## 4. Evaluation

The technical component will be evaluated using the following criteria:

	Consultant's experience/qualification related to the services	Score
1.	Master's degree or higher in a relevant field, such as forest management and policy, land-use policy and planning; public policy; environmental policy, landscape conservation	100

2.	Minimum 10 years of demonstrable experience in sustainable forest management, forestry, forest law enforcement, sector and land use planning	300
3.	Demonstrated understanding of political, legal and institutional context and priorities for sustainable forest management and land-use planning in Viet Nam;	150
4.	Demonstrated experience of formulation of projects/programmes with track record of leading and managing multi-disciplinary teams in the field of forestry sector and/or biodiversity and landscape conservation;	300
5.	Excellent communication skills, including strong ability in written and oral in both Vietnamese and English (at least two English sample reports in relevant subjects submitted)	150

A two-stage procedure is utilized in evaluating the submissions, with evaluation of the technical components being completed prior to any price proposals being opened and compared.

The price proposal will be opened only for submissions that passed the minimum technical score of 70% of the obtainable score of 1000 points in the evaluation of the technical component. The technical component is evaluated on the basis of its responsiveness to the Term of Reference (TOR). Maximum 1000 points will be given to the lowest offer and the other financial proposals will receive the points inversely proportional to their financial offers. i.e.  $S_f = 1000 \times F_m / F$ , in which  $S_f$  is the financial score,  $F_m$  is the lowest price and  $F$  the price of the submission under consideration.

The weight of technical points is 70% and financial points is 30%.

Submission obtaining the highest weighted points (technical points + financial points) will be selected subject to positive reference checks on the consultant's past performance.

Interview with the candidates may be held if deemed necessary.

## TERMS OF REFERENCE

### Sustainable Forest Management Expert for UNDP-GEF Project Development (Project Preparation Grant Deputy Team Leader)

<b>Country</b>	Viet Nam
<b>Project name</b>	<i>Sustainable Forest and Forest Land Management in Viet Nam's Ba River Landscape</i>
<b>Position</b>	<i>SFM Expert/Deputy Team Leader</i>
<b>Type of appointment</b>	Individual contract
<b>Location</b>	Ha Noi with travel to Gia Lai and Phu Yen provinces.
<b>Duration</b>	45 days full-time during October 2020 – July 2021

#### I. Context

The Global Environment Facility in its Seventh replenishment (GEF-7), with a view to maintain or improve ecosystem services, land productivity, food security, and to increase the resilience of the land and the populations dependent on it, provides supports to the United Nations Convention to Combat Desertification (UNCCD)'s Land Degradation Neutrality (LDN) concept. The GEF-7, through its Biodiversity Focal Area programming, responds directly to the GEF7 Four-year Framework of Program Priorities agreed by countries at Convention on Biological Diversity (CBD) Conference of the Parties (COP)-13, as well as the Strategic Plan for Biodiversity, 2011-2020. Specifically, the proposed Biodiversity Focal Area is built around achieving three objectives: (i) Mainstream Biodiversity Across sectors as Well as Within Production Landscapes and Seascapes, (ii) Reduce Direct Drivers of Biodiversity Loss, and (iii) Strengthen Biodiversity Policy and Institutional Frameworks. Moreover, the GEF to continue and further enhance means to harness opportunities for leveraging synergies among the Rio Conventions and other relevant multilateral environmental agreements.

In line with the GEF-7 strategic and synergistic programming for Combating Land Degradation and Biodiversity Conservation, the project "Sustainable Forest and Forest Land Management in Viet Nam's Ba River basin landscape" aims to conserve forest biodiversity and maintain or improve the flow of ecosystem services through sustainable forest management embedded in a coordinated landscape-level approach across Ba River basin. More specifically, the project will implement following three (3) components to achieve its objective:

Under Component 1, the project will primarily build mechanisms and raise capacities to support the mainstreaming of biodiversity into management of forest landscapes in Viet Nam. As a result, institutions operating at national, provincial and target district levels, including relevant forest protection departments and district ranger boards, will have enhanced tools and capacities available in areas designed to enable landscape-level assessments and action planning.

In Component 2, the project will support a participatory, coordinated approach to the management of an estimated eight (8) Forest Management Units plus two (2) community-

managed areas located within Ba River basin helping achieve improved management of globally significant forests covering approximately 156,000 ha. The identified project landscape in Gia Lai and Phu Yen includes a cross-section of special use forests, protected forests, production forests and community-managed areas, representing the mosaic of forest types and managers that is common across Viet Nam.

And finally, Component 3 will bring together policy mainstreaming, knowledge exchange and replication in a way that aims to optimize synergy and exchange among critical project outputs. In addition, while Components 1 and 2 focus on developing and demonstrating various approaches and methodologies, Component 3 will help to review, identify and address additional gaps in the relevant enabling environments, whether these are at national, provincial or district levels. It will do so based on lessons learned and knowledge gained during the project implementation, and their integration into guidance and recommendations for further policy improvement.

The project will deliver global environmental benefits by the adoption of biodiversity-friendly and SFM practices that will reduce land degradation, secure ecosystem services and mainstream biodiversity conservation. Specifically, the project will improve connectivity and increase High Conservation Value Forest (HCVF) areas; improve management effectiveness in three (3) protected areas covering 71,088 ha, including recognized Key Biodiversity Areas (KBAs); restore 500 ha of forest land resulting in improved biodiversity conservation in Viet Nam and contributing towards Viet Nam's LDN target.

## **II. Project Preparation Phase**

The objective of the GEF PPG is to develop the project concept into a full project: Sustainable Forest and Forest Land Management in Viet Nam's Ba River basin landscape. The project's aim is to conserve forest biodiversity and maintain or improve the flow of ecosystem services through sustainable forest management embedded in a coordinated landscape-level approach across Ba River basin.

The GEF PPG team will be composed of the following:

1. International GEF Project Development Specialist (GEF PPG Team Leader)
2. National Sustainable Forest Management (SFM) Specialist (Technical Coordinator of national PPG team)
3. National Policy and Institutional Specialist
4. National Biodiversity and Protected Area Specialist
5. National Communities, Gender and Livelihoods Specialist
6. National Safeguards Specialist
7. National Forest Monitoring and GIS Specialist

## **III. Duties**

The National Sustainable Forest Management (SFM) Specialist will be the technical coordinator for the national PPG team and will be responsible for developing project interventions to support the mainstreaming of SFM and biodiversity conservation into land use planning processes, inter-agency coordination and institutional processes, to support the development of the UNDP Project Document (ProDoc). Specifically, the consultant will lead content development related to multi-sector land use planning and coordination platforms, landscape-level conservation, financial incentives including payment for forest ecosystem services (PFES), monitoring & evaluation, and knowledge management, along with contributions to site-based interventions to strengthen capacity and operations of Forest Management Units (FMU) in Ba River basin.

The SFM specialist will work closely with the UNDP Viet Nam Country Office, and national counterparts in the preparation of documentation required for submission of the above-

mentioned PIF to the GEF. Under this working arrangement, the national consultant is expected to support the international consultant the tasks, not limited to follows:
