4. **Evaluation**

The technical component will be evaluated using the following criteria:

<table>
<thead>
<tr>
<th>Consultant(s)' experiences/qualification related to the services</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Postgraduate degree in health management or health procurement or relevant fields</td>

A two-stage procedure is utilized in evaluating the submissions, with evaluation of the technical components being completed prior to any price proposals being opened and compared.

The price proposal will be opened only for submissions that passed the minimum technical score of 70% of the obtainable score of 1000 points in the evaluation of the technical component. The technical component is evaluated on the basis of its responsiveness to the Term of Reference (TOR). Maximum 1000 points will be given to the lowest offer and the other financial proposals will receive the points inversely proportional to their financial offers. i.e. $S_f = 1000 \times \frac{F_m}{F}$, in which $S_f$ is the financial score, $F_m$ is the lowest price and $F$ the price of the submission under consideration.

The weight of technical points is 70% and financial points is 30%.

Submission obtaining the highest weighted points (technical points + financial points) will be selected subject to positive reference checks on the consultant’s past performance.

Interview with the candidates may be held if deemed necessary.

Project Title  “Sustainable Health in Procurement Project (SHiPP)”

Languages Required:  English and Vietnamese

**Sustainable Health in Procurement Project (SHiPP):** Reducing harm to people and the environment caused by the manufacture and disposal of medical products and by the implementation of health programmes.

1. **General Background:**

To promote compliance with environmental and social standards, the Sustainable Procurement in the Health sector initiative (SPHS) was officially established in May 2012 in Copenhagen, Denmark. The aim of the initiative is to promote sustainable procurement of health commodities and to contribute to greener health systems and inclusive green economies. This initiative is implemented by an Informal Interagency Task Team led by UNDP (which coordinates the secretariat) and has ten members—seven are UN Agencies (UNDP, UNEP, UNFPA, UNHCR, UNICEF, UNOPS, WHO) and three are Multilateral Health Financing Institutions (GAVI, GFATM and UNITAID). Together, these ten SPHS members command a cumulative purchasing power in the global health sector of around USD $5 billion annually, representing a sizeable portion of the global market in pharmaceuticals and other health products.¹

There are three main ways in which the health sector can negatively affect the health of people and the environment.

• Patients, health care workers and the public around the world are exposed to environmental and health risks during the implementation of health programs – for example through direct exposure to biological or chemical agents, or health risks from improper health care waste management and the burning of waste.

• The production of medical products can impact on health and well-being – for example there is increasing concern about pharmaceuticals which accumulate in the environment.

• The health sector as a whole, is having an impact on global climate change and planetary health for example – through emission of greenhouse gases.

Since 2018, UNDP with the financial support from the Swedish Government is implementing the SHiPP. In implementing this global project, UNDP partners with the Health Care Without Harm (HCWH), a US based international nongovernmental organisation (NGO) whose mission is to “transform health care worldwide so that it reduces its environmental footprint, becomes a community anchor for sustainability and a leader in the global movement for environmental health and justice”.2 HCWH has over 20 years of experience in the sector supporting health systems to implement sustainability measures in policies, practices and procurement of products and services. HCWH’s network of Global Green and Healthy Hospitals (GGHH) is made up of over 36,000 hospitals and health centres in 55 countries who have adopted a ten-goal sustainability framework.3

The SHiPP project is being implemented in 10 countries of Argentina, Brazil, China, India, Moldova, South Africa, Tanzania, Ukraine, Vietnam and Zambia. UNDP is responsible for programming in Argentina, Moldova, Tanzania, Ukraine, Vietnam and Zambia, while HCWH is responsible for programming in Brazil, China, India and South Africa: the emerging economies with extensive engagement in the HCWH GGHH community. HCWH is also working to scale-up the results in Southeast Asia and Latin America. Two of the countries, China and India supply 70% of the health products procured by UN Agencies. Vietnam also represents an important player in the health procurement capacity to the UN-system, with 19 different UN organizations procuring goods and services from the country in 2017. With 181 Vietnamese companies registered on UN Global Marketplace as potential suppliers for the UN, total 2017 procurement volumes from Vietnam amounted to 22.99 million USD. Health products and services were the second largest procurement category (14.4% of total procurement), amounting to 3.31 million USD. The highest health procurement volumes were in the following categories:

• Healthcare Services: 1.74 million USD
• Laboratory and Measuring and Observing and Testing Equipment: 1.04 million USD
• Pharmaceuticals incl. Contraceptives and Vaccines: 0.5 million USD
• Medical Equipment and Accessories and Supplies: 0.03 million USD

2017 procurement volumes confirm that UNDP remains a strategic development and procurement partner to Viet Nam, with the second highest UN procurement volumes of 5.24 million USD, followed by other SPHS Member Agencies: WHO 2.49 million USD, UNFPA 0.78 million USD, UNICEF 0.22 million USD, UNOPS 0.03 million USD.

