

Bidders Clarifications 02

Date: 25 Sep 2020

RFP No.: UNDP CYP RFQ 079 2020

Project Designs for the Rehabilitation of Kouklia/Kukla Reservoir

Bidders Questions and Answers

No	Question	Answer
1	Ref. "A. Designs Phase" page 7 of 22: "Surveys/measurements of the reservoir boundaries taking into account the cadastral boundaries;" Will the coordinates of the boundaries be given to us by the UNDP?	The UNDP will provide the coordinates of the boundaries but it will still be the responsibility of the service provider to verify them.
2	Ref. "A. Designs Phase" page 7 of 22: "Measurement of depths of the reservoir levels at various locations of the reservoir and recorded on plan/map to enable calculation of quantities of silt". Are these measurements to be made when the reservoir is full of water?	It is intended for the assignment to start within October during which the reservoir is at its lowest. Some parts of the reservoir will be dry and should remain so until the end of November depending on the weather conditions.
3	Ref. "general": Will the UNDP provide "working Visas" for Greek Cypriots or other nationalities to work on the northern part of Cyprus?	It is the responsibility of the service provider to obtain all relevant permissions for the staff working on the assignment.
