Annex 1**Description of Requirements**

Context of the Requirement	<p>UNDP is committed into two very important projects jointly with the Ministry of Tourism and Environment (MoTE) which address assistance in biodiversity conservation and ecosystem management, as well as strengthening the capacities and equipping the human resource, namely National Agency of Protected Areas (NAPA) and Regional Administration of Protected Areas (RAPAs), dedicated to protected areas management and administration with tools and know how that enhance the financial sustainability.</p> <p>Through the Italian Agency for Cooperation and Development (AICS) / the Italian government support, the project on Improving coverage and effectiveness management of Marine and Coastal Protected Areas (MCPA) Phase II, implemented targeting Karaburun-Sazan Marine Park, as an essential complement to its network of terrestrial PAs and contributes to Albania's obligations under different UN Conventions and the EU accession process. In the meantime, the project is applying a BIO-GIS Master Plan tool to increase nature protection and manage economic values of biodiversity.</p> <p>The other project financed by GEF, Ministry of Tourism and Environment and UNDP, intends to improve the overall management effectiveness of the country's system of protected areas, addressing the gaps existing with the current funding for the PA system, and the capacities to administer and improve PA revenue streams. Therefore, the MoTE and its agencies are making concerted efforts to secure sufficient, stable and long-term financial resources for protected areas; to allocate these resources in a timely manner and appropriate form to cover the full costs of protected areas; and to ensure that the protected areas are managed effectively and efficiently with respect to conservation and other complementary objectives. Thus, activities are focused at two levels of support: building the financial management capacities of the agency responsible for administering the system of protected areas (NAPA); and demonstrating the efficacy of different financing strategies in a sub-set of National Parks: (i) Dajti National Park (DNP); (ii) Divjaka-Karavasta National Park (DKNP); and (iii) the Llogara-Karaburuni protected area complex (LKC).</p>

Brief Description of the Required Services ¹	<p>The main scope of the consultancy is to increase professional capacities of PAs' staff through training and learning, to enable use of the e-learning platform https://akzm.net/list-courses, to develop their skills on the management of PAs and contribute to fund generation.</p> <p>Based on the training modules listed in the e-learning platform, assess the urgent needs and target audience(s) and specify the best modalities for providing training in 4 areas /sites and conduct training.</p>

¹ A detailed TOR may be attached if the information listed in this Annex is not sufficient to fully describe the nature of the work and other details of the requirements.

	<p>This kind of training needs to address different categories of employees / different background profiles and adopt the skill-based training at different levels of learners/staff, according to their skill.</p> <p>The project intends to deliver on job training, looking for cost effective and flexible and easily accessible forms of training; the main principles to comply with while developing and delivering this tool are:</p> <ul style="list-style-type: none"> - Fresh staff employed at NAPA/RAPAs might require to quickly get familiar with PA management and conservation patterns of the system, thus the onboarding e-learning training would be very useful (delivers consistent and engaging training, allows learners to explore and learn more about different departments) - Ensure that staff follow rules and regulations in the workplace (periodic reinforcement of the training) and they must be aware of the products and services in the PAs system - Keep assessing & upgrading from time to time <p>Another element of this process is the build-up knowledge on conservation and management issues, which will be carried out by the multidisciplinary team of experts, which based on their knowledge and crosscut experiences on PAs management and administration, will moderate throughout the training courses specific know-how and knowledge</p> <p>For this reason, the specific objectives to be accomplished and respective tasks are:</p> <ol style="list-style-type: none"> 1. Acquaintance of the environmental experts with relevance to subjects of the e-learning platform and training capacities. 2. Define the capability of PAs staff and the needs for improvement of the platform <p>This requires a high profile and experienced team of experts in protected areas management practices and know-how. This consultancy will be carried out in three phases: preparation, implementation and reporting. The project office will supervise and coordinate all phases.</p> <p><i>a) Preparatory phase – 2 months</i></p> <p>The activities to be carried out during this phase will contribute to clearly define the training approach to be developed, structures, areas where the training will be conducted, program of work, etc.</p> <p>During this phase, the current RAPAs situation will be assessed regarding capacities and accordingly match the priority training module (s), in term of curricula and extent of the knowledge required.</p> <p>A training program will be prepared for organization of at least 4 training sessions/ workshops in different areas and conduct training with participation from all RAPAs and NAPA.</p> <p><i>b) Implementation phase – 4 months</i></p> <p>This phase is totally dedicated to the conduction of the training sessions as elaborated from the first phase. There are at least 4 training sessions to be conducted with approximately 10 persons in each one, with a total of at least 30 trained persons at the end. A participatory approach and interaction of thematic presentation with the best practices, lessons learned from experience, and on-the-job example demonstration when possible will be used. All the training sessions will be held in Albanian language.</p> <p>The structure of the training module will have the following format:</p>
--	---

	<ul style="list-style-type: none"> • Trainer materials <ul style="list-style-type: none"> - Thematic presentation prepared for the specific topic (widely based in the e-learning platform and expert knowledge) - Additional references materials (manuals and professional handbooks on which the trainer got inspired while preparing lessons) - Videotapes & posters (practical and visual methods are generally much more effective than lectures) - Appraisal sheet (which will provide the organizer a direct feed-back on the training sessions and suggestion for improving training components in the future) • Trainee materials <ul style="list-style-type: none"> - Computers/ laptops - File, pencil, papers - Additional references (sources of interested materials for the target audience) - Exercise sheets <p><i>c) Reporting phase – 1 month</i></p> <p>The third phase will basically be the evaluation and reporting phase. TRAINING ON CAPACITY BUILDING AND USE OF E-LEARNING PLATFORM

PROJECTS BACKGROUND

UNDP is committed into two very important projects jointly with the Ministry of Tourism and Environment (MoTE) which address assistance in biodiversity conservation and ecosystem management, as well as strengthening the capacities and equipping the human resource, namely National Agency of Protected Areas (NAPA) and Regional Administration of Protected Areas (RAPAs), dedicated to protected areas management and administration with tools and know how that enhance the financial sustainability.

