Background

The United Nations Development Program (UNDP) in partnership with the Department of Information and Communications Technology (DICT), Republic of Philippines, aims to accelerate the roll-out of the Free Public Wi-Fi For All Project. The Project is targeted to contribute in closing the digital divide in the Philippines by bringing in viable options for providing internet service to unserved and underserved communities. UNDP is tasked using its National Acceleration Modality to draw international expertise and apply its procurement system for managed services contracts for designated areas that currently have no or limited access to internet in public places. This DICT-UNDP partnership will target expansion of internet access for up to 6,000 additional sites. Contracts have been awarded for 5,000 sites. To complete the initial target for the partnership of 6,000 sites, this third phase ITB (ITB-085-PHL-2020) is for the remaining minimum of 1,000 sites.

On August 2, 2017, Republic Act No. 10929 otherwise known as the Free Internet Access in Public Places Act of 2017 was enacted mandating the DICT as the lead implementing agency to oversee the effective and efficient implementation of the Free Public Wi-Fi For All Project. Under the Program, no fees shall be collected from users to connect to public internet access points to be installed in public places throughout the country that may include but not limited to national and local government offices; public basic education institutions; state universities and colleges/ (Technical Education and Skills Development Authority) technology institutions; public hospitals, health centers and rural health units; public parks, plazas, libraries, and barangay reading centers; public airports and seaports; and public transport terminals.

This Invitation to Bid (ITB) is focused on providing **Fully Managed Internet Connectivity Services to minimum of 400 state universities and colleges (SUCs) in 67 provinces with at least 1,000 access points in total.** An SUC shall have maximum of three (3) Wi-Fi hotspots depending on its size of population and/or area. The service is for a duration of twelve (12) months renewable for an additional period of up to 24 months.
