Consultancy for Provisions of Technical Services for Development of a National Adaptation Plan for Climate Change in Papua New Guinea

Location:	Port Moresby, Papua New Guinea
Type of contract:	Request for Proposals
Project:	National Adaptation Plan in Papua New Guinea
Languages Required:	English
Starting Date:	15 th September 2020
Duration of Initial Contract:	Approximately for the period of 14.5 months from the date of
	contract signing

Project Background

Climate change continues to negatively impact Papua New Guinea (PNG). This affects PNG's growth trajectory and the socio-economic opportunities people may otherwise enjoy. Building resilience to climate change has featured in national dialogue and political commitments for over a decade. Recognised as an acute challenge for PNG, Government and partners have committed to mainstream climate action in their planning and delivery. Major policy initiatives such as *Vision 2050* and the national *Strategy for Responsible Sustainable Development* have broadened efforts to include better natural resource management, conservation and sustainable growth. Growing legal architecture has supported these efforts. PNG's geography, its economic base, its exposure to external shocks and limited capacity across Government, however, make these challenges difficult to address. A phased approach to adaptation planning is required. This project will support PNG address these challenges through the following three project outcomes:

- **Outcome 1**: The coordination mechanism for multi-sectoral adaptation planning and implementation at different levels is strengthened;
- **Outcome 2:** Climate change risks are integrated into key national and sectoral policies and NAP is formulated; and,
- **Outcome 3:** Financing framework for climate change adaptation action for medium-to long-term is established.

The project closely aligns itself with ongoing relevant programmes aimed at mainstreaming climate change and reducing vulnerability such as a) USAID's Climate Change Ready Programme, b) GCF/GGGI supported GCF Readiness Support Programme, c) DfID's Climate Change Information and Knowledge Management Programme and complements the activities thus increasing efficiency and avoiding duplication of efforts. It will also coordination with the UNDP Climate Promise project supporting the Nationally Determined Contributions revision.

The primary beneficiaries of the project are the Climate Change Development Authority (CCDA), the sectoral representatives and non-government stakeholders in the project's Technical Advisory Group (TAG). The project will also benefit following key sectors: agriculture, health, transport and infrastructure.

The project is seeking the support of an organisation/firm to support the implementation of the project through the provision of technical advisory services.

Objective

The objective of this consultancy is to support the coordination, consultation, capacity building and development of the National Adaptation Plan (NAP) in Papua New Guinea.

Scope of consultancy

The team of experts will be expected to work closely with the NAP Project Management Unit and the CCDA and the ATWG at the national level, including other key Government stakeholders and United Nations agencies on daily basis to ensure the project activities are implemented in a more consultative and coordinated manner.

In order to achieve the above objective, the following tasks will be completed:

- 1. Conduct an initial meeting with the UNDP and CCDA to clarify the terms of reference, expectations, process and deliverables. The results of the inception meeting should be captured within an inception report, which will be approved by UNDP and CCDA before proceeding.
- 2. An action plan for development of the NAP will be drafted and validated to support the CCDA's coordination functions.
- Analyse the existing regulatory framework, national and sectoral policies, regulations and plans to identify entry points and opportunities to integrate climate risk considerations. Recommendations will also be made and validated to strengthen adaptation components in the regulations.
- 4. Sensitize key development planning and budgeting stakeholders on climate change adaptation. This should involve a development of a training methodology and content, in consultation with UNDP and CCDA, and the implementation of a series of workshops and trainings at national as well as provincial and local levels. Recommendations and action plan will be further refined and included as part of the capacity development plan.
- 5. Review and provide guidance to the steering committee's TOR to strengthen coordination functions of the National Designated Authority (GCF-NDA), the CCDA, and the NAP TAG, to enable an active and participatory approach to advance adaptation planning in PNG. The steering committee's (CCDA and TAG) TOR will be updated to support adaptation planning process.
- 6. Review the NAP-Global Support Programme capacity assessment tool and adapt to the PNG context, in consultation with local stakeholders. Apply the adapted tool to conduct gaps assessments focused on technical capacity related to climate change (climate change information, tools for integration, economic appraisal and prioritization of CCA interventions, project development, gender mainstreaming) for institutions part of the ATWG, and in particular Department of Agriculture and Livestock, Department of Transport, Department of Works, Department of Health, and local and village disaster committees to improve coordination across sectors and different levels of government to advance adaptation planning. Individual and institutional capacity gaps will be assessed for CCDA, ATWG and its constituent organizations with representation of national and provincial levels, and a capacity development plan will be drafted and endorsed under this activity.
- 7. Identify appropriate indicators to monitor climate change impacts with focus on gender sensitive indicators, in collaboration with DFAT's iCLIM project (focused on improving access to and use of climate information for decision making and knowledge management) and align with IKM project outputs. Gender-disaggregated indicators and data collection procedures for climate change will be developed and integrated into the existing IKM system under this activity.
- 8. Strengthen the IKM project to include climate change adaptation related database accessible to all stakeholders. This activity will require the addition of database layers to complement the IKM national portal (centralized repository of weather and climate related data) for public dissemination.

