At any time during the validity of the quotation, no price variation due to escalation, inflation, fluctuation in exchange rates, or any other market factors shall be accepted by UNDP after it has received the quotation. At the time of award of Contract or Purchase Order, UNDP reserves the right to vary (increase or decrease) the quantity of services and/or goods, by up to a maximum twenty five per cent (25%) of the total offer, without any change in the unit price or other terms and conditions.

Any Purchase Order that will be issued as a result of this RFQ shall be subject to the General Terms and Conditions attached hereto. The mere act of submission of a quotation implies that the vendor accepts without question the General Terms and Conditions of UNDP herein attached as Annex 3.

UNDP is not bound to accept any quotation, nor award a contract/Purchase Order, nor be responsible for any costs associated with a Supplier's preparation and submission of a quotation, regardless of the outcome or the manner of conducting the selection process.

UNDP encourages every prospective Vendor to avoid and prevent conflicts of interest, by disclosing to UNDP if you, or any of your affiliates or personnel, were involved in the preparation of the requirements, design, specifications, cost estimates, and other information used in this RFQ.

Technical Specifications

Background

The Parliament of the Republic of Fiji operates a television production facility to provide broadcast and streamed television coverage of all committee proceedings and the sitting of the house of representatives. The current Covid-19 crisis necessitates us to continue with the function of Parliament, with Members of Parliament working remotely from the Parliament precinct and making extensive use of modern video conferencing techniques. This RFQ is to provide for the video conferencing as additional capability to the television facility.

Description / Specifications of Goods

Parliament of the Republic of Fiji has identified that the current Television coverage of the Debating Chamber and Large Committee room requires additional capability to allow members to attend remotely yet still be televised from their videoconference connection.

The facility currently allows for the live broadcast of one room, and the recording of one other room at a time.

This proposal will enable a hybrid mode of internal normal camera coverage, as well as external video conferencing (VC) coverage, for two rooms simultaneously.

1. Each of two rooms shall have the ability to host a VC. (could be Skype, Zoom, Teams etc), Each room will require to be supplied with;
 - a. A Laptop or PC to host the VC
 - b. A scaling scan convertor to convert the Video Conference signal into a form suitable for integration into the television broadcast.
 - c. A video to webcam convertor to allow MPs participating remotely, to see and hear MPs sitting in the relevant Chamber or committee room.
 - d. Monitoring of the VC onto existing and additional large TV displays for MPs in the Relevant Chamber or Committee room
 - e. Signal transport of the above systems to/from the control rooms via Catx or Fiber cable as appropriate via existing cable infrastructure. Terminal equipment will be required.
2. Each of the two control rooms shall be able to include the VC into its normal TV operation, with video and audio. Each control room will require to be supplied with;
 - a. Video integration into existing broadcast facility
 - b. Video routing into both control rooms
 - c. Reconfiguration of each control room to allow for rerouting, monitoring, of incoming and outgoing video signals
 - d. New clean video feeds created to send to each VC
 - e. Audio integration into the existing broadcast facility
 - f. Audio mixing with the room audio system
 - g. Reconfiguration of each control room to allow for rerouting, monitoring, of incoming and outgoing audio signals
 - h. New mix-minus audio feeds created to send to each VC

3. The Master Control Room (MCR), shall be able to control and monitor the hybrid VC operations MCR will require to be supplied with;
 - a. Overall control of each VC hosting computer
 - b. Ability to monitor of each host computer
 - c. Ability to send monitoring feeds to each of the three rooms
4. The existing technical facility, of the rooms, and the control rooms, will require a level of re-design, re-configuration, testing and training. The following services will be required;
 - a. General two consultancy to arrive at the best conceptual functional capacities
 - b. Detailed analysis, and design of the functional and technical changes
 - c. Proof of concept testing of sub-systems where appropriate
 - d. Edition to the detailed facility documentation set for AV and ICT schematics, layouts, and cable run-lists.
 - e. Offsite pre-building of any sub-systems and cabling
 - f. Onsite build installations and modifications
 - g. Testing and commissioning of all systems
 - h. User training on the modified and new systems
 - i. Go-Live support during the first hybrid broadcast
 - j. Ongoing support and maintenance for a 4-year term

Notes

1. Due to Covid-19 lockdown and travel restrictions we have to assume that this project will be carried out 100% remotely, and therefore the implementation will be unusual, time consuming, and effected as a shared effort between the vendor and the staff of Parliament.
2. Parliament will provide a new networking LAN segment for each of the VC computers with access to the public internet.
