REQUEST FOR QUOTATION (RFQ)  
(Goods)

DATE: May 27, 2020  
REFERENCE: RFQ-SWZ-010-2020

Dear Sir / Madam:

We kindly request you to submit your quotation for the supply of rehabilitate Mlawula Nature Reserve Sara Camp Site, construction of Croc-pool (Ndzindza) picket, and rehabilitation of Mlawula Road Network for Mlawula Nature Reserve, as detailed in Annex 1 of this RFQ. When preparing your quotation, please be guided by the form attached hereto as Annex 2.

Quotations may be submitted on or before June 8, 2020 and via e-mail to the e-mail address below:

bidsubmission.sz@undp.org

Quotations submitted by email must be limited to a maximum of 5 MB, virus-free and no more than 4 email transmissions. They must be free from any form of virus or corrupted contents, or the quotations shall be rejected.

It shall remain your responsibility to ensure that your quotation will reach the address above on or before the deadline. Quotations that are received by UNDP after the deadline indicated above, for whatever reason, shall not be considered for evaluation. If you are submitting your quotation by email, kindly ensure that they are signed and in the .pdf format, and free from any virus or corrupted files.

Please take note of the following requirements and conditions pertaining to the supply of the abovementioned good/s:

| Annexes to this RFQP                   | ☒ Specifications of the Goods Required (Annex 1)  
                                      | ☒ Form for Submission of Quotation (Annex 2)  
                                      | ☒ General Terms and Conditions / Special Conditions: [link to UNDP website] |
|                                        | Non-acceptance of the terms of the General Terms and Conditions (GTC) shall be grounds for disqualification from this procurement process. |
| Contact Person for Inquiries           | bidsubmission.sz@undp.org                                                   |
| (Written inquiries only)²              | Any delay in UNDP’s response shall be not used as a reason for extending the deadline for submission, unless UNDP determines that such an extension is necessary and communicates a new deadline to the Proposers. |

Goods offered shall be reviewed based on completeness and compliance of the quotation with the minimum specifications described above and any other annexes providing details of UNDP requirements.

The quotation that complies with all of the specifications, requirements and offers the lowest price, as well as all other evaluation criteria indicated, shall be selected. Any offer that does not meet the requirements shall be rejected.

Any discrepancy between the unit price and the total price (obtained by multiplying the unit price and quantity) shall be re-computed by UNDP. The unit price shall prevail, and the total price shall be corrected. If the supplier does not accept the final price based on UNDP’s re-computation and correction of errors, its quotation will be rejected.

After UNDP has identified the lowest price offer, UNDP reserves the right to award the contract based only on the prices of the goods in the event that the transportation cost (freight and insurance) is found to be higher than UNDP’s own estimated cost if sourced from its own freight forwarder and insurance provider.

² This contact person and address is officially designated by UNDP. If inquiries are sent to other person(s) or address(es), even if they are UNDP staff, UNDP shall have no obligation to respond nor can UNDP confirm that the query was received.
At any time during the validity of the quotation, no price variation due to escalation, inflation, fluctuation in exchange rates, or any other market factors shall be accepted by UNDP after it has received the quotation. At the time of award of Contract or Purchase Order, UNDP reserves the right to vary (increase or decrease) the quantity of services and/or goods, by up to a maximum twenty-five per cent (25%) of the total offer, without any change in the unit price or other terms and conditions.

Any Purchase Order that will be issued as a result of this RFQ shall be subject to the General Terms and Conditions attached hereto. The mere act of submission of a quotation implies that the vendor accepts without question the General Terms and Conditions of UNDP indicated above - [http://www.undp.org/content/undp/en/home/procurement/business/how-we-buy.html](http://www.undp.org/content/undp/en/home/procurement/business/how-we-buy.html).

UNDP is not bound to accept any quotation, nor award a contract/Purchase Order, nor be responsible for any costs associated with a Supplier’s preparation and submission of a quotation, regardless of the outcome or the manner of conducting the selection process.