- 9. Development and implementation of training modules, in close cooperation with UNDP and CCDA, and implementation of capacity building events for relevant stakeholders and levels of government to report on and utilize information for decision making on adaptation, specifically at provincial and local levels. It is intended that the training workshops will help familiarize key stakeholders on monitoring and evaluation of adaptation, using existing and ongoing projects and programmes.
- 10. Development of a national lessons learned and best practices of adaptation interventions report in the country to encourage scaling up of successful approaches. Lessons from adaptation interventions in the country should be compiled on an ongoing basis.
- 11. Develop a guideline on how to appraise individual adaptation options, including costs and benefits for unintended impacts of adaptation measures in PNG. Economic valuation tools such as CBA, CEA, MCA should be reviewed for relevance, adapted and adopted along with guidelines for integration and prioritization in the priority sectors.
- 12. Develop and implement a training programme on economic valuation for the four prioritised sector ministry officials.
- 13. Adapt the national guidelines (noted above) to provincial and local levels and sub-national planning process and provide a series of provincial level workshops for planning officials. The number, timing and locations of workshops should be stipulated in the technical proposal.
- 14. Compile existing adaptation information for key priority areas, namely agriculture, health, transport, and infrastructure, including existing vulnerability assessments and identifying information gaps.
- 15. Identify and appraise options for climate change adaptation in the four priority sectors based on findings. The appraisal process should include the use of UNDP tools on multi-criteria analysis and cost-benefit analysis. Options for adaptation action in the priority sectors should be identified, prioritization tools should be developed and options prioritized through stakeholder consultations.
- 16. Draft the National Adaptation Plan, based on the results of the tasks above and in line with the UNFCCC requirements, and present the draft report at a national workshops. Review and update the plan based on comments received from the validation workshop and peer review process.
- 17. Utilise existing UNDP tools on Integrated National Financing Framework (https://sdgintegration.undp.org/INFF) and Climate Public Expenditures and Institutional Review (CEPIR) to develop CCA markers and budget codes that aligns with the Government's Integrated Financial Management System (IFMS) to track adaptation investments in country in close collaboration with the Department of Finance and Department of National Planning and Monitoring. Criteria for adaptation related activities in public investment programs, along with relevant markers should be identified and validated with Government partners.
- 18. Prepare and implement training on the CCA relevant budget codes to track investments in adaptation with relevant officials.
- 19. Develop NAP financing and investment strategy through consultative process with public and private sector as well as community and vulnerable group stakeholders, in close collaboration with the GCF Readiness Support project.
- 20. Develop four pre-feasibility studies for priority sectors (agriculture, health, transport and infrastructure), in close collaboration with the GCF Readiness Support project. These proposals will be developed based on assessments and information readily available and validated through consultations as part of this activity.
- 21. Provide monthly progress reports to the UNDP and CCDA team.
