Description of Requirements

Context of the Requirement	<p>Armenia has experienced a significant growth of injecting drug use (IDU) during recent years. Illicit drugs (predominantly natural home-made opioids) are trespassing to the territory of Armenia mainly from the border crossing point between the Republic of Armenia and Islamic Republic of Iran. Drugs are also diverting from Turkey via border crossing points between Armenia and Georgia. A new emerging drug desomorphine made from codeine-containing pills becomes very popular which leads to severe medical problems in a very short period of time. According to the recent study of “Estimating the size of populations of sex workers, men who have sex with men, and injecting drug users in Armenia” made by the National Centre of AIDS Prevention (NCAP) with the support of Joint United Nations Programme on HIV/AIDS (UNAIDS), the estimated average population of people who inject drugs (PWID) in Armenia was 12,700 (8,300-27,500) in 2010 which suggests the population-adjusted average prevalence to be 0.62 percent (0.41-1.35)¹. Natural and synthetic opioids are the most problematic drugs in Armenia.</p> <p>Drug epidemiological data are often inconsistent and not reliable. Treatment Demand Indicator (TDI) is one of the five EMCDDA (European Centre for Drugs and Drug Addiction) key epidemiological indicators which provide objective, reliable and comparable information concerning drugs, drug addiction and their consequences. The TDI has never been implemented in Armenia.</p> <p>Drug surveillance system in Armenia is underdeveloped. The cooperation and exchange of information often is lacking among drug related agencies, or is not legally streamlined.</p> <p>2009-2012 National Drug Strategy (NDS) is over; the Government of Armenia needs to be encouraged to adopt/update the NDS;</p> <p>After the completion of the EU funded and UNDP implemented South Caucasus Anti-Drug Programme (SCAD) in 2009, no concrete interventions were done in the area of drug prevention in support to the Government efforts. The National Drug Monitoring Center under the Ministry of Health produced the 2012 Annual Drug Report², which need to be translated into English and disseminated among the international organizations.</p> <p>Since September 2012, UNDP implements the “Modernization of Bagratashen, Bavra and Gogavan BCPs of Armenia” Program (MBBG) funded by the GoA through the EU loans (EUR 30.3 Million) and Neighbourhood Investment Facility grant (EUR 12 Million). UNDP co-finances the implementation of the MBBG project, which is a framework Programme aimed at upgrading of border, road infrastructures, networks and development of capacities of border management agencies (National Security Service, Police, Customs, Health and State Food Security Service).</p>

	<p>In addition to the MBBG project, UNDP implements the border management capacity development project with the funds provided by the EU, within the Eastern Partnership IBM Flagship Initiative. It is expected that border infrastructures will be upgraded; the capacities of the border management to manage migration flows and combat the illicit drugs and human trafficking will be enhanced. The capacities of border management agencies, when it comes to drug control and drug prevention, need to be strengthened in consideration of the reliable Drug Information Systems to better understand the causes, trends and patterns of drug trafficking and consumption.</p> <p>The strengthened capacities of border management agencies and consistent information, in long term, will improve the situation in drug control area, as well as in the area of HIV/AIDS. The integration of the proposed initiative into the agenda of the above-mentioned border management agencies will allow for the establishment of a comprehensive Drug Information System (DIS) to help the respective national authorities to effectively cope with the problem.</p> <p>The Czech Republic started to build its Drug Information System (coordinated by the National Focal Point / National Drug Observatory) in the framework of accession process to the EU in late 1990s. In 2002, it was evaluated as the best practice example by the European Monitoring Centre on Drugs and Drug Addiction (EMCDDA) and since then, it is constantly assessed as one of the best Drug Information Systems in the EU, and globally. The Czech expertise in building Drug Information Systems has been used and further developed by Czech experts in numerous projects and occasions since then; they contributed to the establishment of the DIS in Eastern Europe (Ukraine, Moldova, Belarus), West Balkan (in particular, Serbia), in Central Asian countries and elsewhere. They also set up the basics of monitoring system in Armenia during the SAD project (2005-2009). To date, it is reasonable to consider the Czech know-how and expertise to be the most relevant for Armenia.</p>