UNDP and Health Care without Harm (HCWH) have identified procurement in the public health sector as well as private health systems as a key entry point for promoting more sustainable production and consumption patterns (SDG12). The role of procurement in influencing the environmental impact of health sector operations is well acknowledged and sustainable procurement practices have the capacity to reduce a significant proportion of the health sector’s greenhouse gas emissions (GHG).

3 Global Green and Healthy Hospitals Agenda. https://www.greenhospitals.net/what-we-do/
Project Aim: To strengthen sustainability in the health sector in selected countries to ultimately reduce harm to people and the environment caused by the manufacture and disposal of medical products.

2. Objective of the assignment:

In early 2019, a review assessment of national policies on health procurement was conducted. Since then, there have been changes in national policies that may facilitate green procurement of the health sector. Therefore, UNDP is seeking services of an experienced national consultant to update the former desk review study on current legal environment on health procurement. This additional review aims to provide health managers and health procurement officials who are attending upcoming national trainings on health green procurement with most up-to-date enabling policy environment for possible integration of sustainable/green procurement into the health sector procurement process.

3. Scope of works and task assignments

The scope of work assignment under this TOR include:

1. Desk review of updated policies and regulations of the Government on public procurement in general and relevant regulations of the health sector on medicine and health commodity procurement to find out challenges and opportunities for development of new legal framework and guidance on integrated sustainable procurement.
2. Support UNDP and Ministry of Health in capacity building on health commodity sustainable/green procurement through sharing the research findings and recommendations and facilitating discussion in advocacy workshops/events.

Specific task assignments:

1. Desk review of updated Policies and regulations: Under supervision of UNDP Viet Nam and in close collaboration with the National Center for Centralized Drug Procurement of the MOH, the national consultant will:
   
   • Identify and collect updated policies and regulations on public procurement and environment that can be applied for health commodity and medicine procurement within the health sector.
   • Conduct desk analysis of the updated policies and regulations to provide intellectual findings on how procurement activities within the health sectors are governed by available criteria of those regulations in the way of green and environment and health friendly.
   • Update the previously review report with new regulations and policies that can facilitate green procurement of the health sector in particular.
   • Provide recommendations for health managers on how to implement health green procurement with criteria aiming at mitigation of medical plastic, POP, and Mercury waste.

2. Support UNDP and Ministry of Health in capacity building for health managers on the improvement in health commodity sustainable/green procurement
   
   • Develop training documents including a presentation on updated policies and regulations in health sustainable procurement, a set of questions for practice on sustainable procurement planning and implementation, and a guidance for discussion
about health sustainable procurement in accordance with updated policies and regulations
- Attend the SHiPP 03 training workshops conducted by UNDP and the NCCDP in the North (Hai Phong), Central (Da Nang), and the South (HCMC) of Viet Nam to deliver presentations on findings and recommendations of the studies and facilitate discussions on possible solutions for improvement and scale up.

4. DURATION OF ASSIGNMENT, DUTY STATION AND EXPECTED PLACES OF TRAVEL

Duration and Timing: 15 working days during the period from 30th April to 31st July 2021

Duty Station: Home-based with travels to Hai Phong, Da Nang, and Ho Chi Minh City

Fieldwork is required to Hai Phong, Da Nang and Ho Chi Minh City will be conducted within April and July 2021. Travel costs outside Hanoi will be paid separately upon UNDP’s approval based on UN-EU Cost Norms.

5. FINAL PRODUCTS

- An updated final report on desk review of policies and regulations on procurement of medicines and health commodities with findings and recommendations as described in the task assignments under the scope of work 1
- Power Point presentations of the updates and guidance for discussion prepared and delivered in 03 training workshops.