Through the Italian Agency for Cooperation and Development (AICS) / the Italian government support, the project on Improving coverage and effectiveness management of Marine and Coastal Protected Areas (MCPA) Phase II, implemented targeting Karaburun-Sazan Marine Park, as an essential complement to its network of terrestrial PAs and contributes to Albania's obligations under different UN Conventions and the EU accession process. In the meantime, the project is applying a BIO-GIS Master Plan tool to increase nature protection and manage economic values of biodiversity.

The other project financed by GEF, Ministry of Tourism and Environment and UNDP, intends to improve the overall management effectiveness of the country's system of protected areas, addressing the gaps existing with the current funding for the PA system, and the capacities to administer and improve PA revenue streams. Therefore, the MoTE and its agencies are making concerted efforts to secure sufficient, stable and long-term financial resources for protected areas; to allocate these resources in a timely manner and appropriate form to cover the full costs of protected areas; and to ensure that the protected areas are managed effectively and efficiently with respect to conservation and other complementary objectives. Thus, activities are focused at two levels of support: building the financial management capacities of the agency responsible for administering the system of protected areas (NAPA); and demonstrating the efficacy of different financing strategies in a sub-set of National Parks: (i) Dajti National Park (DNP); (ii) Divjaka-Karavasta National Park (DKNP); and (iii) the Llogara-Karaburuni protected area complex (LKC).

Scope of work, responsibilities and duties

The main scope of the consultancy is to increase professional capacities of PAs' staff through training and learning, to enable use of the e-learning platform <https://akzm.net/list-courses>, to develop their skills on the management of PAs and contribute to fund generation.

Based on the training modules listed in the e-learning platform, assess the urgent needs and target audience(s) and specify the best modalities for providing training in 4 areas /sites and conduct training.

This kind of training needs to address different categories of employees / different background profiles and adopt the skill-based training at different levels of learners/staff, according to their skill.

The project intends to deliver on job training, looking for cost effective and flexible and easily accessible forms of training; the main principles to comply with while developing and delivering this tool are:

- Fresh staff employed at NAPA/RAPAs might require to quickly get familiar with PA management and conservation patterns of the system, thus the onboarding e-learning training would be very useful (delivers consistent and engaging training, allows learners to explore and learn more about different departments)
- Ensure that staff follow rules and regulations in the workplace (periodic reinforcement of the training) and they must be aware of the products and services in the PAs system
- Keep assessing & upgrading from time to time

Another element of this process is the build-up knowledge on conservation and management issues, which will be carried out by the multidisciplinary team of experts, which based on their knowledge and crosscut experiences on PAs management and administration, will moderate throughout the training courses specific know-how and knowledge

For this reason, the specific objectives to be accomplished and respective tasks are:

3. Acquaintance of the environmental experts with relevance to subjects of the e-learning platform and training capacities.
4. Define the capability of PAs staff and the needs for improvement of the platform

This requires a high profile and experienced team of experts in protected areas management practices and know-how. This consultancy will be carried out in three phases: preparation, implementation and reporting. The project office will supervise and coordinate all phases.

b) Preparatory phase – 2 months

The activities to be carried out during this phase will contribute to clearly define the training approach to be developed, structures, areas where the training will be conducted, program of work, etc.

During this phase, the current RAPAs situation will be assessed regarding capacities and accordingly match the priority training module (s), in term of curricula and extent of the knowledge required.

A training program will be prepared for organization of at least 4 training sessions/ workshops in different areas and conduct training with participation from all RAPAs and NAPA.

d) Implementation phase – 4 months

This phase is totally dedicated to the conduction of the **training sessions** as elaborated from the first phase. There are at least 4 training sessions to be conducted with approximately 10 persons in each one, with a total of at least 30 trained persons at the end. A participatory approach and interaction of thematic presentation with the best practices, lessons learned from experience, and on-the-job example demonstration when possible will be used. All the training sessions will be held in Albanian language.

The structure of the training module will have the following format:

- Trainer materials
 - Thematic presentation prepared for the specific topic (widely based in the e-learning platform and expert knowledge)
 - Additional references materials (manuals and professional handbooks on which the trainer got inspired while preparing lessons)
 - Videotapes & posters (practical and visual methods are generally much more effective than lectures)
 - Appraisal sheet (which will provide the organizer a direct feed-back on the training sessions and suggestion for improving training components in the future)
- Trainee materials
 - Computers/ laptops
 - File, pencil, papers
 - Additional references (sources of interested materials for the target audience)
 - Exercise sheets

e) Reporting phase – 1 month

The third phase will basically be the evaluation and reporting phase. A report will be elaborated based on the work done, some recommendation should be given for the further and sustained efforts in provision of training and share of knowledge on sustainability of protected areas.

Time Frame

The duration of the assignment will be 7 months. The indicative allocation will be the following:
