sustainable palm oil production through the implementation of various initiatives, both at the national and landscape levels, such as, among others, the UNDP-managed and Global Environment Facility-funded project, Support to Reduced Deforestation from Commodity Production, (hereafter the ‘Production project’).

The Production project is a child project under the UNDP-GEF 6 Good Growth Partnership program – Taking Deforestation out of Commodity Supply Chains. The ultimate objective of the program is to reduce the global impacts of agriculture commodities on GHG emissions and biodiversity by meeting the growing demand of the commodities such as palm oil in Indonesia and Liberia through supply that does not lead to deforestation and related GHG emissions. Specifically, the Production project is encouraging sustainable practices for oil palm in these countries while conserving forests and safeguarding the rights of smallholder farmers and forest-dependent communities. The Production project comprises of four components: [1] dialogue, action planning, policies and
enforcement, (2) farmer support systems, and (3) land use mapping and planning, and (4) knowledge management. Interventions under the four project components above are supporting the GOL to achieve sustainable palm oil. At the sub-national level, the project is being piloted in three provinces – North Sumatera, Riau and West Kalimantan, and three landscapes – South Tapanuli, Pelalawan and Sintang districts.

The Indonesian Government has published a number of policies and regulations on peatland use. A first regulation that explicitly mentioned the need to protect peatland was issued in 1990 (Presidential Decree No. 32 year 1990), followed by a ratification of the convention on wetlands in 1991. In 2007, the Indonesian Government began to pay more attention to the rehabilitation of its degraded peatlands, followed by developing guidance for the utilization of peatland for oil palm cultivation in 2009 and a strict moratorium on forest and peatland conversion since 2011. Recently, the Government Regulation (PP) No. 71 year 2014 on protection and management of peatland ecosystems was issued. Yet, these peatland policies are often not effective in part due to unclear management authority for all peatlands as well as the lack of law/policy enforcement in the field at the level where many of the land-use decisions are taken (i.e. at village, district and provincial).

Relating to improving peat governance, UNDP through GGP will support the Pelalawan Government to develop the District Peat Ecosystem Protection and Management Plan that is mandated by Government Regulation 71/2014 jo Government Regulation 57/2016. The document is intended to be a reference for the systematic and integrated implementation of protection and management of peat ecosystems in Pelalawan Districts. This is because the effects of previous policy interventions on peatland management remains uncertain due to the lack of assessment of how these peatland policies and regulations are implemented by peatland users in a specific locality. A new practice that is prescribed by policy or regulation is not automatically accepted and adopted in all localities. Adoption may vary across actors, organizations and locations and may occur through phases of conflict and cooperation.

The United Nations Development Programme (UNDP) in Indonesia is seeking proposals from firms or organizations to supply a package of services on developing District Peat Ecosystem Protection and Management Plan for Pelalawan in support of work in Indonesia on a global project on "Reducing Deforestation on Commodity Production", managed by UNDP and funded by the Global Environment Facility. More of activities including FDGs and workshops under this ToR are to be carried out in Pelalawan District.

C. Context of this TOR

In the context to support the district government to develop the District Peat Ecosystem Protection and Management Plan, a Service Provider will be contracted to develop:

1. A preliminary report on actual condition of peat ecosystem area in Pelalawan Districts and its implication for environment, social and economy of surrounding community.
3. A final draft regulation (District Regulation/ Regent Regulation) on Peat Ecosystem Protection and Management Plan in Pelalawan.
D. Scope of Work

The Service Provider will be expected to carry out and deliver on the following tasks:

1. A preliminary report on actual condition of peat ecosystem area in Pelalawan Districts and its implication for environmental services, with following detail on:
   a. the formation of the drafting team, work team Decree (UNDP will assist the service provider to get a decree from regent), work plan and analysis of data availability and needs;
   b. Conduct studies on synchronization of Pelalawan District Spatial Plan, forest function (designated forest area), peat ecosystem functions maps and other maps (such as: land rights/permits, moratorium, open access, allocation of social forestry, land use, land cover, and forest/land fire) to identify existing condition;
   c. Carry out a ground check to invent: (i) facilities and infrastructure of peat ecosystems, (ii) ecosystem vulnerability to climate change, (iii) land use, (iv) population distribution, (v) local wisdom, (vi) community conditions, (vii) peat ecosystem damage, (viii) potential natural resources, (ix) peat management Institutions, programs, activities and funding;
   d. Conduct ‘one-on-one’ meetings and/or focus group discussions (FGD) to obtain data and information on relevant Institutions that have been involved and have programs in the management of peat ecosystems in site level; and
   e. Compile dataset and conduct analysis to know: (i) the existing condition of peat ecosystem; (ii) potential of peat ecosystems includes natural resource and environmental service; (iii) peat ecosystem challenges and/or strategic issues, consist of: economic strategic issues, social strategic issues, environmental strategic issues; and (iv) implications of peat ecosystem for environment, social and economy of the surrounding community.

</tbody>
</table>

Details are to be elaborated in proposal/work plan submission as required.

2. A final report on formulation of a Peat Ecosystem Protection and Management Plan, with following detail on:
   a. Develop a recommendation based on existing condition, challenges, strategic issue, and potential of peat ecosystem, consist of:
      1. peat ecosystems utilization plan (for protected and cultivation function),
      2. peat ecosystem damage controlling plan (consist of preventing, mitigating and recovering plan),
      3. peat ecosystem maintenance plan (the peat ecosystem reserve plan and preservation of the function plan),
      4. climate change mitigation and adaptation plans;
   b. Conduct a Public Consultation to obtain input from several institutions in order to improve the substance of program recommendations, activities and targets; and
   c. Develop programs, programs, actions and targets on peat ecosystem management in accordance with the 4 plans above.

E. Expected Outputs

The Service Provider will be expected to produce the below deliverables.

1. Develop preliminary report on actual condition of peatland area in Pelalawan Districts and its implication for environment, social and economy (Deliverable 1).
2. A final report on formulation of a peat ecosystem protection and management plan (Deliverable 2).
3. A final draft regulation (District Regulation/ Regent Regulation) on peat ecosystem protection and management plan in Pelalawan (Deliverable 3).
4. Supplemental monthly communication and information update report on implementation.

F. Risk and Assumptions

Assumptions:

1. Development the Peat Ecosystem Protection and Management Plan in Pelalawan District can be done without waiting for the completion of similar plan documents at the National and Provincial levels.
2. Ministry of Environment and Forestry and provincial government agreed and endorsed the plan and methodology that used by service provider.
3. Practitioners in peat ecosystem management, companies and local communities are willing to be a member of technical group to develop the draft regulations.

Risks:

1. National policy on guidelines for the developing the peat ecosystem protection and management plan will be legalized in 2020 before this process is completed.
2. Data limitations (some institutions that was worked in the site level don’t want to share their main data).
3. The District Regulation on Pelalawan spatial plan has not been enacted by the District Government.

G. Institutions/Resources who need to be involved

A detailed list of institutions/resources who will be involved in this activity is available in Annex 2.
The SPOI Project will be able to provide the advice towards the context and content which each stakeholder can be relevant from the Annex.

H. Institutional Arrangement

- The Consultant should submit their work plan to UNDP for review and approval before starting the assignment. Consultant should communicate any changes of the work plan and budget to UNDP and UNDP should give the approval in writing.
- UNDP will require the consultant to report the progress of the work in monthly basis, in the formal communication in addition to the required deliverable.
• All logistical arrangements and costs associated with the delivery of tasks identified above to be covered by the selected individual/company.

The SPOI Project will provide advice and guidance in terms of the extent of the engagement with all institutions/organizations as detailed in Annex 2.

I. Duration of the Work

It is anticipated that the Assignment will be completed within a total of 10 months from the date of the signing of the contract between the SPOI project and the Service Provider. All work must be completed by 30th November 2020.

J. Payment Schedule

Payment will be made after satisfactory acceptance by UNDP of the services provided based on the following schedule:
