Notes:

- 1) Steel columns and frames to be constructed with necessary foundations or plates on the slab on grade, the proposed steel structure is proposed in red. The steel frame to be attached with brackets and anchor screws to the existing balcony slabs. The steel frame is 100x100 mm with thickness of 5mm.
 - 2) The aluminum grid to be supplied and installed onto the steel frame, the grid spaces vary depending on the Alucobond panels, see previous sheet for dimensions.
 - 3) CNC cut alucobond panels to be installed on the aluminum grid. Colour of materials to be determined by supervising engineer or client
- The contractor should provide shop drawings or other solutions for this facade installation.