Please be advised that UNDP’s vendor protest procedure is intended to afford an opportunity to appeal for persons or firms not awarded a purchase order or contract in a competitive procurement process. **In the event that** you believe you have not been fairly treated; you can find detailed information about vendor protest procedures in the following link: [http://www.undp.org/content/undp/en/home/operations/procurement/protestandsanctions/](http://www.undp.org/content/undp/en/home/operations/procurement/protestandsanctions/).

**UNDP encourages every prospective Vendor** to avoid and prevent conflicts of interest, by disclosing to UNDP if you, or any of your affiliates or personnel, were involved in the preparation of the requirements, design, specifications, cost estimates, and other information used in this RFQ.

UNDP implements a zero tolerance on fraud and other proscribed practices and is committed to identifying and addressing all such acts and practices against UNDP, as well as third parties involved in UNDP activities. UNDP expects its suppliers to adhere to the UN Supplier Code of Conduct found in this link: [http://www.un.org/depts/ptd/pdf/conduct_english.pdf](http://www.un.org/depts/ptd/pdf/conduct_english.pdf)

Thank you and we look forward to receiving your quotation.

Sincerely yours,

**Shaima Hussein**

STRENGTHENING THE NATIONAL PROTECTED AREAS SYSTEMS OF ESWATINI (SNPAS) PROJECT

Terms of Reference (Lot Two)

Title: - Rehabilitate Mlawula Nature Reserve Sara Camp Site
- Constructions of Croc-pool (Ndzindza) picket.
- Rehabilitation of Mlawula Road Network

Country of Assignment: Eswatini
Starting Date: 20 June 2020
Duration of Assignment: 110 days

Background

Eswatini National Trust Commission’s (ENTC) Mlawula Nature Reserve plans to refurbish and rehabilitate the reserve’s campsite (Sarah), Rangers picket/post and road network. Sarah tented campsite is currently in a dilapidated state having the previous material been easily targeted and vandalized easily by wild animals, therefore the proposed structure of the campsite includes block work in replacement of the current tented canvas structure. The camp comprises of 6 tents including 2 ensuites, and 4 single units with a shared kitchen and ablution block. SARA camp has proven to be very popular for outdoor groups, both local and international. The camp therefore has a huge potential to generate revenue for the protected area, it just requires to be restored to its full potential.

The ENTC is planning to construct a ranger’s picket inside the Mlawula Nature Reserve having the old rangers picket vandalized and destroyed by trespassers; The newly proposed picket site known as Croc-pool area is rich in biodiversity and is highly populated with a variety of fauna and flora species. The Croc-pool area is located in the south-west of the park, about 17km from the main gate. There is no existing structure at Croc-pool, which means that the construction has to start from scratch and camping equipment is required. The picket structure comprises of 3 single rooms under one roof accompanied by a separate pit latrine toilet. The camp will hold a capacity of 3 field rangers at a given time. This picket will be utilized in combating poaching activities by providing the law enforcement unit services for clandestine patrols, a position for more mobile, intelligence and secretive operations. Building materials are already available for this particular project. A list of available materials will be made available.

All these facilities are connected by a road network of almost 37km, which stretches from the main gate to Magadzavane lodge. Currently the reserve’s game-viewing roads and access road are in bad state following damages caused by rainfall in previous years. The road network has potholes and gullies, which makes it inaccessible to low ground clearance vehicles. The current condition of the roads has a negative impact to park visitors; hence the park has also prioritized the rehabilitation of the tourists’ road network.

Job Description

ENTC invites local/International companies with the capacity to bid for the renovation and supply of building materials, heavy plant machinery, furniture and fittings to rehabilitate Mlawula Nature Reserve road network, Sara campsite and construct the croc-pool picket. The whole activity is aimed at achieving the objective of strengthening eco-tourism products and enhancing biodiversity conservation at the Mlawula nature reserve.

