a. Background Information and Rationale, Project Description

The Government of the Kingdom of Eswatini has ratified the Paris Agreement that seeks to hold the increase in the global average temperature to well below 2 °C above preindustrial levels and pursuing efforts to limit the temperature increase to 1.5 °C2 above preindustrial levels. In addition, Eswatini has submitted its Nationally Determined Contribution (NDC) to the United Nations Framework Convention on Climate Change (UNFCCC). The NDC is considered as a policy document which has an overall objective of putting the country on a Low carbon climate resilient pathway and aimed at assisting the country to contribute towards the achievement of the global temperature goal.

As a developing country with about 69% of the population living on less than \$1, the Nationally Determined Contribution for Eswatini to Paris Agreement on Climate change emphasizes adaptation measures while at the same time reducing greenhouse emissions by 20% by 2030 from the business as usual baseline of 2010.

Following COP-21, attention has turned from developing and submitting NDCs to revising and updating the NDCs for a more ambitious and inclusive effective implementation of the contributions. UNDP plays a central role in building countries' capacity to strengthen and implement NDCs, given its previous INDC support experience, its technical expertise in related areas, and its on-the-ground presence in over 170 countries.

As part of enhancing climate action in Eswatini in line with her commitment to Paris Agreement, Government has embarked on the NDC revision process under the Climate Action Enhancement Package (CAEP) with support from development partners that include, United Nations Development Programme (UNDP), Common Market for Eastern and Southern Africa (COMESA), Commonwealth Secretariat, Food and Agriculture Organization (FAO), United Nations Environment Programme (UNEP), World Resources Institute (WRI); and NDC Partnership Support Unit.

UNDP through its Climate Promise Initiative is supporting Eswatini to revise her NDC commitment including; i) Building Political Will, whole of government and whole of society ownership; ii) Review, align and update existing targets, policies and measures; iii) Incorporate new sectors and/or GHGs; iv) Assess costs and Investment opportunities for attaining targets; v) establish mechanisms to monitor progress & strengthen transparency; and vi) Preparing the revised NDC document.

It is against this background that UNDP is seeking a competent firm to support Ministry of Tourism and Environmental Affairs in collaboration with other NDC Partnership members to facilitate revision and enhancement of NDC so that its implementation serves as a driver for sustainable development at the

national level and contributing to the global Sustainable Development Goals (SDGs), including transitioning to a climate resilient and zero-carbon economy.

b. Scope

The firm will work with public, relevant non state actors, UN agencies and development partners to update Eswatini's NDC and raise its climate ambition and enhance its implementation under the Paris Agreement.

- d) Undertake business case study to scope investment opportunities for private sector climate action that can help identify more ambitious actions for enhanced NDC
- e) Conduct analysis of policy and legal framework to identify financial and non-financial interventions needed to address barriers limiting private sector investment in the prioritized NDC actions to guide preparation of public-private strategy for realizing NDC targets
- f) Undertake alignment of NDC targets and indicators with the SDG, NDP, Sendai monitor and Voluntary National Reviews (VNR) and national Monitoring, Review and Evaluation systems
- g) Develop integrated MRV tool; and conduct NDC tracking and reporting training programme for specific institutions leading the NDC implementation and advise on how to structure NDC content to best align with the Paris Rulebook and Enhanced Transparency Framework (ETF).
- h) Develop a communication package to enhance awareness of NDC and Climate Change to public and private stakeholders

- Conduct metabolic (economy wide) assessment through the analysis of the flows, conversions and stocks of materials and energy which constitute the metabolism of Eswatini to bring the most promising low carbon development strategies to the surface
- Elaborate adaptation targets with the objective to identify resilience actions to reduce vulnerability and effectively adapt to current and future climate change impacts
- Disaggregate and quantify current mitigation targets and additional sector emission targets not catered for and ensure these are fully aligned with the National Development Plan 2019/20 – 2021/22 and the Master Plan for Economic Recovery and Transformation (2019-2023)
