Description of Requirements

Context of the Requirement	Pacific Financial Inclusion Programme PFIP is a Pacific-wide programme that has helped over 2 million low-income Pacific Islanders gain access to financial services and financial education. It achieves these results by funding innovation with financial services and delivery channels, supporting policy and regulatory initiatives, and empowering consumers. PFIP operates from the UNDP Pacific Office in Fiji and has offices in Papua New Guinea, Samoa, Vanuatu and the Solomon Islands. It is jointly administered by the UN Capital Development Fund (UNCDF) and the United Nations Development Programme (UNDP) and receives funding from the Australian Government, the European Union and the New Zealand Government. Background on the assignment Identification credentials for the purpose of accessing and using financial services continues to be a barrier worldwide with an estimated 1.7 billion people being unable to prove who they are. At the request of the Central Banks of Vanuatu, Solomon Islands and Fiji, the UNCDF's Pacific Financial Inclusion Programme (PFIP) is planning to support the implementation of an e-KYC and digital credit history reporting solution to help advance financial inclusion in those Pacific countries. Based on the experience from UNCDF colleagues in Sierra Leone, the initiative plans to use a two-pronged open-source secure digital solution targeting self-sovereign identification of individuals and businesses as well as for the storage of credit history. When integrated into the financial sector, it extends reliable, secure credit reporting to all levels of the economy, and provides a pathway for unbanked borrowers to use their informal financial history to become banked. The initiative envisions an integration of the solution with existing government identity systems and with financial service providers, as well as the creation of a digital, self-sovereign credit bureau. Once fully integrated, the e-KYC and Digital Credit History Reporting Platform will enable nationwide e-KYC and credit reporting by all financial institutions in Vanuatu, Solomon Islands and Fiji. As part of this work, the UNCDF-PFIP has already commissioned an initial scoping study for Fiji specifically and is now planning to undertake a country diagnostic exercise for Vanuatu, Solomon Islands and Fiji at the specific request of its central bank partners in those countries. The primary objective of these country diagnostics is to understand the current situation in Vanuatu, Solomon Islands and Fiji and to provide recommendations in regard to a potential implementation of the e-KYC and digital credit history solution.