Objectives

1. Improve bed occupancy rates in the in the Sara campsite.
2. Improve the poor state of game-viewing roads.
3. Improve and strengthen law enforcement operations
Scope Of Work

ENTC is looking for a suitable supplier who has the capacity to renovate and supply building materials for the Sara campsite at Mlawula Nature Reserve. The required building materials and quantities are provided below; such goods must be of high quality.

Component 1: Renovation Sara Campsite

Background

SARA Camp is situated about two kilometres into the reserve from the main gatehouse. The camp was originally established by the Eswatini Archaeological Research Association (EARA). The SARA camp has six tents that sleep two people each. Two of these tents are self-contained (Ensuite) while the other four use a communal ablution block. The other four tents are just a single room sized and do not have bathrooms inside. Three of the tents have open shower overlooking the Mbuluzi Game Reserve. The camp includes a communal kitchen space called the Lapa and resting open Rondavel. The communal kitchen is shared by all guests visiting the camp. The camp has electricity supply and water supplied by tanker truck. These tents are currently in a poor condition and not functioning following that they were vandalized by Baboons.

Project Brief

The camp will be upgraded by constructing concrete walls on the existing tented camp platforms, (substituting the weaker tent material susceptible to wildlife vandalism with concrete). The existing platform that the upgrade will take place on includes concrete slaps and tiled roofing. Following the continuous destruction of the camp by Baboons, the park seeks to modify the tents structures by turning them into chalets. This will be achieved through building up walls using concrete blocks on the existing structure. This will prevent further damages to the facility.

A foundation has to be excavated in line with the poles that are currently supporting the roofing. The concrete walls will be built under the same roofing. Windows and doors will be installed on the walls for ventilation and lighting purposes. The walls will be plastered internally and be painted as well. Stone cladding will be applied on the exterior walls up to 1 meter high from the ground, thereafter the walls will be backwashed. Ceiling will be installed on the roofing and be painted white.

The structures are already wired and have electricity, but there is some work that needs to be done, which include the installation of 2 electric sockets wall plugs per chalet and the installation of lights on the ceiling. There is very little that needs to be done on the plumbing. This include the replacement of toilet led in one of the chalet and changing bib taps and replacing them with the press and release taps, which are Baboon proof. Door locks to be used on these structures should be security locks with baboon proof handles. This will be done to discourage the Baboons from causing further damages to the camp structures. The communal kitchen open space will be closed up by welding Mentex mash all around to prevent Baboons from entering the kitchen, destroying tourists’ food and kitchen equipment.

Some additional amenities, such as TVs & DSTV, air conditioners and bar fridges will have to be procuring and installed in all the chalets to add value for money and also to encourage prolong stay of our guests in the park. New furniture and fitting has to be procured and fitted into the chalets. A fridge, 4 plates electric stove, a microwave and kitchen utensil will be procure and fitted in the communal kitchen.

Single and Ensuite Tented Camps
Ensuite Rooms/ self-contained (Two Units)

Single Rooms (Four Units)

Supplier/Contractor’s qualifications

Component 1:
1. The contractor/supplier must be a registered distributor and have a traceable record of supplying high quality building, furniture and electronical materials with the Construction Institute Council (if local).(CIC)
2. The contractor/supplier must be experienced in well experienced in eco-tourism infrastructure development.
3. The contractor/supplier must be able to deliver all required materials to Mlawula Nature Reserve.
4. The contractor/supplier must guarantee timely delivery of the required building materials.

Component 2: The Construction of Croc-pool Picket and Solar Power Installation

ENTC requires the provision of construction services and supply as well as installation of the under listed solar power materials only, building material is available for the construction of the picket at the Mlawula Nature Reserve:

Background

The picket comprises of 3 single rooms under one roof and a pit latrine build separate. The camp can hold a capacity of 3 field rangers at a given time. The picket will be built inside the park, at Croc-pool area. The project include clearing the ground, excavating foundation, erecting a concrete slap, erecting the walls, fitting windows and door frames, plastering, beam filling, roofing, painting, plumbing and wiring a solar system. A double doors pit latrine will also be built on site, which shall be completed with the same project of picket construction.

Component 2: Supplier/Contractor’s qualification
1. A written guarantee with regards to the solar system, issued to the ENTC of an article by the manufacturer/supplier, promising to repair or replace it if necessary within a specified period of time from installation would be an added advantage.

2. The contractor/supplier must be a registered distributor of high quality building materials.

3. Previous experience in eco-tourism infrastructure development will be an added advantage.

4. The contractor/supplier must be able to deliver all required materials to Mlawula Nature Reserve.

5. The contractor/supplier must guarantee timely delivery of the required building materials.

6. The contractor must supply high quality solar energy fittings.

7. Company must be experienced in commercial production or distribution in the same line of products.

Component 3: Rehabilitation of Mlawula Nature Reserve Road Network (31 km)

Background
The Mlawula road network has potholes and gullies, which makes it inaccessible to low ground clearance vehicles. The current condition of the roads has a negative impact to park visitors, hence the park has prioritized the rehabilitation of the tourists’ road network. The damages to the road are caused by poor drainage system, which includes closed culverts and side drains.

This project will involve the digging of gravel soil that will be used in filling the potholes and gullies. A truck will be required to transport the gravel from the burrow pit to the areas where the gravel is needed. Once the gullies and potholes had been closed, a grader will be needed to level, smoothen the road surface and open up water ways on the side of the road. Manual labor will be required in opening up culverts.
The ENTC further requires heavy plant machinery to undertake the undermentioned activities

<table>

<tbody>
<tr>
<td>1. TLB <em>(to excavate gravel to be used on rehabilitating the road)</em> 40 hours</td>
<td>1</td>
</tr>
<tr>
<td>2. 10m³ Truck <em>(to ferry gravel from the barrow pit to the road)</em> 20 hours</td>
<td>2</td>
</tr>
<tr>
<td>3. Grader <em>(to work on the grading and levelling the surface road)</em> 40 hours</td>
<td>1</td>
</tr>
</tbody>
</table>

Supplier/Contractor’s qualification

**Component 3:**
1. Heavy plant machinery must be in good condition or working order, operating in full potential/efficiency.
2. The supplier or contractor must make sure the machinery is delivered on time at the project site.
**Information Required in the Response**

The provision of the pre-qualification information should include all relevant documents that are essentially required for meeting pre-qualification criteria as well as enable the project management to undertake the evaluation.

**Documents Required:**
1. Outline approach to be adopted when carrying out the task
2. Activities that will be undertaken and corresponding schedule to demonstrate how the allocated time will be utilized. (Gant chart or Work plan)
3. Profile of Company
4. Quotations and bids
5. Catalogues and brochures of required materials

**Payment Terms**

Payment upon delivery of all requested material at ENTC offices and delivery of invoice and vendor payment details will be according to the FIVE deliverable phases of the works

- Component 1
  - Phase 1: 90%
  - Phase 2: 90%

- Component 2
  - Phase 1: 90%
  - Phase 2: 90%

- Component 3
  - Complete: 90%

**Institutional Agreement**

- All interested potential bidders to attend the **COMPULSORY** physical site visit for complete understanding of Scope of Work prior to sending the formal bid.
- The winning bidder will be invited to meet with the supervision committee on expected outcome.
- All interested Bidders are encouraged to recruit at casual laborers from the neighboring communities, this can be facilitated by Mlawula Nature Reserve community outreach programme.

**Quality Assurance Methodology**

- An infrastructural supervision committee to do quality checks bi-weekly with a minimum of two site visitation in a month.
- Monitoring and evaluation of activities will be done routinely on weekly basis by the CLOs to generate weekly progress reports.
The contractor is expected to produce weekly progress reports.
- The contractor is expected to produce weekly progress reports.
- Retention of 10% will be made for each payment certificate as surety against defects and shall be remitted after two months of job completion.
- Retention fees remitted after clearance by supervision committee.

**Submission of Documents**

Submission of required documents should be no later than 8th June, 2020
