Review of Administrative Datasets and Surveys for Estimation of SDGs Indicators

A. Project Title: Mainstreaming, Acceleration and Policy Support for SDGs in Punjab

B. Background

In pursuance to United Nation's General Assembly Resolution on Agenda 2030, National Assembly of Pakistan passed a resolution declaring Sustainable Development Goals (SDGs) as National Goals for Pakistan in February 2016. As part of Pakistan's institutional arrangements under the "National Initiative on SDG", Planning & Development Board, Government of the Punjab established Punjab SDGs Support Unit in June 2016.

In the light of the lessons learned from MDGs era, the government of Punjab under the National initiative on Sustainable Development Goals (SDGs) established Punjab SDGs Project at Planning & Development Department (P&DD) in collaboration with United Nations Development Programme (UNDP). The overall purpose of SDGs Project is to support provincial government and line departments for mainstreaming SDGs at provincial and district level—integrating different dimensions of SDGs into planning and budgeting processes.

C. Rationale and Objective

The role and the capacities of national and sub-national statistical systems are crucial for effective monitoring and reporting of 2030 Agenda on SDGs across social, economic and environmental dimensions of sustainable development. The era of MDGs in Pakistan witnessed weak statistical capacities at the national and sub-national level for timely collection, analysis and reporting on MDGs indicators. That is why for many of MDGs indicators, despite allocating resources, Pakistan could not measure the progress. This shows a lack of the statistical capacities and there needs to be a thorough review of statistical capacities to ensure timely collection of reliable data on SDGs indicators to ensure effective monitoring, reporting and performance management.

The 2030 Agenda on SDGs due to its ambitious nature, put a lot of burden on statistical capacities of the national governments to report on 244 indicators. In this regard, a thorough review of national statistical capacities to identify gaps and recommendation to enhance statistical capacities is essential. In Pakistan, after the adoption of SDGs, review of national statistical capacities with respect to 244 SDGs indicators started in 2016. The analysis at the national level reveals that, 43/244 indicators are global in nature and they are not applicable to the national context; while almost half of the remaining 201 indicators, data is fully or partially available and for the remaining half, major efforts are required to address data gaps.

The analysis of data eco system at the national level lays a strong foundation for the provincial governments to further analyze their statistical capacities to ensure efficient and effective data collection on SDGs indicators, applicable at the provincial level. The process started in 2018, where Punjab SDGs Unit, P&D Board analyzed all public data sources including household surveys, administrative datasets available with different line departments and publications available at national and provincial level. The analysis at the provincial level reveals that, out of 244 indicators, 161 indicators are applicable to Punjab, whereas remaining 85 indicators are the combination of global and national level indicators, which are not relevant to the provincial context. Out of total 161 SDGs indicators which are relevant to the provincial context, there is data available for only 70 indicators in Punjab (fully or partially). To address the data gaps, there is needed to thoroughly examine all public databases

including administrative datasets and surveys and using these datasets to compute SDGs indicators for which values/estimates are not available at the provincial level.

In this regard, Punjab SDGs Unit, intends to hire the services of an experienced Statistician who will work in close collaboration with P&D Board, Punjab Bureau of Statistics and provincial line departments to compute indicators using existing data from various public sources including institutional and household data.

D. Scope of Work

- Explore the international practices being used to overcome the gaps of SDGs indicators.
- Examine and explain the current data ecosystem of the Punjab Bureau of Statistics and Provincial line department.
- Examine the strength of the data available with BOS and line Departments in terms of estimation of the SDGs Indicators
- Identify all the sources of the data and household data available with the BOS and line departments, which can be used to compute the relevant indicators.
- Identify indicators that can be computed using the administrative and household level data at the province/district, whichever is relevant.
- Analyse SDG's data gaps for the Government of the Punjab and indicate all the variables for which data is not available from any source in the Province.
- Identify lead (federal or provincial) government or non-government agency for data gathering and coordination at different levels for this purpose.
- Based on the analysis of the formats on which data is being gathered, estimation of the possible indicators from the administrative data and identification of missing variables as suggested in meta data, suggest possible measures/alterations in the current data collection formats with the aim to capture the possible variables in a cost effective manner
- Suggest the level of efforts segregated as minor, medium and major to be required for collection of data on the missing indicators
- Examine the format in which the administrative and household data is being compiled, analysed and published and suggest improvements in line with SDGs requirements.
- Synchronize existing definitions of data variables and indicators with those of SDGs indicators
- Compute the identified indicators for 2015 to 2019 while ensuring compliance with the standards given in the meta data for each indicator. In certain cases, meta data does not give any definition, in those cases consult with the relevant department and other possible cross cutting stakeholders to agree on a national definition.
- Prepare the report of all administrative data that includes
 - Relevant source & format by sector
 - Lead ministry/department and the disaggregation level
 - Computation methodology in line with SDGs metadata in local context
 - Efforts needed if indicators cannot be computed using the available information
 - Propose a proxy indicator if data is not available to compute the required indicator
 - Timeline for each indicator
 - Inclusion (mechanism) in the dashboard portal
- Propose the surveys to collect data for missing indicators required for SDG's and carry out necessary computations for the missing SDG indicators (administrative and household)
- Propose practical recommendations for filling the missing SDG indicators and provide the computations needed.

- Work closely with Punjab Bureau of Statistics, P&D Board and Provincial Line Department for understanding the provincial data ecosystem, its strengths and weaknesses with respect to SDG's.
- Present initial computations of SDG's indicators of Punjab SDG's Unit, P&D Board and D.G, BOS.
- Present the missing SDG indicators computation at a workshop to all provincial stakeholders.
- Training of Statistical Officers on information & comparison of SDGs indicators in Punjab Bureau of Statistics and provincial line department for reporting of SDG's at the provincial level.

Where the parties wish to seek such an amicable settlement through conciliation, the conciliation shall take place in accordance with the Conciliation Rules then obtaining of the United Nations Commission on International Trade Law ("UNCITRAL"), or according to such other procedure as may be agreed between the parties in writing.

ARBITRATION: Any dispute, controversy or claim between the parties arising out of the Contract, or the breach, termination, or invalidity thereof, unless settled amicably, as provided above, shall be referred by either of the parties to arbitration in accordance with the UNCITRAL Arbitration Rules then obtaining. The decisions of the arbitral tribunal shall be based on general principles of international commercial law. For all evidentiary questions, the arbitral tribunal shall be guided by the Supplementary Rules Governing the Presentation and Reception of Evidence in International Commercial Arbitration of the International Bar Association, 28 May 1983 edition. The arbitral tribunal shall be empowered to order the return or destruction of goods or any property, whether tangible or intangible, or of any confidential information provided under the Contract, order the termination of the Contract, or order that any other protective measures be taken with respect to the goods, services or any other property, whether tangible or intangible, or of any confidential information provided under the Contract, as appropriate, all in accordance with the authority of the arbitral tribunal pursuant to Article 26 ("Interim Measures of Protection") and Article 32 ("Form and Effect of the Award") of the UNCITRAL Arbitration Rules. The arbitral tribunal shall have no authority to award punitive damages. In addition, unless otherwise expressly provided in the Contract, the arbitral tribunal

shall have no authority to award interest in excess of the London Inter-Bank Offered Rate ("LIBOR") then prevailing, and any such interest shall be simple interest only. The parties shall be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of any such dispute, controversy or claim.

18. LIMITATION ON ACTIONS: Except with respect to any indemnification obligations in Article 9, above, or as are otherwise set forth in the Contract, any arbitral proceedings in accordance with Article 17, above, arising out of the Contract must be commenced within three (3) years after the cause of action has accrued.

The Parties further acknowledge and agree that, for these purposes, a cause of action shall accrue when the breach actually occurs, or, in the case of latent defects, when the injured Party knew or should have known all of the essential elements of the cause of action, or in the case of a breach of warranty, when tender of delivery is made, except that, if a warranty extends to future performance of the goods or any process or system and the discovery of the breach consequently must await the time when such goods or other process or system is ready to perform in accordance with the requirements of the Contract, the cause of action accrues when such time of future performance actually begins,

19. PRIVILEGES AND IMMUNITIES: Nothing in or relating to the Contract shall be deemed a waiver, express or implied, of any of the privileges and immunities of the United Nations, including its subsidiary organs.
