

UNDP-RFP-2020-215-Integrated Digital Platform

(PAK10 – 0000007313)

Clarification Responses

Question 1: The scope of the integrated digital platform is open-ended as it is not mentioned how many Management systems need to be integrated with it and neither the scope/complexity of any system is mentioned. Similarly, it is mentioned that the subsystem for wildlife and forests may also be developed. What will be its scope?

Answer: There are national and provincial MIS & GIS systems, which will be mapped and integrated. Regarding sub-systems: Yes, subsystems for Forest, Wildlife, and Zoological survey will also be developed

Question 2: How many mobile apps are required to be developed?

Answer: Initially we are expecting three mobile apps for iOS and Android. It may enhance depends on requirements.

Question 3: For the digital library, is there any system in place at the moment? if not, how the data is organized? Will it be a standalone module or it will be part of the Web portal?

Answer: There is no digital library system currently. This system will be studied and designed. Data will be organized based on available soft and hard material (Print & Electronic).

e.g. Contracts/Rules, Surveys, Blogs, White Papers, Researches, Studies, Videos, Documentaries, etc.

Question 4: Do we need to quote for annual cloud hosting as well at the proposal stage or we will just propose the right hosting plan after a detailed analysis of requirements and ministry will pay for it separately?

Answer: Hosting Plan will be quoted and paid by the software firm.
